The skills, creativity, and research
developed through higher education are

major factors in any society's success in creating jobs and advancing prosperity. Universities and colleges play a vital role in expanding opportunity and promoting social justice. The papers in this book reflect the main objective of a conference held in June 2007 at Ahlia Ecological and Environmental Science: A Research Perspective Elsevier Health Sciences

The 9th European Conference on Information Management and Evaluation (ECIME) is being hosted this year by the University of the West of England, Bristol, UK on the 21-22 September 2015. The Conference Chair is Dr Elias Pimenidis, and the Programme Chair is Dr Mohammed Odeh both from the host University. ECIME provides an opportunity for individuals researching

and working in the broad field of information systems management, including IT evaluation to come together to exchange ideas and discuss current research in the field. This has developed into a particularly important forum for the present era, where the modern challenges of managing information and evaluating the effectiveness of related technologies are constantly evolving in the world of Big Data and Cloud Computing. We hope that this year's conference will provide you with plenty of opportunities to share your expertise with colleagues from around the world. The keynote speakers for the Conference are Professor Haris Mouratidis, from the School of Computing, Engineering and Mathematics, University of Brighton, UK who will address the topic "Rethinking

Information Systems Security”, Dr Mohammed Odeh, from the University of the West of England, Bristol, UK and Dr. Mario Kossmann from Airbus, UK who will talk about “The Significance of Information Systems Management and Evaluation in the Aerospace Industry’ ECIME 2015 received an initial submission of 55 abstracts. After the double-blind peer review process 28 academic Research papers, 5 PhD Research papers, 1 Masters Research paper and 3 Work in Progress papers have been accepted for these Conference Proceedings. These papers represent research from around the world, including Austria, Botswana, Cyprus, Czech Republic, Ireland, Japan, Kuwait, New Zealand, Norway, Poland, Portugal, Slovakia, Russia, South Africa,

South Korea, Sweden, The Netherlands, UK and the USA.
Proceedings of the 13th International Congress of Chemotherapy: Prophylaxis, TBC, parasitic diseases Academic Conferences Limited
Industry and Academic Research Review (IARR) is the official conference proceedings publication of the International Conference on Multidisciplinary Industry and Academic Research (ICMIAR). It focuses on four broad themes: education and development studies; humanities and social sciences; science, technology, engineering and mathematics; and business, management and accounting. This publication provides a platform for experts and practitioners from various fields in the dissemination of their

research works that address industry trends and needs, scientific findings and international concerns. Both the conference and proceedings publication promote a wider horizon for researchers through open-access paradigm.

ECEG2013- 13th European Conference on eGovernment Springer Nature

The book “Ecological and Environmental Science: A Research Perspective” is a compilation of authors' original research

papers, scientific articles, review articles, popular articles, general articles, and short notes on forest ecology, wetland ecology, plant ecology, bird ecology, and animal ecology. The book is a perfect amalgamation of burgeoning and thrust topics spanning biodiversity, and conservation and management of floral and faunal elements including ecology and biodiversity of phytoplankton, zooplankton, aquatic macrophytes, mangroves, terrestrial plants, animals (butterflies, reptiles, mammals) and birds. It covers ecological and environmental factors affecting abiotic and biotic components prevailed in forest, desert, grassland and wetland habitats and ecosystems. The present book highlights field studies and laboratory investigations carried out by

the authors during their research journey of 22 years (1998-2020). It discusses phenology, ethnobotanical, ethnomedicinal and aesthetic values of plants, resource use patterns by local inhabitants, socio-cultural aspects, livelihood dependency, rare and endangered plants, animals and birds, anthropogenic pressures, conservation and management strategies of endemic, exotic, and invasive species, and so on. The book covers unique and promising research topics e.g. hydrochemistry, geochemistry, biomonitoring of heavy metals in aquatic and terrestrial plants, metal remediation, environmental modeling, environmental archaeology, environmental bioindicators, environmental forensics, etc. The authors believes that this book is a

perfect blend of their research work on two integral branches of biology i.e. ecology and environmental science, which will undoubtedly enrich and enhance the knowledge and awareness of laymen and scientific community world over especially in the field of ecology and biodiversity of plants, animals, and birds, associated with physical, chemical, biological, ecological and environmental factors. The present book would certainly be useful and handy as a ready-reference material for students, academicians, researchers, scientists, ecological and environmental consultants, restoration specialists, practitioners, conservationists, and biodiversity managers at regional, national and global platform.

