This volume investigates flows of knowledge that transcended social, cultural, linguistic and political boundaries. Dealing with different sources such as dictionaries, early printed books, political advice literature, and modern periodicals, the case studies in this anthology cover a time frame from the 15th to the early 20th century. Being concerned with a wide variety of geographical areas, including the Ottoman capital Istanbul, provincial settings like Ottoman Palestine, and also Egypt, Bosnia, Crimea, the Persian realm and Poland-Lithuania, the book gives

transepochal and transregional insights in the production, transmission, and translation of knowledge. In so doing it contributes to current debates in transcultural studies, global history, and the history of knowledge.

 In this book, X-Pert Corner columnist and workshop mentor Rico Pfirstinger teaches you all about the capabilities of the Fujifilm X series lineup of cameras, which

he's discovered through years of in-depth research, experience, and experimentation. No matter which X series camera you own—whether it be the X-T3, X-H1, X-T2, X-Pro2, X100F, X-T20, X-E3, GFX, or any other Fuji X series camera—Rico cuts to the chase and provides a plethora of tips and practical instructions not found in user manuals or anywhere else. With this knowledge, you will be able to take full advantage of your X series camera.

The Fujifilm X series boasts amazing features, but some users may require an adjustment period if they are new to these cameras—even photographers who have been lifetime DSLR shooters. This guide will help you to quickly feel comfortable using your camera so that you can achieve excellent results.

Rico reveals many hidden features, functions, and procedures, so photographers of every level—beginners, enthusiasts, and experienced pros—will learn new and better ways to use their Fuji X series camera to its full potential. Beyond beneficial practices for all X series shooters, Rico also covers advanced concepts, such as the capabilities of Fujifilm's ISOless sensors with Dual Conversion Gain, and offers solutions for common issues, such as inaccurate focus or RAW conversion artifacts.

Topics covered include:

- Firmware upgrades, lens issues, OIS and IBIS
- Menus shortcuts, Custom Settings, My Menu, Quick Menu, and Fn buttons
- Mirrorless exposure metering
- Maximizing dynamic range
- ISOless photography
- Autofocus settings, challenges, and strategies
- Film simulations, white balance, and JPEG settings
- RAW conversion (internal and external)
- Flash photography
- And much more...

With only a few matches left to be fought in the preliminaries to the third portion of the Journeyman Ninja Selection Exams, the highly anticipated bout between mysterious Sand ninja Gaara and intense, earnest Konoha ninja Rock Lee begins. Will Gaara's bloodlust and his strange powers of sand manipulation be too much for Lee to handle? Or could Lee prove that dedication and an amazing work ethic are enough to make him a splendid ninja? -- VIZ Media

"Doug Coombs had a huge impact on my life; much of my overall approach to mountains comes from his example. I am so grateful that, thanks to author Rob Cocuzzo, I now have the complete story of what influenced one of my biggest heroes." - Jeremy Jones, snowboarding legend "In the 1980s, I was lucky enough to be part of the Bozeman gang of ex-ski racers in one of the crucibles of the American steep skiing scene. Robert Cocuzzo accurately captures the amazing Doug and Emily Coombs that I knew then and the myriad of Coombs ski stories." - Bruce Tremper, avalanche expert and author of *Staying Alive in Avalanche Terrain* "Doug Coombs was an inspiration to me and so many others on and off the mountain. Now, here is an insightful look at the life of a legend." Jimmy Chin, climber-photographer • A thrilling biography of renowned extreme skiing pioneer Doug Coombs Arguably the

greatest extreme skier to ever live, Doug Coombs pioneered hundreds of first descents down the biggest, steepest, most dangerous mountains in the world—from the Grand Teton "Otter Body" in Jackson Hole, to Mount Vinson, the highest point in Antarctica, to far-flung drops such as Wyatt Peak in Kyrgyzstan. He graced magazine covers, wowed moviegoers, became the face of top ski companies, and ascended as the king of big mountain extreme skiing.

This series presents substantial results from around the globe in selected areas of educational research. The field of education is consistently on the top of priority lists of every country in the world, yet few educators are aware of the progress elsewhere. Many techniques, programs and methods are directly applicable across borders. This series attempts to shed light on successes wherever they may occur in the hope that many wheels need not be reinvented again and again.

[Siren Classic ManLove: Erotic Alternative Interracial Consensual BDSM Romance, M/M, bondage, sex toys, HEA] Welcome to Cedar Falls, a small North Carolina town nestled among the Smokey Mountains, where the people are friendly and the men are hot. Macon Roxley feared his scars would forever mark him as a risk not worth taking. Tyge Drost used to believe he had all the answers, until he lost someone under his care. Misunderstandings and past wounds have driven this pair apart despite their undeniable attraction. Can either of them find a way to give love a chance, or will they give up on a future of promised happiness to protect their damaged hearts? Warning: In typical Cedar Falls fashion, the citizens gather together to interfere through means of kidnapping, handcuffing, and general

mischief in order to force Macon and Tyge to see what was right in front of them-- love. Enjoy, but you have been warned. **

Tombs and burial customs are an exquisite source for social history, as their commemorative character determines them to express much of the contemporaneous ideology of a society. This book presents, for the first time, a holistic view of the funerary culture of Rome and its surroundings during the third century AD. Barbara Borg argues that during this time there was, in many ways, a return to practices known from the Late Republic and early imperial period, with spectacular monuments for the rich, and a large-scale reappearance of collective burial spaces. Through a study of terraced tombs, elite monuments, the catacomb nuclei, sarcophagi, and painted imagedecoration, this volume explores how the third century was an exciting period of experimentation and creativity. *Crisis and Ambition* Rocky Nook, Inc.

This book presents the best articles and columns published in Java Report between 1997 and 1999. Each article is independent of any specific version of Java and relies mainly on those classes that are now part of the standard Java class library and APIs. Also, each article and column discusses Java topics and implementations that are not readily available in a single book. The book serves as an excellent reference to anyone involved with Java. The reader can learn more about the language, perform analysis, design and modeling, work on specific implementations, check performance, and perform testing. This book presents the good ideas of people who have used Java for "Real" applications.

Lecturers - request an e-inspection copy of this text or contact your local SAGE representative to discuss your course needs. Watch Andy Field's introductory video to *Discovering Statistics Using R* Keeping the uniquely humorous and self-deprecating style that has made students across the world fall in love with Andy Field's books, *Discovering Statistics Using R* takes students on a journey of statistical discovery using R, a free, flexible and dynamically changing software tool for data analysis that is becoming increasingly popular across the social and behavioural sciences throughout the world. The journey begins by explaining basic statistical and research concepts before a guided tour of the R software environment. Next you discover the importance of exploring and graphing data, before moving onto statistical tests that are the foundations of the rest of the book (for example correlation and regression). You will then stride confidently into intermediate level analyses such as ANOVA, before ending your journey with advanced techniques such as MANOVA and multilevel models. Although there is enough theory to help you gain the necessary conceptual understanding of what you're doing, the

emphasis is on applying what you learn to playful and real-world examples that should make the experience more fun than you might expect. Like its sister textbooks, *Discovering Statistics Using R* is written in an irreverent style and follows the same ground-breaking structure and pedagogical approach. The core material is augmented by a cast of characters to help the reader on their way, together with hundreds of examples, self-assessment tests to consolidate knowledge, and additional website material for those wanting to learn more. Given this book's accessibility, fun spirit, and use of bizarre real-world research it should be essential for anyone wanting to learn about statistics using the freely-available R software.
