Kgl. Danske Videnskabernes Selskab

This book presents the proceedings of the 6th International Conference on Frontier Computing, held in Kuala Lumpur, Malaysia on July 3-6, 2018, and provides comprehensive coverage of the latest advances and trends in information technology, science and engineering. It addresses a number of broad themes, including communication networks, business intelligence and knowledge management, web intelligence, and related fields that inspire the development of information technology. The contributions cover a wide range of topics: database and data mining, networking and communications, web and internet of things, embedded systems, soft computing, social network analysis, security and privacy, optical communication, and ubiquitous/pervasive computing. Many of the papers outline promising future research directions. The book is a valuable resource for students, researchers and professionals, and also offers a useful reference guide for newcomers to the field.

La 4e de couverture indique : "The 'Uber phenomenon' is the perfect case for a comparative law study: a global phenomenon, impacting almost every country, causing massive disruption of local monopolies and raising many of the same legal questions worldwide. In most countries, taxi companies have long enjoyed monopolies amidst strictly regulated markets. Uber's emergence, combined with the development of a new economic model based on innovative technological tools, has profoundly impacted the industry. It all happened very fast. Uber launched operations in 2009 in the United States and, within a few years, has changed the face of the taxi industry throughout the world. The purpose of this book is to explain how various legal systems reacted and adapted to the disruption caused by the emergence of this new economic model. It is a book about economic regulation, it focuses on how the law regulates - more or less strictly - the actions of economic entities. This book is the collective work of an amazing team of authors - all academics in law or lawyers - from around the world and representing twenty-two countries, namely Argentina, Australia, Belgium, Brazil, Canada, China, Colombia, Denmark, Finland, France, Germany, Greece, Italy, Japan, Lithuania, Poland, Portugal, the Netherlands, Spain, Switzerland, the United Kingdom and the United States."

Information and Communications Security Frontier Computing Theory, Technologies and Applications (FC 2018)

Focuses on the cultural, philosophical, political, and scholarly uses of "orientalism" in the German-speaking and Central and Eastern European worlds from the late eighteenth century to the present day.

7. Internationales Symposium über Struktur und Funktion der Erythrozyten BRILL

The past two decades have seen an extraordinary growth of interest in the auditory mechanisms of a wide range of vertebrates and invertebrates. Investigations have ranged from auditory mechanisms in relatively simple animals where just a few cells are employed for detection of sound, to the highly complex detection and processing systems of man and the other mammals. Of particular significance to us has been the growing interest in general principles of vertebrate auditory system organization, as opposed to a specific and limited concern for the mammalian or even human systems. Some of the interest in nonmammalian systems has risen from the desire to find simpler experimental models for both the essential components (e. g. , the hair cell receptor) and the more complex functions (e. g. , frequency analysis) of all vertebrate auditory systems. Interest has also risen from questions about the evolution of hearing and the covariation (or lack of it) in structure and function in a wide variety of biological solutions to the problems of acoustic mechanoreception. Of course, the desire to find simpler experimental models and the need to answer questions about the evolution of hearing are not unrelated. In fact, detailed analyses of a

variety of systems have led several times to the realization that some of the "simple systems" are more complex than initially thought.

Regulating the Platform Economy Springer Nature

Different national varieties of Spanish, for instance Argentinian, Colombian and Mexican, use different address systems, with different numbers of pronouns, and also give pronouns a different social significance. For the first time, this study discusses and analyses these paradigms in the context of inter-varietal contact in a third country, with English as an additional contact language. A multiplicity of data collection methods made it possible to uncover many new insights into address behaviour. New definitions for address pronouns are proposed, and issues arising from address are discussed, such as: awareness, proficiency, avoidance, accommodation, and uncertainty. In addition, some unexpected practices emerged, which call into question all previously accepted norms of usage.

Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

A Comparative Study of Tubercle Bacilli from Varied Sources Routledge

The collective volume "Modern Forms of Work. A European Comparative Study" evokes the intent to embody a reflection focused on modern labour law issues from a comparative perspective. A first set of essays contains national reports on modern forms of work. The second group contains some reflections regarding critical issues on digitalization, platforms and algorithms, analysing the different facets of the galaxy of digital work. The third group of essays flows into the section entitled "new balances and workers' rights in the digital era", a crucial topic in the debate. The complex of the writings, despite the diversity of approaches and methods, reveals the existence of a dense and inexhaustible dialogue between young scholars, at European and extra-European level. The analysis of new forms of work - the offspring of transnational processes of globalization and technologization - forms a fertile ground for experimenting a transnational dialogue on which young researchers can practice with excellent results, as this small volume confirms.

Overview, Strategy and Applications in Eastern and Western Europe Peter Lang

The collaborative monograph will commemorate the centenary of the Prague English Studies, officially inaugurated in 1912 by the appointment of Vilém Mathesius, the founder of Prague Linguistic Circle and the first Professor of English Language and Literature at Charles University. Apart from reassessing the work of major representatives (Mathesius, Vančura and others) and reviewing important developments in literature-oriented Prague English Studies with respect to the Prague Structuralism, it will focus on the methodological problems of the discipline related to the transformation of humanistic as well as modern philologies, searching for the links between two historically distinct interdisciplinary projects: humanist philology and structuralist semiology. Following Paul de Man, this link can be identified as the problem of rhetoric - its liminal position between grammar and logic, structure and meaning, and its concern with performativity and value of language. Reassessment of this problem appears crucial for understanding the dynamics of present transformation of philologies and structuralist methodologies which will be discussed in the concluding section. The other crucial methodological problem is that of the methodology of literary history. Although the representatives of the Prague English studies managed to overcome the rigidity of synchronic approaches their treatment of dynamic structures is still considerably indebted to traditional notions of function and value. The book is divided into two sections: the first attempts to reassess the significance of the legacy of Mathesius (in literary theory, history and theory of translation) and his followers (especially Zdeněk Vančura and Jaroslav Hornát), the second explores diverse contexts and implications of the Prague Structuralism, from political aspects of Russian formalist theories, via the aesthetics of the grotesque to structuralist psychoanalysis and recent textual genetics.

 Prague English Studies and the Transformation of Philologies Mohr Siebeck

This advanced historical linguistics course book deals with the historical and comparative study of African languages. The first part functions as an elementary introduction to the comparative method, involving the establishment of lexical and grammatical cognates, the reconstruction of their historical development, techniques for the subclassification of related languages, and the use of language-internal evidence, more specifically the application of internal reconstruction. Part II addresses language contact phenomena and the status of language in a wider, cultural-historical and ecological context. Part III deals with the relationship between comparative linguistics and other disciplines. In this rich course book, the author presents valuable views on a number of issues in the comparative study of African languages, more specifically concerning genetic diversity on the African continent, the status of pidginised and creolised languages, language mixing, and grammaticalisation.

*A Progress Report* Springer Nature

This book analyzes the legal issues connected with the provision of Uber-related services. It primarily focuses on the various contractual and non-contractual relationships that occur during the use of Uber applications, especially with reference to Uber headquarters (Uber App), Uber branch offices (advertisements), Uber partner drivers (employees or self-employed), Uber application registered users, Uber transportation service users (contracting passenger) and third-party Uber transportation service users (additional passenger). It also provides a comparison of standard transportation services and contracts of carriage, irrespective of whether the carrier in question is a common carrier, contractual carrier, actual carrier or an intermediary service provider. Furthermore, the book presents the relevant case law, especially with regard to Uber as a taxi service, Uber as a share-riding service, Uber as a rent-a-car with driver service, Uber as an employer and Uber as a key organizer of transportation service, in Croatia, Belgium, Germany, Italy, the Netherlands, United Kingdom, United States, Hungary, Argentina, and France. Lastly, it explores the different legislative approaches to resolving various issues related to the appearance of Uber and similar companies – the Laissez-faire model, Status Quo model, Legal Adjustment model, and the New Legislative Paradigm model.

