### ASEAN Corporate Governance Scorecard CRC Press

The popular 1998 reformasi movement that brought down President Suharto's regime demanded an end to illegal practices by state officials, from human rights abuse to nepotistic investments. Yet today, such practices have proven more resistant to reform than people had hoped. Many have said corruption in Indonesia is "entrenched". We argue it is precisely this entrenched character that requires attention. What is state illegality entrenched in and how does it become entrenched? This involves studying actual cases. Our observations led us to rethink fundamental ideas about the nature of the state in Indonesia, especially regarding its socially embedded character. We conclude that illegal practices by state officials are not just aberrations to the state, they are the state. Almost invariably, illegality occurs as part of collective, patterned, organized and collaborative acts, linked to the competition for political power and access to state resources. While obviously excluding many without connections, corrupt behaviour also plays integrative and stabilizing functions. Especially at the lower end of the social ladder, it gets a lot of things done and is often considered legitimate. This book may be read as a defence of area studies approaches. Without the insights that grew from applying our area studies skills, we would still be constrained by highly stylised notions of the state, which bear little resemblance to the state's actual workings. The struggle against corruption is a long-term political process. Instead of trying to depoliticize it, we believe the key to progress is greater popular participation. With contributions from Simon Butt, Robert Cribb, Howard Dick, Michele Ford, Jun Honna, Tim Lindsey, Lenore Lyons, John McCarthy, Ross McLeod, Marcus Mietzner, Jeremy Mulholland, Gerben Nooteboom, J Danang Widoyoko and Ian Wilson. This book is the result of a series of workshops supported, among others, by the Australian-Netherlands Research Collaboration (ANRC).

### Christianity, Islam, and Nationalism in Indonesia Granta Books (UK)

Originally published in 1844, this book details the journey of a British missionary, explorer, and amateur botanist through the remote regions of Tartary, Tibet, and China. Filled with colorful descriptions of the people, landscapes, and cultures encountered along the way, it also includes detailed observations of local flora and fauna. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

### Technology of the Guitar Concept Publishing Company

2-stroke Vespa is a style icon - an undoubted classic, and an immediately recognised symbol of its native Italy. Demand for these stylish scooters is booming, and interest in restoring and renovating them is at an all-time high. With its clear and concise text aided by extensively captioned full colour photographs, this practical book guides the DIY enthusiast through all the stages of restoring a classic largeframe 2-stroke Vespa, taking it from a rusty, unroadworthy wreck back to its factory fresh, former glory. It shows how to assess wear in all mechanical components, then assists in deciding the best and most cost effective method to renovate or repair. The largeframe engines are covered in detail, giving the reader confidence to carry out their own repairs to a high standard - both satisfying and cost effective. Brakes, suspension, electrical systems and brightwork are all addressed, from changing a bulb to welding in a new floor pan. Altogether an essential reference for all Vespa enthusiasts.

### Reliability, Quality, and Safety for Engineers Harlequin

As the largest Muslim country in the world, Indonesia is marked by an extraordinary diversity in

language, ancestry, culture, religion and ways of life. Christianity, Islam and Nationalism in Indonesia focuses on the Christian Dani of West Papua, providing a social and ethnographic history of the most important indigenous population in the troubled province. It presents a fascinating overview of the Dani's conversion to Christianity, examining the social, religious and political uses to which they have put their new religion. While its indigenous population is Papuan and its dominant religions are Christianity and animism, West Papua contains a growing number of Papuan Muslims. Farhadian provides the first study of this highland Papuan group in an urban context which helps distinguish it from the typical highland Papuan ethnography. Incorporating cultural and structural approaches, the book affords a fascinating insight into the complex relationship between Christianity, Islam, and nationalism.

### The Travels in Tartary Thibet and China Springer Science & Business Media

Cases for Contemporary Strategy Analysis has been developed to accompany Grant's best-selling strategic management text, but can also be used alongside other strategy texts. New, in-depth international cases. Can be used alongside the best-selling textbook Contemporary Strategy Analysis or as a stand alone text due to its broad view. Cases include Laura Ashley, Daimler, the Virgin Group, Eastman Kodak, Harley Davidson, The Royal Dutch/Shell Group, Amazon.Com and others.

