NCCN  
Guidelines for  
Patients®  
Lung Cancer -  
Early and  
Locally  
Advanced  
Springer  
Renal Cancer:  
Contemporary  
Management  
provides a  
state of the  
art overview  
of the major  
topics in the  
field of kidney  
cancer. The  
material has  
been collected  
from the most  
current  
evidence  
based  
resources to  
allow for the

appropriate  
care of these  
patients. The  
sections of the  
book have  
been  
structured to  
give an  
overview of  
the major  
issues dealing  
with renal cell  
carcinoma and  
transitional  
cell carcinoma  
of the kidney.  
The text also  
reviews the  
new staging  
system,  
discusses  
familial  
syndromes of  
renal cell  
carcinoma,  
and provides  
new  
perspectives  
with regard to  
imaging and  
managing  
renal tumors.

A valuable  
resource for  
physicians  
and  
researchers  
dealing with  
renal cancer,  
Renal Cancer:  
Contemporary  
Management  
provides a  
comprehensiv  
e summary of  
the field that  
will guide  
patient  
management  
and stimulate  
further clinical  
and basic  
science  
research  
efforts.  
*Nephron-  
Sparing  
Surgery*  
Springer  
This textbook  
encompasses  
all clinically  
relevant  
aspects of

kidney cancer and is designed to be user-friendly to meet the needs of the busy practitioner. Practice oriented, with brief summary points, patient case studies, high quality images and more.

**NCCN Guidelines for Patients® Bladder Cancer** CRC Press  
[OFFICIAL CURRENT VERSION]  
From the National Comprehensive Cancer Network

(NCCN) comes this essential guide to Gallbladder and Bile Duct Cancers. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Gallbladder and bile duct cancer basics, Testing for

gallbladder and bile duct cancers, Gallbladder and bile duct cancer staging, Treating gallbladder and bile duct cancers, Gallbladder cancer, Intrahepatic bile duct cancer, Extrahepatic bile duct cancer, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers, Index.

**Metastatic  
Non-Small  
Cell Lung  
Cancer**

Springer

This handbook summarizes the data and techniques for hypofractionated and stereotactic radiation in a clinically-accessible way.

Hypofractionated radiation therapy, which consists of larger-dose radiation treatments that are given over a shorter time period compared to conventional radiation fraction sizes, is used to treat a variety

of cancers, including prostate, breast, lung, and colorectal. Conventional radiation therapy and hypofractionated radiation therapy have different effectiveness rates for cancer treatment and have different impacts on normal tissues in terms of causing toxicity. There is a significant and growing body of literature on the use of different dosing regimens to treat a variety of cancers and

radiation oncologists need to keep up with the various dosing schedules, the effect of each regimen on cancer control in different cancers, and how the different schedules affect each organ in terms of toxicity. The book thus provides concise information ranging from commonly-used dose-fractionation schemes for hypofractionated and stereotactic body radiotherapy to simulation

and treatment specifications to published safety and efficacy data. Chapters additionally examine the biological rationales for the efficacy of hypofractionated radiation; present clinical studies that demonstrate the efficacy and safety of hypofractionated radiation treatment in a variety of cancers; and describe the advances in technology that have allowed hypofractionated radiation to be safely

given. This is an ideal guide for radiation oncology clinicians and trainees.

Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Prostate cancer basics, Tests for prostate cancer, Clinical characteristics of risk, Assessing your

risk, Prostate cancer treatments, Initial treatment for your risk group, PSA persistence and recurrence, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers, Index. [NCCN Guidelines for Patients®](#) [Colon Cancer](#) Springer [OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network

(NCCN) comes this essential guide to Prostate Cancer: Early Stage. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Prostate cancer basics, Prostate cancer tests, Clinical

<p>characteristics of risk, Risk assessment, Prostate cancer treatment, Initial treatment by risk group, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers, Index . Let this authoritative handbook be your guide! <i>Chemotherapy and Immunotherapy in Urologic Oncology</i> Springer Science &amp; Business Media Kidney Cancer:</p>	<p>Principles and Practice is a comprehensive and interdisciplinary textbook that encompasses all clinically relevant aspects of the disease. This new edition has been extensively updated and includes brand new material covering the most recent developments in kidney cancer diagnosis and therapy. The user-friendly and clinically oriented content of the book guarantees that it will be</p>	<p>of great interest to a wide range of medical professionals, and every effort has been made to ensure that contributions are both easy to understand and directly related to patient care. Content presentation departs from the usual dense chapter format featuring a lengthy series of paragraphs. Instead, each chapter contains several boxed sections, including one that summarizes</p>
--	--	--

essential "take home points" for the busy clinician and another that presents a patient-oriented case highlighting the clinical application of elements discussed in that chapter. In addition, accessible original images, illustrations, and diagrams (some in full color) are used to simplify particularly complex material. This book will be of value for clinicians, researchers, residents,

fellows, students, and knowledgeable lay people. The contributors comprise an international group of authors with expertise in kidney cancer epidemiology, molecular biology, pathology, diagnosis, clinical features, staging, prognostic and predictive factors, surgery, systemic therapy, and emerging investigational approaches, among others. *Kidney Cancer*

of cancer treatments: Describes the treatments used to cure and control colon cancer Part 4 - Treatment guide, nonmetastatic cancer: Presents treatment options for colon cancer that hasn't spread to the liver, lungs, or other distant sites Part 5 - Treatment guide, metastatic cancer: Presents treatment options for colon cancer that has spread to the liver or

<p>lungsPart 6 - Treatment guide, chemotherapy : Presents the order of drug options for advanced diseasePart 8 -- Making treatment decisions: Offers tips for choosing the best treatmentA complete glossary with dictionary and acronyms completes this book. <u>NCCN</u> <u>Guidelines for</u> <u>Patients®</u> Considered one of the most devastating and frightening of all cancers,</p>	<p>cancers of the central nervous system (CNS) attack the complex organs that control not only the CNS but also the peripheral nervous system and many of the voluntary and involuntary body systems, with 20% to 40% of CNS cancers metastasizing to the brain. Site-Specific Cancer Series: Central Nervous System Cancers, a new volume in the Series edited by Deborah</p>	<p>Hutchinson Allen and Laurie L. Rice, details the cancers of the brain and spinal cord. Chapters examine issues such as anatomy and physiology of the brain and spine, patient assessment, pathology, histology, and molecular markers of primary brain tumors, and adult and pediatric cancers of the brain and spinal cord. Other issues include treatment modalities (surgical treatments,</p>
--	--	---

chemotherapy, and radiotherapy), as well as pediatric therapeutic modalities, symptom management and psychological issues, and the current state of evidence-based practice. You can use this new volume as a guide to treating your patients and to providing sensitive and realistic care that optimizes the quality of life and permits a sense of hopefulness to prevail when

many patients with type of cancer feel only pain and fear.

**NCCN Guidelines for Patients® Small Cell Lung Cancer**

[OFFICIAL CURRENT VERSION]  
From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Metastatic Non-Small Cell Lung Cancer. Based on clinical treatment guidelines used by doctors and oncology

professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Lung cancer basics, Tests for metastatic NSCLC, Treatment of driver mutations, Treatment based on low and high PD-L1, Treatment based on cell type, Making treatment decisions, Words to know, NCCN

Contributors, NCCN Cancer Centers, Index [PET/CT in Head and Neck Cancer](#) [OFFICIAL CURRENT VERSION] From the medical leaders of 27 of the world's most renowned cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to Brain Cancer- Gliomas. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about Brain Cancer- Gliomas. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions.
