Living with Genuine

Tawhid brings us to the heart of islam, the living art of surrendering to the will of God. Familiar terms and concepts are revealed

in a new light and take on deeper relevance in our lives. This book will show how the different parts of the Quranic message fit together. Yamina reawakens the meaning of utterances so familiar they often bypass our hearts even as they roll fluidly off our tongues. La ilaha illallah. There is no god but God. What does it mean? Why is it repeated

so often in the Quran and in worship? Yamina returns us to these basics, and stays there, allowing their profound implications to seep in. At a time when religion is often rendered -and even propagated- as ideology, as a fundamentally historical and political phenomenon, or merely as a source of social identity, Yamina's work

reminds us that islam is, in truth, a refreshing and healing way of being in this world, and beyond-a way of being from which we have much to learn, for which we have much to hope.

In 21st century America, personhood is under daily assault, sometimes with dire consequences.

Scientist, ethicist, and ordained minister Craig C. Malbon encourages the reader to consider such

assaults on personhood endured by victims of abortion, ageism, Alzheimer’s disease, drug addiction, mental and physical disabilities, gender, gender orientation, racism, sexual preference, identity politics, and our will-to-power over the “other.” In exploring personhood status, Malbon poses difficult questions for us. Is personhood assigned as all-or-nothing, or is it a sliding scale based upon criteria arbitrarily aimed at our vulnerabilities? Does the voiceless

embryo and fetus have advocates who can speak to the moral question of abortion? Is the personhood of an economically insecure pregnant woman degraded to the point where lack of access to early termination of pregnancy results in “coercive childbearing?” Does being a member of the LGBTQI+ community target one for assaults on personhood, to the extreme of being killed? In delving into the biology and psychology of assaults of “self” upon the

“other,” Malbon sees powerful linkages of everyday assaults on personhood to darker, profound “original sins” that are foundational to the rise of the American empire, i.e., assaults on the indigenous Native Americans and assaults derivative to the institution of slavery upon Africans, African Americans, and their descendants.

“This is an especially timely publication, given the current

metamorphosis of politics in the Middle East and North Africa. ...zlem Sandökcö and Gillian Rice are to be congratulated for having sensed the need for a Handbook that will alert marketers to the vast market opportunities offered by Muslim consumers. It is essential to become attuned to the values and principles of Islamic cultures that will drive consumption, product and service choices, brand preference, and brand loyalty in coming years. The scholars who have

contributed to this Handbook come from many different backgrounds to offer a kaleidoscope of research and recommendations on how best to serve this previously overlooked segment of consumers who make up a quarter of world markets. Ö Đ Lyn S. Amine, Saint Louis University, US “This ambitious and timely collection will be enormously valuable to readers in the practice and study of the growing field of Muslim marketing and branding. Essays

range expertly across key sectors (notably finance, food, and fashion) and territories (of Muslim majority and minority population). Contributors elaborate the diversity of Muslim experiences, beliefs, and practices that must be taken into account by marketing professionals seeking to exploit this newly recognized market. Academic authors provide helpful postscripts for marketers, making clear the links between their nuanced historicized understanding of

contemporary transnational, global, and local forms of Muslim identity and practice. This book provides an essential guide to those who study and those who participate in Muslim branding and marketing. Õ

 Collected in this volume are Ismail al-Faruqi's articles written over a span of two decades, which deal directly with Islam and other faiths, and Christianity and Judaism in particular. The book provides a good cross-section of al-Faruqi's contribution to the study of comparative religion and covers a wide spectrum of inter-religious issues including commonality and differences between Islam, Christianity and

Judaism, Muslim-non-Muslim relations, and the issue of Mission and Da'wah. It is a fascinating study by an engaging and challenging scholar and activist of our time.

