 'With this important collection, Hardy Hanappi and Wolfram Elsner, have brought together an outstanding volume that is likely to have its impact on the development of evolutionary economics. Expansive in its scope, the innovative contributions range from evolutionary and institutional mechanisms, dynamic market complexity as well as ontological groundwork of the rapidly emerging new evolutionary economics science. The book will be of great interest to academics, students and researchers of evolutionary and institutional economics.' - Kurt Dopfer, University of St Gallen, Switzerland

 Called "spellbinding" (Scientific American) and "thrilling...a future classic of popular science" (PW), the up close, inside story of the greatest space exploration project of our time, New Horizons' mission to Pluto, as shared with David Grinspoon by mission leader Alan Stern and other key players. On July 14, 2015, something amazing happened. More than 3 billion miles from Earth, a small NASA spacecraft called New Horizons screamed past Pluto at more than 32,000 miles per hour, focusing its instruments on the long mysterious icy worlds of the Pluto system, and then, just as quickly, continued on its journey out into the beyond. Nothing like this has occurred in a generation—a raw exploration of new worlds unparalleled since NASA's Voyager missions to Uranus and Neptune—and nothing quite like it is planned to happen ever again. The photos that New Horizons sent back to Earth graced the front pages of newspapers on all 7 continents, and NASA's website for the mission received more than 2 billion hits in the days surrounding the flyby. At a time when so many think that our most historic achievements are in the past, the most distant planetary exploration ever attempted not only succeeded in 2015 but made history and captured the world's imagination. How did this happen? Chasing New Horizons is the story of the men and women behind this amazing mission: of their decades-long commitment and persistence; of the political fights within and outside of NASA; of the sheer human ingenuity it took to design, build, and fly the mission; and of the plans for New Horizons' next encounter, 1 billion miles past Pluto in 2019. Told from the insider's perspective of mission leader Dr. Alan Stern and others on New Horizons, and including two stunning 16-page full-color inserts of images, Chasing New Horizons is a riveting account of scientific discovery, and of how much we humans can achieve when people focused on a dream work together toward their incredible goal.

*Exploring America in the 1990s: New Horizons* is an interdisciplinary humanities unit that looks at literature, art, and music of the 1990s to provide an understanding of how those living through the decade experienced and felt about the world around them. Through the lens of "identity," it explores life in America and the myriad groups that coexisted in harmony and, often, with friction. Cultural movements like grunge and Generation X will be examined alongside larger issues such as rising racial tensions following the O.J. Simpson trial and Rodney King riots, the conflict between progress and morality as scientific advances in cloning and the Internet changed the U.S., and the growing debate over previously marginalized identities and gay rights following "Don't Ask, Don't Tell" and DOMA. The unit uses field-tested instructional strategies for language arts and social studies from The College of William and Mary, as well as new strategies, and it includes graphic organizers and other tools for analyzing primary sources. This book tells the story of how the convergence between corporate sustainability and sustainable investing is now becoming a major force driving systemic market changes. The idea and practice of corporate sustainability is no longer a niche movement. Investors are increasingly paying attention to sustainability factors in their analysis and decision-making, thus reinforcing market transformation. In this book, high-level practitioners and academic thought leaders, including contributions from John Ruggie, Fiona Reynolds, Johan Rockström, and Paul Polman, explain the forces behind these developments. The contributors highlight (a) that systemic market change is influenced by various contextual factors that impact how sustainable investing is perceived and practiced; (b) that the integration of ESG factors in investment decisions is impacting markets on a large scale and hence changes practices of major market players (e.g. pension funds); and (c) that technology and the increasing datafication of sustainability act as further accelerators of such change. The book goes beyond standard economic theory approaches to sustainable investing and emphasizes that capitalism founded on more real-world (complex) economics and cooperation can strengthen ESG integration. Aimed at both investment professionals and academics, this book gives the reader access to more practitioner-relevant information and it also discusses implementation issues. The reader will gain insights into how "mainstream" financial actors relate to sustainable investing.

In this beautifully-argued book, Karen Cristensen and Ingrid Guldvik provide a comparatively-based insight to the historical context for public care work and show how migration policies, general welfare and long-term care policies (including the cash-for-care schemes) as well as cultural differences in values in the UK and Norway set the context for how migrant care workers can realise their individual life projects. Through viewing migrants as individuals who actively construct their lives within the options and conditions they are given at any time, they bring to the discussion an awareness of what might be called 'a new type of migrant' one who is neither a victim of the divide between the global north and the global south, nor someone leaving family behind, but individuals using care work as a part of their own life project of potential self-improvement.

Edited by Neera Chandhoke and Praveen Priyadarshi, *Contemporary India* addresses issues facing the nation-state and civil society from diverse perspectives: those of political science, sociology, economics and history. The book is thematically divided into three parts Economy, Society, and Politics and includes discussions on topics as wide-ranging as poverty, regional disparities, policies, social change and social movements, the elements of democracy, dynamics of the party system, secularism, federalism, decentralization, and so on. The rise of the institutionalist and evolutionary approaches in economics has posed a serious intellectual challenge to the dominant neo-classical paradigm. This book draws together leading scholars in the fields of institutional and evolutionary economics who apply cutting-edge research to one of the most controversial issues of our day, namely, the role of the state.

