### Best STEM Resources for NextGen Scientists: The Essential Selection and User's Guide John Wiley & Sons

This book offers a comprehensive introductory guide to "choosing and using" a series LXD55 or LXD75 computer-controlled ("goto") telescope, containing a wealth of useful information for both beginners and more advanced practical amateur astronomers. The manufacturer's manuals are not nearly detailed enough to be of real help to beginners. No other book offers advanced techniques for more experienced LXD series users.

Part of The Geological Field Guide Series, Basic Geological Mapping, 5th Edition is an essential basic guide to field techniques in mapping geology. Now completely revised and updated the book retains the concise clarity which has made it an indispensable instant reference in its previous editions. It provides the reader with all the necessary practical information and techniques that they will need while carrying out work in the field, covering a wide spectrum of different conditions, needs and types of countries. This edition covers new developments in technology including Google Earth and the use of GPS. This is an ideal field guide to geological mapping for 2nd/3rd year undergraduates of Geology, Hydrogeology and Geological Engineering.

*A Small Home of Your Own* Rowman & Littlefield

Need directions? Are you good at getting lost? Then GPS is just the technology

you've dreamed of, and GPS For Dummies is what you need to help you make the most of it. If you have a GPS unit or plan to buy one, GPS For Dummies, 2nd Edition helps you compare GPS technologies, units, and uses. You'll find out how to create and use digital maps and learn about waypoints, tracks, coordinate systems, and other key point to using GPS technology. Get more from your GPS device by learning to use Web-hosted mapping services and even how to turn your cell phone or PDA into a GPS receiver. You'll also discover: Up-to-date information on the capabilities of popular handheld and automotive Global Positioning Systems How to read a map and how to get more from the free maps available online The capabilities and limitations of GPS technology, and how satellites and radio systems make GPS work How to interface your GPS receiver with your computer and what digital mapping software can offer Why a cell phone with GPS capability isn't the same as a GPS unit What can affect your GPS reading and how accurate it will be How to use Street Atlas USA, TopoFusion, Google Earth, and other tools Fun things to do with GPS, such as exploring topographical maps, aerial imagery, and the sport of geocaching Most GPS receivers do much more than their owners realize. With GPS For Dummies, 2nd Edition in hand, you'll venture forth with confidence!

A Practical Guide for Librarians Springer  
Open Source Archaeology: Ethics and Practice' brings together authors and researchers in the field of open-source archaeology, defined as encompassing the ethical imperative for open public access to the results of publicly-funded research; practical solutions to open-data projects; open-source software

applications in archaeology; public information sharing projects in archaeology; open-GIS; and the open-context system of data management and sharing. This edited volume is designed to discuss important issues around open access to data and software in academic and commercial archaeology, as well as to summarise both the current state of theoretical engagement, and technological development in the field of open-archaeology.

**Ben Edwards** Ben Edwards was trained in archaeology at the University of Durham, achieving his BA, MA and PhD. His first commercial work was for Archaeological Services, Durham University, before moving on to become a Lecturer in Archaeological Practice at the University of Liverpool, where he taught for three years. During this time Ben began his project management work, undertaking both commercial and research excavations, and survey projects. His teaching (archaeological practice and heritage management) proved to be an excellent basis from which to develop his professional expertise. Ben now lectures at Manchester Metropolitan University in Archaeology and Heritage. He currently researches open source software and hardware for use in the field, and advanced 3D surveying techniques.

**Andrew Wilson** Andrew Wilson was trained in archaeology at the University of Liverpool. Upon achieving his BA at the University, Andrew moved south to study Computer Applied Archaeology at the University of Southampton, where he was awarded an MSc. Andrew returned to the University of Liverpool where he has recently completed a PhD. During this time Andrew coordinated a number of projects both in the UK and Middle East, specialising in advanced surveying

techniques of archaeological remains. Working in the the School of Computer Science, Bangor University Andrew has developed his keen interest in Open data policies and ethics. This interest was the starting point for this volume.

**Not a Toy, but a Tool** Rowman & Littlefield

iPads are powerful tools for engaging students, encouraging creativity, stimulating critical thinking, and making significant strides in learning. This book is part of a two book set that will allow educators to realize the full potential of the iPad. Over 200 highly rated apps are covered with specific ideas for classroom activities and teaching strategies.