Meta-Science of Tawhid
 IslamKotob

This book gives a clear explanation of the Muslim sound Creed which is the core of the religion of Islam, as the belief in Tawhid (monotheism) is the purpose for which Allah created both mankind and jinn, and thus, those whose belief in Tawhid is corrupt, are

not considered Muslims. It is a commentary on the Book of Tawhid written by Sheikh Muhammad Ibn Abdul Wahhab. In this book, Dr. Salih al Fawzan has projected light on doctrinal issues of utmost importance in a genuine and reader-friendly style. This translated version of the book fulfills a long-standing need on the part of English-speaking Muslims for a brief, introductory book in Tawhid. It is a valuable book for novice readers, be they Muslims or non-Muslims, who do not have

thorough knowledge of the sound creed, The chapters of this book focus on major issues in Tawhid such as the definition of Tawhid, virtue of Tawhid, warning against acts of shirk (polytheism), the Prophet's Maintenance of monotheism, and other topics. Dr. Salih al Fawzan (born in 1935) has obtained a PhD in Islamic jurisprudence and has a high profile in teaching jurisprudence. He is a member of many academic institutions including the Board of

Senior Ulema, the Permanent Committee for Fatwa and Research. He has written more than sixty published works covering Muslim Creed, Islamic jurisprudence and Muslim's conduct.

Probably this is the most read book of today on Islamic belief regarding monotheism. It is a book authored on clarifying the reality of Monotheism and the different types of polytheistic beliefs and practices, the author suffices himself to

mentioning the relevant Ayaat, Ahaadeeth and statements of the Salaf under each chapter and then mentions the benefits derived from them. The purpose of this course is to explain this famous book in an easy and simple way so that Muslims from every walk of life can understand the correct Islamic 'Aqeedah, and can save themselves, their family and friends from the Fire of Hell.

 Standing on an Isthmus explores the role of religion, particularly Islam, in the Israeli-Palestinian conflict as a factor both motivating the

conflict and as a potential resource for its resolution. It examines how religious beliefs, commitments, and traditions shape and influence concrete social action such as promoting either violent or peaceful behavior and focuses on the legitimation process of religious narratives. More specifically it looks at different Islamic interpretations of war and peace within the Islamic tradition and investigates why an extremist interpretation is becoming more accepted among Palestinians as a response

to the conflict. Standing on an Isthmus has become particularly important in the post-September 11 era, when the relationship between violence and religion in general, and Islam in particular, became a central concern for scholars and politicians. Other horrific acts, such as the 2002 Bali bombings, and 2004 Beslan School Siege have also significantly contributed to the image of Islam as a violent religion. Standing on an Isthmus examines the

internal dialogue that rages among Islamic scholars for the "correct" interpretation of Islam, sheds light on why Islamic extremism has come to be accepted as a strategic tool among some Islamic groups, and investigates the role of social institutions and civil society networks, utilized by different groups, in the process of legitimizing their interpretation. Consequently, it addresses a series of new topics for conflict resolution studies, including religious and

pragmatic motivations of behavior; struggle between moral values, multi-faith dialogue, and pluralism as conflict resolution strategies; and the socio-political impact of leadership, legitimation, and the role of interpretation of sacred texts during conflicts, among others. Moreover it seeks to answer the questions: how can we utilize religion, in this case Islam, as a resource for peacemaking, and what is the best strategy to empower those groups and indi

The Qur'an and the Sunnah Hamilton Books

In a multi-faith world, Islam is widely regarded as dogmatic and exclusivist. Yet in the Qur'an we have a great and worthy example of how to live in diversity, of powerful scriptural tenets that lend themselves precisely to engagement with those of other faiths. As such Islam has much to add to the debate on Religious Pluralism. For Muslims the issue is a delicate one. Aside from being tolerant and respectful of other faiths, advocating freedom of faith, and peaceful

coexistence for all humanity, Muslims have to intellectually engage on matters of religious truth whilst defending the validity of their own Islamic tenets. This study is focused on the Qur'anic text. It explores the Qur'anic conception of normative religious pluralism with a view to providing answers to questions such as whether the Qur'an itself regards normative religious pluralism as a value system or simply a method through which the Qur'anic world view can

be actualized. In doing so the author corrects some highly controversial misquoted, mistranslated, and/or quoted out of context verses of the Qur'an, including the so-called verse of the sword and the perception of not taking non-Muslims as friends. In reality, the Qur'an calls for freedom of faith and peaceful coexistence, but condemns oppression, religious persecution, and those who initiate hostilities. In this way it not only invokes human dignity, but restores it

when it is violated.