### Opposing Suharto Contemporary Neurology

Featuring chapters on physics, structure, sound and design specifics, Technology of the Guitar also includes coverage of historical content, composition of strings and their effects on sound quality, and important designs. Additionally, author Mark French discusses case studies of historically significant and technologically innovative instruments. This is a complete reference useful for a broad range of readers including guitar manufacturer employees, working luthiers, and interested guitar enthusiasts who do not have a science or engineering background.

### Raiding the Land of the Foreigners Algonquin Books

This money-saving package includes the 8th edition of Community/Public Health Nursing Online for Stanhope and Lancaster, Public Health Nursing (User Guide and Access Code) and Public Health Nursing, 8th edition textbook.

### How and Why Motorcycle Design and Technology Veloce Publishing

One of the most stimulating, informative, provocative and witty books on the motor car ever written.

### Plug-In Electric Vehicles Mosby

This textbook presents a unified description and explanation of the fundamentals of the essential components of the motor vehicle, making extensive use of illustrations alongside the written material. The second edition brings into focus advancements in technology which include mechanical refinements, electrical applications and electronically controlled systems. Annotation copyrighted by Book News, Inc., Portland, OR

### Ramjet Engines McFarland

Plum and Posner's Diagnosis and Treatment of Stupor and Coma, 5th edition, is a major update of the classic work on diagnosing the cause of coma, with the addition of completely new sections on treatment of comatose patients, by Dr. Jan Claassen, the Director of the Neuro-ICU at Columbia New York Presbyterian Hospital. The first chapter of the book provides an up-to-date review on the brain mechanisms that maintain a conscious state in humans, and how lesions that damage these mechanisms cause loss of consciousness or coma. The second chapter reviews the neurological examination of the comatose patient, which provides the basis for determining whether the patient is suffering from a structural brain injury causing the coma, or from a metabolic disorder of consciousness. The third and fourth chapters review the pathophysiology of structural lesions causing coma, and the specific disease states that result in coma. Chapter five is a comprehensive treatment of the many causes of metabolic coma. Chapter 6 review psychiatric causes of unresponsiveness and how to identify and treat them. Chapters 7 and 8 review the overall emergency treatment of comatose patients, followed by the treatment of specific causes of coma. Chapter 9 examines the long term outcomes of coma, including the minimally conscious state and

the persistent vegetative state, and how they can be distinguished, and their implications for eventual useful recovery. Chapter 10 reviews the topic of brain death and the standards for examination of a patient that are required to make the determination of brain death. The final chapter 11 is by J.J. Fins, a medical ethicist who was invited by the other authors to write an essay on the ethics of diagnosis and treatment of patients who, by definition, have no way to approve or communicate about their wishes. While providing detailed background for neurological and neurosurgical specialists, the practical nature of the material in this book has found its greatest use among Internists, Emergency Medicine, and Intensive Care specialists, who deal with comatose patients frequently, but who may not have had extensive neurological training.

**The State and Illegality in Indonesia** New York : Washington Square Press

Due to global competition, safety regulations, and other factors, manufacturers are increasingly pressed to create products that are safe, highly reliable, and of high quality. Engineers and quality assurance professionals need a cross-disciplinary understanding of these topics in order to ensure high standards in the design and manufacturing process

[Zeolites For Cleaner Technologies](#) Rowman & Littlefield

This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagon. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

[Casting Aluminum Alloys](#) Wiley-Blackwell

This book, written and edited by leading authorities from academia and industrial groups, covers both preventive- and curative-zeolite-based technologies in the field of chemical processing. The opening chapter presents the state of the art in zeolite science. The two subsequent chapters summarize the chemistries involved in the processes and the constraints imposed on the catalyst/adsorbent. Three major areas are covered: oil refining, petrochemicals and fine chemicals. A chapter on the (curative) use of zeolites in pollution abatement completes this overview. In the area of oil refining, a general lecture sets the scene for present and future challenges. It is followed by in-depth case studies involving FCC, hydrocracking and light naphtha isomerization. Also, an entire chapter is devoted to the often-overlooked subject of base oils. In the area of petrochemicals, the processing of aromatics and olefins is described and special attention is paid to the synergy between catalysis and separation on molecular sieves.