*Google Earth Engine Applications* John Wiley & Sons

This book comprises select proceedings of the annual conference of the Indian Geotechnical Society. The conference brings together research and case histories on various aspects of geotechnical and geoenvironmental engineering. The book presents papers on geotechnical applications and case histories, covering topics such as (i) Characterization of Geomaterials and Physical Modelling; (ii) Foundations and Deep Excavations; (iii) Soil Stabilization and Ground Improvement; (iv) Geoenvironmental Engineering and Waste Material Utilization; (v) Soil Dynamics and Earthquake Geotechnical Engineering; (vi) Earth Retaining Structures, Dams and Embankments; (vii) Slope Stability and Landslides; (viii) Transportation Geotechnics; (ix) Geosynthetics Applications; (x) Computational, Analytical and Numerical Modelling; (xi) Rock Engineering, Tunnelling and Underground Constructions; (xii) Forensic Geotechnical Engineering and Case Studies; and (xiii) Others Topics:

Behaviour of Unsaturated Soils, Offshore and Marine Geotechnics, Remote Sensing and GIS, Field Investigations, Instrumentation and Monitoring, Retrofitting of Geotechnical Structures, Reliability in Geotechnical Engineering, Geotechnical Education, Codes and Standards, and other relevant topics. The contents of this book are of interest to researchers and practicing engineers alike.

**Developing Effective Communication Skills in Archaeology** John Wiley & Sons

"This book presents research on the most recent technological developments in all fields of knowledge or disciplines of computer games development, including planning, design, development, marketing, business management, users and behavior"--Provided by publisher. Springer Nature

"The Practical Life Skills Workbook" is designed for people who have recovered well enough from brain injury to prepare for a return to independent living. Using a very accessible and easy to read format which takes into account various learning styles resulting from brain injury, the sessions can be completed entirely at the pace that best suits the user. Exercises and tips described in the book cover: Budgeting; Reading and understanding bill terminology; Route orientation; Form filling; and, Planning a night's entertainment. Designed to be completed over a ten week period, this book will represent a milestone in the journey towards living independently for many people, providing careful guidance with everyday tasks and activities that initially appear daunting. It includes a CD of comprehensive, downloadable activities.

**Modeling with ArcGIS 3D Analyst and Google Earth** IGI Global

WINNER OF THE CANTEMIR PRIZE 2012 awarded by the Berendel Foundation The Map Reader brings together, for the first time, classic and hard-to-find articles on mapping. This book provides a wide-ranging and coherent edited compendium of key scholarly writing about the changing nature of cartography over the last half century. The editorial selection of fifty-four theoretical and thought provoking texts demonstrates how cartography works as a powerful representational form and explores how different mapping practices have been conceptualised in particular scholarly contexts. Themes covered include paradigms, politics, people, aesthetics and technology. Original interpretative essays set the literature into intellectual context within these themes. Excerpts are drawn from leading scholars and researchers in a range of cognate fields including: Cartography, Geography, Anthropology, Architecture, Engineering, Computer Science and Graphic Design. The Map Reader provides a new unique single source reference to the essential literature in the cartographic field: more than fifty specially edited excerpts from key, classic articles and monographs critical introductions by experienced experts in the field focused coverage of key mapping practices, techniques and ideas a valuable resource suited to a broad spectrum of researchers and students working in cartography and GIScience, geography, the social sciences, media studies, and visual arts full page colour illustrations of significant maps as provocative visual 'think-pieces' fully indexed, clearly structured and accessible ways into a fast changing field of cartographic research Ethics and Practice Classroom Complete Press

\*\*This is the chapter slice "Map Your Continent" from the full lesson plan "Mapping Skills with Google Earth"\*\*. Teach your students the basics of map reading with our engaging resource designed for students in grades prekindergarten to two. Start with the elements found on a map, such as symbols, legends and the compass rose. Then, have your students apply what they've learned by mapping their classroom and route to school. Move on to the Great Lakes of North America and the seven continents and four oceans of the world. Our resource gives students the necessary building blocks to continue with the study of mapping skills. Comprised of reading passages, map activities, crossword, word search and comprehension quiz, our resource incorporates curriculum-based lessons with Google Earth™ so students can further understand the basics of map reading with the help of visual and interactive technology. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy.

### **Living with an Acquired Brain Injury** Routledge

Tout en couleur, la collection guide Microapp vous accompagne dans votre découverte d'un logiciel et d'une technologie informatique. Grâce à une approche résolument pratique, centrée autour de nombreux exemples pas à pas, elle vous permet de réussir vos premières prises en main et de réaliser des opérations concrètes, rapidement et facilement, sans connaissance préalable du sujet traité. Apprenez, grâce à cet ouvrage, à installer et à exploiter toutes les fonctionnalités de Google Earth !  
*Scene Radiance Tape Products, Sorting Into Angular Bins Products, and Maximum Likelihood Cloud Estimation*