ISIS's astonishing and unexpected military victories in 2014 and 2015 redrew the geopolitical map of the Middle East. Media attention focused on the organisation's savage treatment of its enemies and its ability to attract foreign fighters, but as this dispassionate book demonstrates it also made important innovations in strategy, ideology and governance. Ahmed S. Hashim argues that by focusing their ideology first and foremost on extreme anti-

Shia sectarianism — rather than on Western ‘infidels’ — ISIS’ founders were able to present themselves as the saviours of what they saw as the embattled Sunni ‘nation’ in Iraq. This enabled them to win the support of Sunni communities. Moreover, ISIS’ stunning ability to take major cities was a result of its innovative tactics. It sowed terror in advance of its attacks by using targeted assassinations to kill key city leaders, and its decentralised regional

command structure facilitated an unusual degree of coordination between small assault units. At the same time the organisation made a serious effort to engage in state-building and population control. By going beyond the often starkly unpleasant current affairs of the Islamic State, The Caliphate at War undertakes an essential investigation into the successes of the group, to better understand how the movement has survived, thrived, and reshaped the

The Book of Divine Unity Routledge

If the concept of tawhid is central to Islam and everything Islamic, it is because of its centrality to existence and everything that exists. Indeed, Islamic science, whether religious, moral or natural is essentially a quest to discover the order underlying the variegated world of

multiplicity. The work of al shahid, Dr. Ismail Raji al-Faruqi on the subject of tawhid affords the reader not only a look on the axial doctrine of Islam, but also allows the reader to understand that doctrine from a number of different perspectives. In the endeavor to explain the simple truths of the doctrine of unity, Dr. al-Faruqi touches upon a broad spectrum of subjects, drawing elements from history, comparative religion, anthropology, philosophy, ethics, epistemology,

archaeology, and other disciplines. As such, his concept of tawhid is rich in the depth of its erudition, abundant in its perception, and direct in its implications for life and thought. Indeed, it is perhaps this work more than any other that reflects the profound and original thought of Dr. al-Faruqi.

A Concise Commentary On The Book of

Tawheed International Institute of Islamic Thought (IIIT)

For too long now, the Qur'an and the Sunnah,

great sources of strength, purity, knowledge and inspiration for the Ummah, have not been adequately tapped. Skirting their peripheries or over-dwelling on one or two of their multifarious facets and tributaries has done a disservice to the immense potential of the fountainhead, while denying the Ummah—indeed the whole world—innumerable benefits from them. Now that the Ummah is becoming increasingly aware of its own problems as well as latent powers, and yearns

to revive its leading role in the forging of history and civilization, the issue of drawing on the wellspring becomes more relevant and urgent. Revisiting these two sources is no longer a scholastic, academic, nostalgic, or escapist indulgence, but a great journey of discovery that promises untold rewards. Paradoxically, the journey through the resplendent pages of the Qur'an and the Sunnah to a time and place in the past should yield a more mature awareness of the dynamics of social and

historical change and a human being's role on earth, honing and sharpening the Muslims' capacity to deal with the demands of the present moment and the challenges of the future. Suggestions for a new reading of the Qur'an and the Sunnah have been put forward from Islamic and other angles in the recent years. In this book Dr. Al-Alwani and Dr. Khalil, two well-known Muslim thinkers, contribute their views for a proper approach to these sources from within the Islamic

framework.

Psychology is the study of mind, and this is exactly why the Quran put a great emphasis between the relationship of man and his Creator and the role faith plays intellectually and spiritually in our lives. The Quran is a book of wisdom, and it includes all aspects of human life. Religion, as a matter of fact, is an intellectual property that cannot be seen. So the mind cannot be seen. Human beings are curious creatures. This curiosity elaborated in the story of Abraham when he

wanted to find the truth for himself. Finding the truth is a principle of science and research. Islamic psychology is based on three principles, namely theo-ethics, socio-ethics, and psyco-ethics, which discusses human relations from a psychological point of view. It is the mind that relates to all aspects of life. Therefore, Islamic psychology deals with all spheres that originate from God alone. For that, ego or self plays a major role and makes mankind responsible for all his

actions. Since Islam is a religion of unity, then all processes of mind interrelate to not only self but also to God and society. Therefore, like any other field of knowledge, it is hard to

separate psychology or the study of mind from other life principles. As a matter of fact, it is the mind that regulates other affairs, being good or bad. Islamic psychology emphasizes on making humans responsible for

their inner soul activities, which lead either to felicity or destruction. Since religion is an intellectual property, then the study of mind is also a spiritual and intellectually property.
