The Seven Principles for Making Marriage Work Simon and Schuster

Ethical concerns are among the most common problems public administrators face, yet the issues are often complex, and the correct choices are not always clear. Living up to the public trust is much more than just an act of compliance. It also involves perceiving, preventing, avoiding, and resolving

accusations of illegal or unethical behavior, including appearances of inappropriate behavior. *Ethics Moments in Government: Cases and Controversies* examines how to identify, assess, and resolve the ethical issues and dilemmas that often confront those who govern the cities, counties, states, and federal agencies throughout America. *Real Situations, Real Advice* Providing a one-stop resource for all those who must contend with thorny ethical issues, this volume presents case studies that vary in complexity and context and are based on real situations. Each case scenario is followed by discussion questions and case assessments by expert practitioners who describe how they would handle the situation. Using a "total immersion" technique, the book encourages readers to be reflexive and analytical in addressing the problems presented and arriving at appropriate solutions. A supplemental CD is included which contains PowerPoint® slide presentations, articles, workshop programs, tests, and links to organizations. For many of the scenarios presented in this volume, there are no easy answers. Practical guidance on reasoning through difficult decision-making situations enables public administrators to acquire the ethical knowledge, skills, abilities, and instincts that will ultimately help them gain the trust of their citizens and advance in their careers.

The United Nations is a vital part of the international order. Yet this book argues that the greatest contribution of the UN is not what it has achieved (improvements in health and economic development, for example) or avoided (global war, say, or the use of weapons of mass destruction). It is, instead, the process through which the UN has transformed the structure of international law to expand the range and depth of subjects covered by treaties. This handbook offers the first sustained analysis of the UN as a forum in which and an institution through which treaties are negotiated and implemented. Chapters are written by authors from different fields, including academics and practitioners; lawyers and specialists from other social sciences (international relations, history, and science); professionals with an established reputation in the field; younger researchers and diplomats involved in the negotiation of multilateral treaties; and scholars with a broader view on the issues involved. The volume thus provides unique insights into UN treaty-making. Through the thematic and technical parts, it also offers a lens through which to view challenges lying ahead and the possibilities and limitations of this understudied aspect of international law and relations.

In the present book, *How to Win Friends and Influence People*, Dale Carnegie says, “You can make someone want to do what you want them to do by seeing the situation from the other person’s point of view and arousing in the other person an eager want.” You learn how to make people like you, win people over to your way of thinking, and change people without causing offense or arousing resentment. For instance, “let the other person feel that the idea is his or hers” and “talk about your own mistakes before criticizing the other person.” This book is all about building relationships. With good relationships, personal and business successes are easy and swift to achieve. *Twelve Ways to Win People to Your Way of Thinking* 1. The only way to get the best of an argument is to avoid it. 2. Show respect for the other person's opinions. Never say "You're wrong." 3. If you're wrong, admit it quickly and emphatically. 4. Begin in a friendly way. 5. Start with questions to which the other person will answer yes. 6. Let the other person do a great deal of the talking. 7. Let the other person feel the idea is his or hers. 8. Try honestly to see things from the other person's point of view. 9. Be sympathetic with the other person's ideas and desires. 10. Appeal to the nobler motives. 11. Dramatize your ideas. 12. Throw down a challenge.

Bonnie Steinbock presents *The Oxford Handbook of Bioethics* - an authoritative, state-of-the-art guide to current issues in bioethics. Thirty-four contributors reflect the interdisciplinarity that is characteristic of bioethics, and its increasingly international character. Thirty topics are covered in original essays written by some of the world's leading figures in the field, as well as by some newer 'up-and-comers'. The essays address both perennial issues, such as the methodology of bioethics, autonomy, justice, death, and moral status, and newer issues, such as biobanking, stem cell research, cloning, pharmacogenomics, and bioterrorism. Other topics concern mental illness and moral agency, the rule of double effect, justice and the elderly, the definition of death, organ transplantation, feminist approaches to commodification of the body, life extension, advance directives, physician-assisted death, abortion, genetic research, population screening, enhancement, research ethics, and the implications of public and global health for bioethics. Anyone who wants to know how the central debates in bioethics have developed in recent years, and where the debates are going, will want to consult this book.
