This two-volume set
LNCS 12035 and 12036
constitutes the
refereed proceedings
of the 42nd European

Conference on IR Research, ECIR 2020, held in Lisbon, Portugal, in April 2020.* The 55 full papers presented together with 8 reproducibility papers, 46 short papers, 10 demonstration papers, 12 invited CLEF papers, 7 doctoral consortium papers, 4 workshop papers, and 3 tutorials were carefully reviewed and selected from 457 submissions. They were organized in topical sections named: Part I: deep learning I; entities; evaluation; recommendation; information extraction; deep learning II; retrieval; multimedia; deep learning III; queries; IR - general; question answering, prediction, and bias; and deep learning IV. Part II: reproducibility

papers; short papers; demonstration papers; CLEF organizers lab track; doctoral consortium papers; workshops; and tutorials. *Due to the COVID-19 pandemic, this conference was held virtually.

By adopting a new approach to helping students understand how management accounting contributes to decisions in a variety of organizational contexts, this textbook sets out clear explanations of practical management accounting techniques - in the context of the application of these techniques to

decisions. Uniquely, the book examines the analytical and critical issues that often influence decision makers operating within private and public sector organizations. It is supported by case studies of varying complexity that will allow students to work at their own level and also includes summaries.

This volume engages with the renewed focus on various forms of persisting and new marginalities in globalising India. The persistence of hunger in pockets of India; forcible land acquisitions and their

impact on deprived sections of society; the effects of urban relocations; material deprivation of minority groups and tribes as a result of conflicts; continuing caste discrimination; reported cases of atrocities against lower castes and tribes; regional disparities; gendered forms of exclusion and those related to disability and many other conditions suggest the need to rethink notions and practices of marginality and exclusion in India. This volume critiques the principal ways of thinking about marginalities, which primarily consist of a focus on normative principles, and brings into focus the chasm between such principles and

subjective notions and experiences of marginality and injustice. The uniqueness of this edited volume is that it connects theoretical perspectives with empirical case studies and discussions, and cases of exclusion are discussed within an overall inclusive and integrated framework. This is a valuable resource for researchers, scholars, students, public policy formulators and for social innovators from private sectors and non-government organisations.

The Development of Modern Industries in Bengal IGIPZ PAN

If you're a home-based or small business owner, you need to learn how to balance your books as you start and grow your

business. The Everything Accounting Book is a great beginner's guide for the basics of accounting. This easy-to-use reference is loaded with expert tips and advice on: The differences between accounting and bookkeeping Preparing financial statements Recording and recognizing revenues and expenses Tax planning strategies Real-world examples show accounting procedures for a retail business, a manufacturer, a home-based business, and a small high-tech company. So no matter what your business, you have the information you need to make a go of it with The Everything Accounting Book! *Management*

Bengal's traditional industries, once celebrated worldwide, largely decayed under the backwash effects of the British Industrial Revolution in the first half of the nineteenth century. Although colonial ambivalence is often cited as an explanation, this study also shows that a series of new industries emerged during this period. The book reappraises the thesis of India's deindustrialisation and discusses the development status of the traditional industries in the early nineteenth century, examines their technology, employment opportunities and marketing and, finally,

analyses the underlying reasons for their decay. It offers a study of how traditional industries evolved into modern enterprises in a British colony, and contributes to the broader discussion on the global history of industrialisation. This book will be of interest to scholars of Indian economic history as well as those who seek to understand the widespread effects of industrialisation, especially in a colonial context.

In this revealing study Frank Lichtenberg uses Census Bureau and other data on hundreds of business transactions during the 1970s and 1980s to examine the effects of

changes in corporate control on productivity. The 1980s saw explosive activity in the arena of corporate takeovers. In this revealing study Frank Lichtenberg uses Census Bureau and other data on hundreds of business transactions during the 1970s and 1980s to examine the effects of changes in corporate control on productivity. He concludes that the restructuring of the U.S. economy during the past decade has contributed to higher productivity and increased international competitiveness. Corporate Takeovers and Productivity examines the effects of mergers and acquisitions, in general, and leveraged buyouts, in particular on a number of

important, interrelated variables: on the productivity and market share of manufacturing plants, on fixed and R&D investment, on the employment and wages of both blue- and white-collar workers, and on corporate diversification. Among Lichtenberg's findings are that the least productive plants are most likely to change owners - a change that tends to raise productivity performance; that takeovers significantly reduce the employment and wages of white-collar workers (except R&D personnel) but not of blue-collar workers; that industrial consolidation is one source of the productivity gains from

takeovers; and that the U.S. LBOs and foreign mergers and acquisitions do not have the same effects as U.S. mergers and acquisitions.

This volume includes extended and revised versions of a set of selected papers from the International Conference on Electric and Electronics (EEIC 2011) , held on June 20-22 , 2011, which is jointly organized by Nanchang University, Springer, and IEEE IAS Nanchang Chapter. The objective of EEIC 2011 Volume 3 is to provide a major interdisciplinary forum for the presentation of new approaches from Electrical Power Systems and Computers, to foster integration of the latest developments in

scientific research. 133 related topic papers were selected into this volume. All the papers were reviewed by 2 program committee members and selected by the volume editor Prof. Xiaofeng Wan. We hope every participant can have a good opportunity to exchange their research ideas and results and to discuss the state of the art in the areas of the Electrical Power Systems and Computers.