**Notes on the Comparative Study of Educational Innovation** Springer Nature

This book analyses novel and important issues relating to the emergence of new forms of work resulting from the introduction of disruptive technologies in the enterprises and the labour market, especially platform work. The first part of the book examines the platform economy and labour market, to address the more general challenges that the recent labour platforms pose for employment and the labour market, while the second part of the book considers the implications of the rise of different ways of work in the enterprises due to the incorporation of technology in a global context. Providing a rich analysis and evaluation of the numerous theoretical and practical regulatory problems arising from constantly developing technology, this book makes important and informed suggestions on how to solve the numerous problems which have arisen. The collection of chapters in this volume are varied and are dealt with from different disciplinary angles, and from a diverse range of countries and legal systems to create an interesting and unique global picture on the topics studied therein. With an international perspective, the book will be of interest to students and scholars of economy and technology law.

*Report on the Activities of the Institute for Comparative Research in Human Culture in the Years 1923/1926-*. Elsevier

This book examines how regulators and policymakers from nine different countries have dealt with Uber, and initiates a legal dialogue between different jurisdictions that could potentially pave the way to a harmonized approach in regulating Uber. The case studies, conducted in Brazil, Germany, Italy, Mexico, Spain, South Africa, Turkey, the UK and the US reveal the case law and regulatory

responses that have been adopted in various areas of law. Legal issues relevant to Uber include market regulation, labor law, civil liability, consumer protection, unfair competition and antitrust law. The book thus compares and contrasts the regulatory policy implications of the disruptive innovation created by Uber in the area of transport services. The book starts with a conceptual overview of the legal challenges posed by Uber and concludes with comparative findings based on the individual case studies. In addition to introducing academics and legal practitioners to the theoretical and practical legal problems they may encounter in connection with Uber, the book will especially appeal to policymakers, who can benefit from and compare the experiences of other jurisdictions.

*Sustainable Development Research in the Asia-Pacific Region* Boydell & Brewer

This book constitutes the refereed proceedings of the 21th International Conference on Information and Communications Security, ICICS 2019, held in Beijing, China, in December 2019. The 47 revised full papers were carefully selected from 199 submissions. The papers are organized in topics on malware analysis and detection, IoT and CPS security enterprise network security, software security, system security, authentication, applied cryptograph internet security, machine learning security, machine learning privacy, Web security, steganography and steganalysis.

*Comparative Research on Education: Overview, Strategy and Applications in Eastern and Western Europe* is a two-part book that first gives an overview and an appraisal of the comparative research on education. Then, the book presents examples of the type of investigation that is defined as "comparative research on education." Comparative research studies in Western as well as in Eastern Europe are covered in both parts of the book. This book will be useful to students of comparative education as it presents pertinent examples of how empirical methods can be employed in dealing with central problems in education.

This multidisciplinary book focuses on best practices in sustainability research in the Asia-Pacific Region. Drawing links between research, practice, education for sustainability and the needs of industry, it addresses the sustainable development goals (SDGs). The book also presents research undertaken by a wide range of universities on matters related to sustainable development, in order to promote research in this area across multiple disciplines. Four key themes are explored: (1) Education for Sustainability. (2) Sustainable Cities. (3) Sustainable Buildings. (4) Sustainable Infrastructure. This unique book documents and disseminates the wealth of know-how on sustainable development research in the Asia-Pacific Region today. It presents lessons learned and comparative case studies from various countries, including India, China, Indonesia, the Philippines, Bangladesh, New Zealand and Australia.

*Education, Cities, Infrastructure and Buildings* John Benjamins Publishing

The subject of rock characterization is not only about the optimal length-to-diameter ratio for a compression test specimen and other similar tactical aspects of the testing procedures, it is also about the whole strategic concept of how to characterize naturally-occurring rock masses, which have been in existence for millions of years. They have been operating as natural process-response systems for all time and are about to be perturbed by engineers in order to achieve particular objectives. By international authors, this volume is important and useful for all geotechnical engineers and related positions who need to know the latest information to succeed.