**Migrant Care Workers** Routledge

*Philosophy and Public Administration* provides a systematic and comprehensive introduction to the philosophical foundations of the study and practice of public administration. *Architecture and Politics in Republican Rome* is the first book to explore the intersection between Roman Republican building practices and politics (c.509–44 BCE). At the start of the period, architectural commissions were carefully controlled by the political system; by the end, buildings were so widely exploited and so rhetorically powerful that Cassius Dio cited abuse of visual culture among the reasons that propelled Julius Caesar's colleagues to murder him in order to safeguard the Republic. In an engaging and wide-ranging text, Penelope J. E. Davies traces the journey between these two points, as politicians developed strategies to manoeuvre within the system's constraints. She also explores the urban development and image of Rome, setting out formal aspects of different types of architecture and technological advances such as the mastery of concrete. Elucidating a rich corpus of buildings that have been poorly understood, Davies demonstrates that Republican architecture was much more than a formal precursor to that of imperial Rome.

*New Horizons in Medical Anthropology* is a festschrift in honor of Charles Leslie whose influential career helped shape this subfield of anthropology. This collection of cutting-edge essays explores medical innovation and medical pluralism at the turn of the 21st century. The book accomplishes two things: it reflects recent research by medical anthropologists working in Asia who have been inspired by Charles Leslie's writing on such topics as medical pluralism and the early emergence of what has become a globalized biomedicine, the social relations of therapy management, and the relationship between the politics of the state and discourse about the health of populations, illness, and medicine. The book also takes up lesser known aspects of Leslie's work: his contribution as an editor and the role he played in carrying the field forward; his ethics as a medical anthropologist committed to humanism and sensitive to racism and eugenics; and the passion he inspired in his co-

workers and students. Charles Leslie is a remarkable and influential social scientist. *New Horizons in Medical Anthropology* is a fitting tribute to a sensitive scholar whose theories and codes of practice provide an essential guide to future generations of medical anthropologists.

*Public Administration: Concepts And Theories* Ashgate Publishing, Ltd.

Public policy can be considered a design science. It involves identifying relevant problems, selecting instruments to address the problem, developing institutions for managing the intervention, and creating means of assessing the design. Policy design has become an increasingly challenging task, given the emergence of numerous 'wicked' and complex problems. Much of policy design has adopted a technocratic and engineering approach, but there is an emerging literature that builds on a more collaborative and prospective approach to design. This book will discuss these issues in policy design and present alternative approaches to design.

**Changing Ideas and Practices in Governance** PHI Learning Pvt. Ltd.

This text brings together a number of specialists who examine the range of ideas and concepts of the new models of reform, paying particular attention to the "new public management" model and to strategies of good governance. It evaluates progress made by governments and aid donors in putting these ideas into practice. Using case studies from both the developed and developing world, it emphasizes the extent to which public management and governance reforms are being applied throughout the international arena. The examples used focus on the problems of policy and institutional transfers between the industrialized world and developing countries. Multidisciplinary in its approach, it draws on literature and research from management studies, political science, sociology, economics and development studies, and points to issues likely to dominate research agenda.

**Social Theory, Development Administration, and Development Ethics** Edward Elgar Publishing

The book is a welcome contribution to the literature on ethics as it provides a broader horizon of investigation than most familiar works in recent years. Jamil E. Jreisat, *International Journal of Public Administration* This book provides critical, up-to-date reviews on the field of ethics and integrity of governance, along with fresh future perspectives. Focusing on Europe and the US, it addresses the key dimensions of public service values, the integrity and rationality of governance, ethics management, and the ethics of governance politics. In each of these four areas, leading international scholars tackle the main issues and controversies facing the world today. The final chapter synthesizes these views and provides an ambitious and critical outline for future work in the field of ethics and integrity of governance. Emanating from the much heralded transatlantic dialogue, this study integrates both the European and American perspectives into a common voice for action. Ethics and Integrity of Governance will appeal to academics, researchers and practitioners in the areas of leadership and organisation, public policy and public administration, and public values and ethics.

**A Reader** Edward Elgar Publishing

This forward-thinking book examines the future of public policy as a discipline, both as it is taught and as it is practiced. Critically assessing the limits of current theories and approaches, leading scholars in the field highlight new models and perspectives.

**Indian Public Administration** Routledge

Contemporary policy making is deeply influenced by the borrowing, transfer and diffusion of ideas and models from other countries, levels of government and supranational institutions. This is the first book to analyze comparatively the micro-dynamics of transfer across regions, contrasting policy fields, multiple levels of governance, and institutional actors. Grounded in original research by specialists in the field, it provides fresh and arresting insights into competition among transfer agents, resistances, local coalitions, translation, and policy learning. This empirical depth informs a reinvigorated and nuanced theoretical framework on global policy transfer processes.

The *Public Administration Theory Primer* explores how the science and art of public administration is definable, describable, replicable, and cumulative. The authors survey a broad range of theories and analytical approaches—from public institutional theory to theories of governance—and consider which are the most promising, influential, and important for the field. This book paints a full picture of how these theories contribute to, and explain, what we know about public administration today. The third edition is fully revised and updated to reflect the latest developments and research in the field including more coverage of governments and governance, feminist theory, emotional labor theory, and grounded research methodology. Expanded chapter conclusions and a brand-new online supplement with sample comprehensive exam questions and summary tables make this an even more valuable resource for all public administration students.