Accruals, Financial Distress, and Debt Covenants Wiley Accounting: Text & Cases, by Anthony, Hawkins, and Merchant covers both financial and managerial accounting as well as broader managerial issues. Chapters 1 -14 cover financial

accounting, while Chapters 15-21 cover management accounting, and Chapters 22-28 focus on broader issues of control and corporate strategy. The approximately 120 cases that make up most of the end of chapter material are a combination of classic Harvard style cases and extended problems, with 10 completely new cases added to the 13th edition. Accounting: Text and Cases is a product of lifelong dedication to the discipline of accounting, and users of the book benefit from a breadth of experience that is sure to enrich your course and your students.

Thomson Learning Management Accounting: For Chaudhary Charan Singh University is a comprehensive textbook written for BBA students of Chaudhary Charan Singh University with a focus on the essentials and designed to help students understand the basic concepts and practice underlying management accounting in a systematic manner. A balanced approach between theoretical and numerical aspects of the subject has been adopted to ensure ease and clarity in learning. The lucid writing, contents and organization of the chapters make the book eminently useful for the undergraduate students.

Standard costing is the foundation upon which much management accounting and budgetary practice rests, yet it is often misunderstood. In this book Colin Drury sets out the nature and scope of standard costing whilst clearly identifying its limitations. The calculation and interpretation of the full range of cost accounting variances is covered, together with the formal analysis of the decision to investigate variances. The way in which standard costing information is recorded in the accounts is also dealt with in depth, as this step is essential to a full appreciation of the role of standard

costing. Finally, the usefulness of traditional standard costing techniques in a modern production environment is assessed.

Themes and Perspectives Springer

This text is highly respected for its authoritative coverage, excellent examples, and extensive assignment options. It reaches beyond cost accounting procedures to consider concepts, analyses, and management.

International Conference, ICT 2010, Kochi, Kerala, India, September 7-9, 2010, Proceedings Pearson Education India

This book gathers high-quality research papers presented at the Global AI Congress 2019, which was organized by the Institute of

Engineering and Management, Kolkata, India, on 12–14 September 2019. Sharing contributions prepared by researchers, practitioners, developers and experts in the areas of artificial intelligence, the book covers the areas of AI for E-commerce and web applications, AI and sensors, augmented reality, big data, brain computing interfaces, computer vision, cognitive radio networks, data mining, deep learning, expert systems, fuzzy sets and systems, image processing, knowledge representation, nature-inspired computing, quantum machine learning, reasoning, robotics and autonomous systems, robotics and the IoT, social network

analysis, speech processing, video processing, and virtual reality. *Hybrid Computational Intelligence* Academic Press
Global financial markets might seem as if they increasingly resemble each other, but a lot of peculiar aspects qualify different markets with different levels of development. Private equity investors can take advantage of these variations. Structured to provide a taxonomy of the business, *Private Equity and Venture Capital in Europe*, Second Edition, introduces private equity and venture capital markets while presenting new information about the core of private equity: secondary markets,

private debt, PPP within private equity, crowdfunding, venture philanthropy, impact investing, and more. Every chapter has been updated, and new data, cases, examples, sections, and chapters illuminate elements unique to the European model. With the help of new pedagogical materials, this Second Edition provides marketable insights about valuation and deal-making not available elsewhere. Covers new regulations and legal frameworks (in Europe and the US) described by data and tax rates Features overhauled and expanded pedagogical supplements to increase the versatility of the Second Edition Focuses on Europe Includes balanced presentations

throughout the book
Accounting for Managers Pearson Education India
 This book constitutes the proceedings of the International Conference on Information and Communication Technologies held in Kochi, Kerala, India in September 2010.
Computer Applications In Management
 Springer
 Hedge Fund Activism begins with a brief outline of the research literature and describes datasets on hedge fund activism.
 Tata McGraw-Hill Education
 This book constitutes the refereed conference proceedings of the 7th International Conference on Mining Intelligence and Knowledge Exploration,

MIKE 2019, held in Goa, India, in December 2019. The 31 full papers were carefully reviewed and selected from 83 submissions. The accepted papers were chosen on the basis of research excellence, which provides a body of literature for researchers involved in exploring, developing, and validating learning algorithms and knowledge-discovery techniques. Accepted papers were grouped into various subtopics including evolutionary computation, knowledge exploration in IoT, artificial intelligence, machine learning, image processing, pattern recognition, speech processing, information retrieval, natural language processing, social network

analysis, security, fuzzy rough sets, and other areas.
Contemporary Auditing
Routledge
Compensation Management is a comprehensive textbook designed to meet the requirements of MBA/PGDM students. Written in a student friendly style, it focusses on the strategic importance of compensation and its effective management. The text is developed through original research by the author, and focusses on industry application through case studies on practices followed by organizations worldwide.
Challenges and Applications Springer
Science & Business Media
Advances in Electrical Engineering and

Computational Science contains sixty-one revised and extended research articles written by prominent researchers participating in the conference. Topics covered include Control Engineering, Network Management, Wireless Networks, Biotechnology, Signal Processing, Computational Intelligence, Computational Statistics, Internet Computing, High Performance Computing, and industrial applications. *Advances in Electrical Engineering and Computational Science* will offer the state of art of tremendous advances in electrical engineering and computational science and also serve as an excellent reference

work for researchers and graduate students working with/on electrical engineering and computational science.
