*A Guide to Writing Your Dissertation* John Wiley & Sons

Doing Research in Business and Management brings the theory and techniques of research methods to life and covers all of the areas of research, from a review of secondary data or literature, or writing a research proposal, to completing an entire research project. The book is written for students on undergraduate and postgraduate degree programmes in business, management or related disciplines.

**Analysing Quantitative Survey Data for Business and Management Students** Edward Elgar Publishing

Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan, the series is designed to support business and management students with their research-based dissertations by providing in-depth and practical guidance on using a chosen method of data collection or analysis. The books are written in a concise and accessible way, and contain a range of features, including checklists and a glossary, designed to support self-guided research. In Case Study Research, Bill Lee and Mark Saunders describe the properties of case study designs in organizational research, exploring the uses, advantages and limitations of case research. They also demonstrate the flexibility that case designs offer, and challenges the myths surrounding this approach. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Watch the editors introduce the Mastering Business Research Methods series and tell you more about the first three books.

**Business Research Methods** SAGE

In Conducting Research Interviews, Catherine Cassell guides you through conceptualizing the interview, preparing for the research interview, conducting the interview, examples, conclusions and next steps. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series.

**Qualitative Methods in Business Research** SAGE

Research Methods For Business, 8th Edition explains the principles and practices of using a systematic, organized method for solving problematic issues in business organizations. Designed to help students view research from the perspective of management, this popular textbook guides students through the entire business research process. Organized into six main themes—Introduction, Defining the Management and the Research Problem, Theory, Collecting Information, Drawing Conclusions, and Writing and Presenting the Research Report—the text enables students to develop the skills and knowledge required to successfully create, conduct, and analyze a research project. Now in its eighth edition, this popular textbook has been thoroughly updated to incorporate substantial new and expanded content, and reflect current research methods and practices. The text uses a unique blended learning approach, allowing instructors the flexibility to custom-tailor their courses to fit their specific needs. This innovative approach combines the face-to-face classroom methods of the instructor with internet-based activities that enable students to study what they want, when they want, at their own pace.

*Case Study Research for Business* Kogan Page Publishers

This updated and revised edition offers a comprehensive overview of key research methods and the main choices available when undertaking research in business and management. New to this edition is a comprehensive, practical guide on how to write your dissertation - invaluable to all. It is a clear, concise and practical guide containing wealth of outstanding examples for each method covered. Central to this edition is the 'methods map' (chapter 4), which sets out a logical process for researchers to articulate their position in relation to five key aspects of their research philosophy. In addition, the editors have developed a free app to accompany the book and this enables novice researchers to quickly develop a comprehensive justification of their particular research design in an interactive way. Taking you through the entire life cycle of a dissertation, the text covers everything from the purposes of research through to chapters on gathering primary and secondary data; using literature; quantitative and qualitative research; managing your research; using data and research ethics. Individual chapters are allied to a powerful critical commentary showing how some of the world's leading scholars have used particular methods in their own research. Carefully constructed to achieve the greatest clarity for the student the text gives the reader: \* In-text exercises \* End of chapter' review questions with solutions\* Exemplar papers identified and discussed for each of the main methods \*Directed further reading for developing understanding in key areas It is an essential learning aid for upper level undergraduates and postgraduates across a wide range of business and management courses and it comes with a range of supported learning materials including tutorials, lecture slides and tutor notes. Kevin O'Gorman is Professor of Management and Business History and Head of Business Management in the School of Languages and Management in Heriot-Watt University, Edinburgh. He trained in Glasgow, Salamanca and Rome as a philosopher, theologian and historian. His research interests have a dual focus: Origins, history and cultural practices of hospitality, and philosophical, ethical and cultural underpinnings of contemporary management practices. Using a wide range of methodological approaches he has published over 80 journal articles, books, chapters, and conference papers in business and management studies. Robert MacIntosh is Professor of Strategy and Head of the School of Management and Languages at Heriot-Watt University. He trained as an engineer and has worked at the Universities of Glasgow and Strathclyde. His research on the ways in which top teams develop strategy and on organizational change has been published in a wide range of outlets. He has a long-standing interest in research methods for business and management studies and has published on the relevance of management research using methods that include ethnography and action research. He has consulted extensively with public and private sector organizations and sits on the board of the charity Turning Point Scotland.