*Products* John Wiley & Sons  
Intended to support the national initiative to strengthen learning in areas of science, technology, engineering, and mathematics, this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers' advisory and programming. • Introduces more than 500 STEM resource suggestions for toddlers to young adults • Highlights more than 25 detailed library program or activity suggestions to be paired with STEM book titles • Provides resource suggestions for professional development • Contains bonus sections on STEM-related graphic novels, apps, and other media

### *The Practical Life Skills Workbook* IGI Global

\*\*\* This USING Google Maps and Google Earth book is enhanced with nearly 2 hours of FREE step-by-step VIDEO TUTORIALS and AUDIO SIDEBARS! \*\*\*  
Google Maps is a free, web-mapping service app and technology provided by Google to view local traffic conditions, display nearby businesses and plot driving directions between two points. Google Earth is a stand-alone, related product offering more globe-viewing features, including showing more of the polar areas. Google Maps and Google Earth are both used for fun, business, or travel! USING Google Maps and Google Earth is a media-rich learning experience designed to help new users master Google Maps and Google Earth quickly, and get the most out of it, fast! EVERY chapter has multiple video and audio files integrated into the learning material which creates interactive content that works together to teach everything mainstream Google Maps and Google Earth users need to know. You'll Learn

How to: - Discover How to Map Your Favorite Places with Google Maps - See Actual Locations with Street View - Generate Driving, Walking, and Public Transit Directions - Find and Learn More About Businesses - Create and Share Custom Maps and Mashups - Use Google Maps on iPhone - Navigate Google Earth to Find Locations Fast - Create Life-like Roadmaps and Tour Your Route - Explore Google Sky, Google Moon, and Google Earth's Flight Simulator Examples of Topics Covered in VIDEO TUTORIALS, which Walk You Through Tasks You've Just Got to See! - Create and Share Custom Maps - Generate Driving Directions Right from your Smartphone - Create a Google Earth Roadmap Examples of Topics Covered in AUDIO SIDEBARS, which Deliver Insights Straight From the Experts! - Use Google Places with your Company's Online Marketing Strategy - Compare Driving Directions from Google Earth and Google Maps - Just How Accurate are Google Maps Anyway? Please note that due to the incredibly rich media included in your Enhanced eBook, you may experience longer download times. Please be patient while your product is delivered. This Enhanced eBook has been developed to match the Apple Enhanced eBook specifications for the iPad and may not render well on older iPhones or iPods or perform on other devices or reader applications.

*Google Earth For Dummies* Webolicus Looks at the the features of Google and its applications and offers information on ways to use them in the classroom.

A USER'S GUIDE Insitebuilders Communicating archaeological heritage at the institutional level reflects on the current status of archeology, and a lack of communication between archaeologists and the general public

only serves to widen the gap of understanding. As holders of this specific scientific expertise, effective openness and communication is essential to understanding how a durable future can be built through comprehension of the past and the importance of heritage sites and collections. Developing Effective Communication Skills in Archaeology is an essential research publication that examines archeology as a method for present researchers to interact and communicate with the past, and as a methods for identifying the overall trends in the needs of humanity as a whole. Presenting a vast range of topics such as digital transformation, artificial intelligence, and heritage awareness, this book is essential for archaeologists, journalists, heritage managers, sociologists, educators, anthropologists, museum curators, historians, communication specialists, industry professionals, researchers, academicians, and students.

**Theories of Mapping Practice and Cartographic Representation** Walter de Gruyter GmbH & Co KG

This book consists of a collection of the high-quality research articles in the field of computer vision and robotics which are presented in the International Conference on Computer Vision and Robotics (CVR 2021), organized by BBD University Lucknow, India, during 7-8 August 2021. The book discusses applications of computer vision and robotics in the fields like medical science, defence, and smart city planning. The book presents recent works from researchers, academicians, industry, and policy makers.

Earth Probe Total Ozone Mapping Spectrometer (TOMS) Data Product User's Guide Pearson Education

This interesting guide covers all aspects

of Google Earth, the freely downloadable application from Google that allows users to view satellite images from all points of the globe Aimed at a diverse audience, including casual users who enjoy air shots of locales as well as geographers, real estate professionals, and GPS developers Includes valuable tips on various customizations that users can add, advice on setting up scavenger hunts, and guidance on using Google Earth to benefit a business Explains modifying general options, managing the layer and placemark systems, and tackling some of the more technical aspects, such as interfacing with GPS There are more than 400,000 registered users of Google Earth and the number is still growing

Using Google Earth in Libraries: A Practical Guide for Librarians is for public, school, academic, and special libraries serving from the elementary level through adult levels. Although

articles have been written about specific subjects and specific library projects, this is the first published that offer a one-stop-shop for utilizing this online product for library-related purposes. Librarians reading this book will gain the Google Earth skills required to be able to not only use it themselves, but also teach others in how to use this online technology.
