#### **Environment-Friendly Products—Adapt Green Now** SAGE

This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters, written by leading experts, discuss theoretical and methodological issues, illustrate applications, highlight their policy context and relevance, and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes, such as the journal impact factor and the h-index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various

national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent-related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.

#### Subject Classification System Handbook Bibliometrics

This book on Thesis Writing for Master's and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a

thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal.

An incisive narrative history of the Islamic State, from the 2005 master plan to reestablish the Caliphate to its quest for Final Victory in 2020. Given how quickly its operations have achieved global impact, it may seem that the Islamic State materialized suddenly. In fact, al-Qaeda's operations chief, Sayf al-Adl, devised a seven-stage plan for jihadis to conquer the world by 2020 that included reestablishing the Caliphate in Syria between 2013 and 2016. Despite a massive schism between the Islamic State and al-Qaeda, al-Adl's plan has proved remarkably prescient. In summer 2014, ISIS declared itself the Caliphate after capturing Mosul, Iraq—part of stage five in al-Adl's plan. Drawing on large troves of recently declassified documents captured from the Islamic State and its predecessors, counterterrorism expert Brian Fishman tells the story of this organization's complex and largely hidden past—and what the master plan suggests about its future. Only by understanding the Islamic State's full history—and the strategy that drove it—can we understand the contradictions that may ultimately tear it apart.

*Springer Handbook of Science and Technology Indicators* Peeters Pub & Booksellers

This book contains over sixty papers on the many aspects of Electronic Publishing that have been written specifically for the 9th ELPUB conference hosted by the Research Group on Document Architectures (Jan Engelen) of the Katholieke Universiteit Leuven in Belgium. They have been refereed by the International Programme Committee consisting of 34 highly qualified experts with a wide variety of backgrounds and expertise domains. This committee was presided by Milena Dobrova of the Bulgarian Institute of Mathematics and Informatics. The major general topics covered are: Libraries and Scholarly Communication, Scholarly Publishing, Open Access, Humanities and Electronic Publishing and Electronic Publishing in a more general Societal and Economic Context. In the technical track specialised contributions can be found in the field of: Innovative Approaches, Mark-up Languages, Multilingual Issues, E-publishing for Reading Impaired Users and Web Content Management.

*Documentation Abstracts* SAGE

This book provides you with all the tools you need to write an excellent academic article and get it published.

**The Royal Engineer Journal** Partridge Publishing

The Intercollegiate Studies Institute (ISI) was founded in 1953 to defend traditional liberal education in American colleges and universities against the onslaught of leftist ideologues. With its myriad lectures, journals, fellowships, books, seminars, and mentoring programs, ISI is today the educational pillar of the conservative movement and the leading source of information about a free society for the many students and teachers who reject the post-modernist zeitgeist. In this book, Lee Edwards, the pre-eminent historian of the conservative movement, details how ISI has inspired the minds of collegiate conservatives for decades and prepared them to defend the American and Western patrimony in public office, research organizations, the media, and the academy. Edwards tells the story of ISI's original focus on combating socialism, its resistance to the cultural crisis of the

1960s and the 1970s, its battle against political correctness in the 1980s and 1990s, and its answer to the resurgent anti-Americanism on college campuses after 9/11. ISI's unwavering mission from the Cold War to the War on Terrorism has been to lay the intellectual and cultural foundation for ordered liberty in America and to help the West triumph in the clash of civilizations. *The Chemical Trade Journal and Chemical Engineer* Walter de Gruyter GmbH & Co KG

Techniques of mathematical and statistical analysis of books and other media of communication are applied to such works as research reports and scientific journals. About half of the 15 articles are from a special issues of *Communication research* 16(5), 1989. Annotation copyright Book News, Inc. Portland, Or. *The Solicitors' Journal* Regnery Publishing

"I enthusiastically endorse the fourth edition of IHRM. The editors are to be congratulated for recruiting the top-rated authors in this field to contribute to this volume. The chapters are up to date, insightful, and sometimes even provocative. Students, including post-grads and advanced undergraduates, as well as savvy practitioners, will benefit from reading this volume." Neal M. Ashkanasy, Professor of Management, The University of Queensland Anne-Wil Harzing and Ashly Pinnington's bestselling textbook has guided thousands of students through their International Human Resource Management studies. The fourth edition retains the critical edge, academic rigour and breadth of coverage which have established this book as the most authoritative text on the market. The new edition by our international team of experts provides an even more stimulating journey through the core curriculum, contemporary debates and emerging issues in IHRM. New for the fourth edition: Reduced number of chapters to allow for greater depth and an improved structure ensuring fundamental topics underpin your knowledge Expanded coverage of Equality and Diversity, Corporate Social Responsibility and Sustainability and Cross-Cultural Management in line with developments in the field New Stop and Reflect feature provides an opportunity to test your understanding at regular intervals This text comes with access to a companion website containing web links, SAGE journal articles and more.