*How to Write Dissertations & Project Reports* Addison-Wesley

As Human Resource Development (HRD) research has developed, a growing variety of quantitative and qualitative data collection procedures and analysis techniques have been adopted; research designs now include mono, multiple and mixed methods. This Hand

**Management and Business Research** SAGE

Methods in Sustainability Science: Assessment, Prioritization, Improvement, Design and Optimization presents cutting edge, detailed methodologies needed to create sustainable growth in any field or industry, including life cycle assessments, building design, and energy systems. The book utilized a systematic structured approach to each of the methodologies described in an interdisciplinary way to ensure the methodologies are applicable in the real world, including case studies to demonstrate the methods. The chapters are written by a global team of authors in a variety of sustainability related fields. Methods in Sustainability Science: Assessment, Prioritization, Improvement, Design and Optimization will provide academics, researchers and practitioners in sustainability, especially environmental science and environmental engineering, with the most recent methodologies needed to maintain a sustainable future. It is also a necessary read for postgraduates in sustainability, as

well as academics and researchers in energy and chemical engineering who need to ensure their industrial methodologies are sustainable. Provides a comprehensive overview of the most recent methodologies in sustainability assessment, prioritization, improvement, design and optimization. Sections are organized in a systematic and logical way to clearly present the most recent methodologies for sustainability and the chapters utilize an interdisciplinary approach that covers all considerations of sustainability. Includes detailed case studies demonstrating the efficacies of the described methods.

Research Methods For Business Students, 5/e Pearson Education India Research Methods for Business Students

*Conducting Focus Groups for Business and Management Students* Financial Times/Prentice Hall

In *Analysing Quantitative Survey Data*, Jeremy Dawson introduces you to the key elements of analysing quantitative survey data using classical test theory, the measurement theory that underlies the techniques described in the book. The methodological assumptions, basic components and strengths and limitations of this analysis are explained and with the help of illustrative examples, you are guided through how to conduct the key procedures involved, including reliability analysis, exploratory and confirmatory factor analysis. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. *Value Pack* Research Methods For Business Students, 5/e

Students need more help than ever before in selecting their dissertation or project topic and ensuring this major project gets the best marks. This book provides crucial support that will help organise their thinking and get them on the road to success.

**A Guide for Students and Researchers** Pearson Education India

In *Template Analysis*, Nigel King and Joanna Brookes guide you through the origins of template analysis and its place in qualitative research, its basic components, and the main strengths and limitations of this method. Practical case studies and examples from published research then guide you through how to use it in your own research project. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as a reference book for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series.

**Assessment, Prioritization, Improvement, Design and Optimization** John Wiley & Sons  
Organizations need research, and managers have to be able to commission, judge and use others' research as well as conduct research themselves to inform business decisions. *Business Research Methods* helps you understand the challenges of carrying out worthwhile research into significant issues and develop a wide range of research-related professional skills. Guiding you through the process of selecting, carrying out and reporting on a successful research project, it breaks down the research process, from exploring the literature and crafting a research proposal to practical research management and addressing the transferable skills of project management and communication. *Business Research Methods* places research firmly in the real world, exploring why research is done and how to ensure that projects are meaningful for organizations. Examples and case studies, including examples of students' projects, give learners with little or no work experience a meaningful context in which to relate their own projects. Online supporting resources for lecturers include an instructor's manual with additional activities and supporting handouts, lecture slides and figures and tables from the text. Resources for students include web links, templates, quizzes, activities, examples of practice and sample questionnaire results for students.

*Methods in Sustainability Science* SAGE

Do you want to study influencers? Opinions and comments on a set of posts? Look at collections of photos or videos on Instagram? Qualitative Research Using Social Media guides the reader in what different kinds of qualitative research can be applied to social media data. It introduces students, as well as those who are new to the field, to developing and carrying out concrete research projects. The book takes the reader through the stages of choosing data, formulating a research question, and choosing and applying method(s). Written in a clear and accessible manner with current social media examples throughout, the book provides a step-by-step overview of a range of qualitative methods. These are presented in clear ways to show how to analyze many different types of social media content, including language and visual content such as memes, gifs, photographs, and film clips. Methods examined include critical discourse analysis, content analysis, multimodal analysis, ethnography, and focus groups. Most importantly, the chapters and examples show how to ask the kinds of questions that are relevant for us at this present point in our societies, where social media is highly integrated into how we live. Social media is used for political communication, social activism, as well as commercial activities and mundane everyday things, and it can transform how all these are accomplished and even what they mean. Drawing on examples from Twitter, Instagram, YouTube, TikTok, Facebook, Snapchat, Reddit, Weibo, and others, this book will be suitable for undergraduate students studying social media research courses in media and communications, as well as other humanities such as linguistics and social science-based degrees.

