Written for the true beginner, the updated and revised second edition of *A Systematic Approach to Strabismus* examines the basic types of strabismus, ocular motility, ocular examination of pediatric patients, and extraocular muscle anatomy and functions. Unique features inside the Second Edition:

- Uses practical and easy-to-follow "how to" instructions to offer fundamental education on the four parts of an eye exam: history, vision, sensory testing, and motor testing.
- Includes necessary information to successfully complete pediatric and strabismus eye exams.
- Highlights the order of testing in an effort to gather the most important information prior to a pediatric meltdown and to avoid "exam pollution."

Having worked in both private practice and university settings, Virginia Karlsson brings over 30 years of experience with pediatric ophthalmology

and adult strabismus to the pages of A Systematic Approach to Strabismus, Second Edition. Ophthalmic technologists, technicians, assistants, residents, and students will welcome this unique book into their education and career.

Systematic Approach

Orell & Sterrett's Fine Needle Aspiration Cytology 5e provides you with a logical and systematic approach to the acquisition, interpretation and diagnosis of FNA biopsy samples. It is an ideal resource

for all those requiring an authoritative and systematic review of the cytological findings in those malignant and benign lesions likely to be the target of FNA. The book is lavishly illustrated with high quality colour images that demonstrate the cytological features as well as their relevant immunohistochemical and molecular findings. Organized into anatomical regions, each chapter is consistently organized into two parts: the first deals with clinical and technical aspects followed by a systematic presentation of cytological findings. This is your perfect practical bench resource for

daily reference in the laboratory. Provides practical tips and advice on how to avoid pitfalls and ensure accurate diagnoses. Over 1,200 colour illustrations capture each entity's cellular, morphological and immunohistochemical appearance. Chapters have been up-dated and revised and a brand new one on cytological findings in infectious diseases added. Both MGG and Pap smears illustrated in parallel as well as the corresponding histology to help provide side-by-side analysis. Access the full text online and download images via Expert Consult.