**Cases in Contemporary Strategy Analysis 2e** University of Toronto Press

This collection of eighteen papers explores issues in the study of semantic parallelism — a world-wide tradition in the composition of oral poetry. It is concerned with both comparative issues and the intensive study of a single living poetic tradition of composition in strict canonical parallelism. The papers in the volume were written at intervals from 1971 to 2014 — a period of over forty years. They are a summation of a career-long research effort that continues to take shape. The concluding essay reflects on possible directions for future research.

[Community/Public Health Nursing Online for Stanhope and Lancaster, Public Health Nursing \(User Guide, Access Code and Textbook Package\)](#) UN

The "Gothic" style was a key trend in Italian cinema of the 1950s and 1960s because of its peculiar, often strikingly original approach to the horror genre. These films portrayed Gothic staples in a stylish and idiosyncratic way, and took a daring approach to the supernatural and to eroticism, with the presence of menacing yet seductive female witches, vampires and ghosts. Thanks to such filmmakers as Mario Bava (*Black Sunday*), Riccardo Freda (*The Horrible Dr. Hichcock*), and Antonio Margheriti (*Castle of Blood*), as well the iconic presence of actress Barbara Steele, Italian Gothic horror went overseas and reached cult status. The book examines the Italian Gothic horror of the period, with an abundance of previously unpublished production information drawn from official papers and original scripts. Entries include a complete cast and crew list, home video releases, plot summary and the author's analysis. Excerpts from interviews with filmmakers, scriptwriters and actors are included. The foreword is by film director and scriptwriter Ernesto Gastaldi.

This edited open access book gives a comprehensive overview of small and lightweight electric three- and four-wheel vehicles with an international scope. The present status of small electric

vehicle (SEV) technologies, the market situation and main hindering factors for market success as well as options to attain a higher market share including new mobility concepts are highlighted. An increased usage of SEVs can have different impacts which are highlighted in the book in regard to sustainable transport, congestion, electric grid and transport-related potentials. To underline the effects these vehicles can have in urban areas or rural areas, several case studies are presented covering outcomes of pilot projects and studies in Europe. A study of the operation and usage in the Global South extends the scope to a global scale. Furthermore, several concept studies and vehicle concepts on the market give a more detailed overview and show the deployment in different applications.

[100 Birds and How They Got Their Names](#) CRC Press

What are the limits of national belonging? Focusing on Biak—a set of islands off the coast of western New Guinea, in the Indonesian province of Irian Jaya—Danilyn Rutherford's analysis calls for a rethinking of the nature of national identity. With the resurgence of separatism in the province, Irian Jaya has become the focus of fears that the Indonesian nation is falling apart. Yet in the early 1990s, the fieldwork for this book was made possible by the government's belief that Biaks were finally beginning to see themselves as Indonesians. Taking in the dynamics of Biak social life and the islands' long history of millennial unrest, Rutherford shows how practices that indicated Biaks' submission to national authority actually reproduced antinational understandings of space, time, and self. Approaching the foreign as a focus of longing in cultural arenas ranging from kinship to Christianity, Biaks participated in Indonesian national institutions without accepting the identities they promoted. Their remarkable response to the Indonesian government (and earlier polities laying claim to western New Guinea) suggests the limits of national identity and modernity, writ large. This is one of the few books reporting on the volatile province of Irian Jaya. It offers a new way of thinking about the nation and its limits—one that moves beyond the conventions of both scholarship and recent journalism. It shows how people can "belong" to a nation yet maintain commitments that fall both short of and beyond the nation state.

[Drive On!](#) Legare Street Press

How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers—from Coleridge's albatross in "The Ancient Mariner" to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its "bad moral character," (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means "unmarried," are called "bachelor birds" because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into *100 Birds* and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.

[Small Electric Vehicles](#) Princeton University Press

This is the story of six extraordinary men who each built something from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again.- The compelling story of the global car business over the past half-century.- A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men- Full of business revelations at the highest level, written by a journalist operating at the heart of the industry- Global appeal that shows how automotive groups in the USA, Europe and Asia have influenced each other- A business story interlaced with personal details that explains why the six were determined to be successfulAbout the AuthorFor two decades, Richard Johnson has worked for Crain Communications, publisher of the world's leading automotive business publications. Founding editor of Crain's Automotive News Europe, he has been a reporter and editor for the group in Detroit, Tokyo, Frankfurt and London. He is currently a senior editor with Automotive News in Detroit and regularly talks to the most senior executives in the leading car manufacturing groups.