**The Legal Observer, Or, Journal of Jurisprudence** SAGE Publications, Incorporated

Garfield's greatest contribution to science was the Science Citation Index (SCI). It is a system that used to chart connections between pieces of scientific literature. It is not only an intellectual achievement, but also an information-engineering marvel covering millions of records, from numerous subject fields and communicated over worldwide networks. These databases became the foundation of the online research tool called the Web of Knowledge. And it has now become accessible electronically via the Web of Science. Garfield enabled information retrieval to scale up basically creating the entire information science field, as we know it today. His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge. This is *Informatics Studies* 4(2), which is Eugene Garfield Memorial Issue. It gives a bird's eye view of Garfield's life and work and consist of an 80 page interview of Garfield published in print for the first time presenting his views on impact of information systems in scientific research, NGOs, the future of Open Access, current research, and Big science which can guide academic administrators, science policy makers in governments and scientists.

On-line information -- and free text in particular -- has emerged as a major, yet unexploited, resource available in raw form.

Available, but not accessible. The lexicon provides the major key for enabling accessibility to on-line text. The expert contributors to this book explore the range of possibilities for the generation of extensive lexicons. In so doing, they investigate the use of existing on-line dictionaries and thesauri, and explain how lexicons can be acquired from the corpus -- the text under investigation -- itself. Leading researchers in four related fields offer the latest investigations: computational linguists cover the natural language processing aspect; statisticians point out the issues involved in the use of massive data; experts discuss the limitations of current technology; and lexicographers share their experience in the design of the traditional dictionaries.

*The Journal of Education* Yale University Press

The Frontiers in Chemistry Editorial Office team are delighted to present the inaugural "Frontiers in Chemistry: Rising Stars" article collection, showcasing the high-quality work of internationally recognized researchers in the early stages of their independent careers. All Rising Star researchers featured within this collection were individually nominated by the Journal's Chief Editors in recognition of their potential to influence the future directions in their respective fields. The work presented here highlights the diversity of research performed across the entire breadth of the chemical sciences, and presents advances in theory, experiment and methodology with applications to compelling problems. This Editorial features the corresponding author(s) of each paper published within this important collection, ordered by section alphabetically, highlighting them as the great researchers of the future. The Frontiers in Chemistry Editorial Office team would like to thank each researcher who contributed their work to this collection. We would also like to personally thank our Chief Editors for their exemplary leadership of this article collection; their strong support and passion for this important, community-driven collection has ensured its success and global impact. Laurent Mathey, PhD Journal Development Manager

Colburn's United Service Magazine and Naval and Military Journal  
Psychology Press

Excessive pollution has provoked the nature, and the nature starts behaving in unnatural ways (in form of global warming versus global cooling, heavy rains versus draught, and other natural calamities like frequent earthquakes and tsunami,

cyclones, epidemics, and so forth). Economic growth via production and consumption threatens peaceful life of human beings on the earth. Environment-friendly eco-green marketing is an attempt to protect consumer welfare and environment (the nature) through production, consumption, and disposal of eco-friendly products. Basically, green marketing is concerned with three aspects: 1. promotion of production and consummation of pure/quality products, 2. fair and just dealing with customers and society, and 3. protection of ecological environment. Thus, green marketing is a marketing philosophy that promotes production and selling of pure (eco-friendly) products with protection of ecological balance. Green marketing involves multiple activities. Green marketing encourages production of pure products by pure technology, conservation of energy, preservation of environment, minimum use of natural resources, and more use of natural foods instead of processed foods. Efforts of people, social organizations, firms, and governments in this regard can be said as green marketing efforts. Green marketing raises the voice against production, consumption, and/or disposal of such products that harm consumers, the society, and the environment anyway. It is necessary that businessmen and users should refrain from harmful products.

*Eugene Garfield 1925-2017* Centre for Informatics Research and Development/ Centre for South Indian Studies

Bibliometrics and altmetrics are increasingly becoming the focus of interest in the context of research evaluation. The Handbook Bibliometrics provides a comprehensive introduction to quantifying scientific output in addition to a historical derivation, individual indicators, institutions, application perspectives and data bases. Furthermore, application scenarios, training and qualification on bibliometrics and their implications are considered.

List of Journals Indexed in Index Medicus

Issues for 1977-1979 include also Special List journals being indexed in cooperation with other institutions. Citations from these journals appear in other MEDLARS bibliographies and in MEDLING, but not in Index medicus.
