Figure 2. The electric field lines and equipotential lines for two equal but opposite charges. The equipotential lines can be drawn by making them perpendicular to the electric field lines, if those are known. Note that the potential is greatest (most positive) near the positive charge and least (most negative) near the negative charge.

**INTRODUCTION TO TRANSMISSION LINES**

A feeder line is a peripheral route or branch in a network, which connects smaller or more remote nodes with a route or branch carrying heavier traffic. The term is applicable to any system based on a hierarchical network.. In telecommunications, a feeder line branches from a main line or trunk line.. In electrical engineering, a feeder line is a type of transmission line.