*Doing Research in Business and Management* Goodfellow Publishers Ltd

Now in its Fifth Edition, this much-loved text offers theoretical and philosophical depth as well as insights into practice. The text covers the entire research process in an accessible way and provides critical, thoughtful treatment of important issues like ethics and politics, making it an invaluable companion for any business and management student. New to the Fifth Edition: Expanded to include

examples from across business and management including Marketing, International Business and Psychology. Up-to-date, international examples and cases from a range of countries. Introductory chapter looks at writing proposals in detail. Chapter on the literature review now includes how to critically review. Move towards new technologies and social media including discussion of wikis and cloud sourcing. Improved structure and flow, with three chapters on qualitative methods and three on quantitative methods. Additional practical exercises which are linked to key research tasks throughout. The companion website (<https://edge.sagepub.com/easterbysmith>) offers a wealth of resources for both lecturers and students including, for lecturers, an instructor's manual and PowerPoint slides and, for students, author podcasts, journal articles, web links, MCQs, datasets and a glossary.

*Designing and Managing a Research Project* Waveland Press Inc

An adaptation of 'Social Research Methods' by Alan Bryman, this volume provides a comprehensive introduction to the area of business research methods. It gives students an assessment of the contexts within which different methods may be used and how they should be implemented.

**Template Analysis for Business and Management Students** Bookboon

Increasingly, managers must make decisions based on almost unlimited information. How can they navigate and organize this vast amount of data? *Essentials of Business Research Methods* provides research techniques for people who aren't data analysts. The authors offer a straightforward, hands-on approach to the vital managerial process of gathering and using data to make clear business decisions. They include critical topics, such as the increasing role of online research, ethical issues, data mining, customer relationship management, and how to conduct information-gathering activities more effectively in a rapidly changing business environment. This is the only text that includes a chapter on qualitative data analysis, and the coverage of quantitative data analysis is more extensive, and much easier to understand than in other texts. The book features a realistic continuing case throughout that enables students to see how business research information is used in the real world. It includes applied research examples in all chapters, as well as ethical dilemma mini cases, and exercises.

*Business Research* SAGE Publications

*Research Methods for Business and Social Science Students* aims to present a clear discussion of the research methods employed in various disciplines related to our daily life problems. The theoretical basis of research methods is explained clearly and succinctly. Collecting data is a key part of the book and this includes both qualitative and quantitative methods of data collection, along with the advantages and disadvantages of each method. The book also describes in clear terms how students can analyse data, interpret results and link these to the literature review and hence their own contribution. It sets out a range of fundamental ideas in research methods, such as deductivism and inductivism, and explains why methodology is not the same as method. In this second edition every chapter has been re-written to be more readable and also to include more examples. The authors have also added a real student research proposal and a multiple-choice test with answers for the readers to test their own understanding of the ideas in the book. The book has been designed to illustrate research tools in a clear and accessible manner through chapters on such topics as formulating research, research design, data analysis and writing up the research results.

**A Skill Building Approach** Prentice Hall

Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support students by providing in-depth and practical guidance on using a chosen method of data collection or analysis. *Necessary Condition Analysis (NCA)* is an emerging method of data analysis, based on the idea that research factors can be necessary for an outcome: if the condition is not there, then the result will not occur. These necessary conditions are everywhere, and NCA is an intuitive and straightforward means of finding and testing data, either as a standalone tool or as a complement to other research methods. This book is an invaluable guide to using NCA effectively in business and management dissertations, and offers practical guidance and insight into how to successfully transcribe and analyse data using the NCA approach in research projects. Jan Dul is Professor of Technology and Human Factors at Rotterdam School of Management, Erasmus University, The Netherlands.

**Business Research Methods** Routledge

Comprehensive, current and compelling, a winning combination for any research student or practitioner interested in increasing his/her knowledge about qualitative methods as they apply to business research' - *The Qualitative Report*. Covering all the major qualitative approaches in business studies (including case study research, ethnography, narrative inquiry, discourse analysis, grounded theory and action research), this practical how-to guide shows how qualitative methods are used within management, marketing, organizational studies and accounting. Within each approach, the authors consider crucial issues such as framing the research, generating research questions, getting access, collecting empirical materials, reporting the results and evaluating the research. Original case studies drawn from around the world are included throughout to demonstrate the practical applications of the methods discussed.

**A Practical Approach** Oxford University Press

La 4e de couverture indique : "If you need any help with your research project or dissertation then this fully revised and updated 2nd edition is ideal for you. *Doing Research in Business and Management* brings research methods to life, covering critical literature review projects, projects using existing data, and those projects where you collect your own data. It explains how to write your research proposal and complete your entire research project. The concise and easy-to-read style combined with clear tables and diagrams makes it highly accessible. 'Definition' boxes explain key terms and 'Research in practice' boxes show how research is used in real life, making this the book you need to successfully complete your project. New to the 2nd edition: latest sources of online secondary data, extended discussion of research philosophies and theory development, using observation, and how to reference. Don't forget to visit [www.pearsoned.co.uk/saunders](http://www.pearsoned.co.uk/saunders) for online tutorials on research software, such as SPSS, and where you can search the Internet more efficiently and effectively with our Smarter Online Searching Guide!"