Technological innovations in the banking sector have provided numerous benefits to customers and banks alike; however, the use of e-banking increases vulnerability to system attacks and threats, making effective security measures more vital than ever. Online

Banking Security Measures and Data Protection is an authoritative reference source for the latest scholarly material on the challenges presented by the implementation of e-banking in contemporary financial systems. Presenting emerging techniques to secure these systems against potential threats and highlighting theoretical foundations and real-world case studies, this book is ideally designed for professionals, practitioners, upper-level students, and technology developers interested in the latest developments in e-banking security.

Natural Resources Deterioration in MENA Region Academic Conferences Limited

This volume is the outcome of an international cooperation between 73 scientists, experts, and practitioners

from many countries, disciplines, and professional areas. As a part of a series of CERES publications, the volume attempts to contribute to the scientific debate about the food-biodiversity-climate nexus by developing a comprehensive region-specific and broader global understanding of the linkages between these areas, especially in the context of Global South. Instead of providing only modern science-based solutions for the nexus related challenges, the volume covers case studies that present mixed solutions, offering the use of traditional ecological knowledge in combination with modern science for both resilience and sustainability. This is increasingly instrumental in shaping the needed response options regarding the

economic, social, and environmental future of the world. Based on a multi-regional and cross-sectoral analysis, the approach consists of: assessing the different natural and anthropogenic factors currently affecting ecosystems and their services, especially the impacts of climate change; highlighting the different linkages between the state of biodiversity and food systems in many contexts and scales; and exploring the various response mechanisms to effectively manage the implications of such linkages. Most chapters provide inputs for future relevant research and policy agendas.

Drawing on Marxist-feminist theory, this book examines women's resistance to, and subversion of, patriarchal authority, as represented in Kuwaiti women's fiction. It demonstrates that Kuwaiti/Arabian Gulf women are not as

submissive as commonly (mis)represented in academia and the media.

Handbook of Research on Islamic Business Ethics Academic Conferences and publishing limited

This study addresses the derivatives instruments in Islamic finance and highlights their benefits and legal aspects. It also discusses the forward, futures and options contracts in commodity markets. Arguments both in favour of and against these instruments are addressed and several alternatives are examined as well.

A study of the changes that have taken place in the various sectors of the economy and the factors that currently influence economic development and

policy in Saudi Arabia. The effects of the changes in oil revenues on the economy and the Kingdom's development strategy are discussed.

Natural Mycotoxin Contamination in Humans and Animals Lulu.com

This unique book focuses on environmental degradation in Asian countries including land degradation and soil erosion. The land degradation covers assessing environmental degradation using geospatial technology, land use land cover mapping, environmental and anthropogenic degradation, assessment of land degradation vulnerability, evaluation of the impact of earthquake and the environmental control of the sand dunes. It also addresses the soil degradation and environmental pollution and presents several case studies such

as tectonic activity and erosion, assessment of aircraft sound, soil degradation assessment for the arid territories, soil pollution, waste engine oil contamination, soil degradation, soil erosion modelling, land use and land cover change and its effect on soil erosion changes. Additionally, the book discusses the impact of climate change, and human activities including urban environmental quality, air pollution and the impact of armed conflict on the environment. Moreover, topics such as vegetation degradation including forest changes, hydrological and agricultural drought are presented. The book includes authors and scientists from Egypt, Iraq, Iran, India, Mongolia, United Arab Emirates, Uzbekistan, Republic of Kazakhstan, USA, Turkey, South Africa,

Italy, China, Malaysia, Poland and Russia. Graduate students, researchers, engineers, policy planners, policymakers and stockholders could benefit from the information and the knowledge in this book.

ICIE 2016 Proceedings of the 4th International Conference on Innovation and Entrepreneurship EuroScicon

Thank you to the participants “Co-Author’s “ for accepting the invitation to participate in this important BOOK NAME “ sustainable development” COMPILED BY Dr. mervat massoud Gaballah Aly kATOUSH and that important and indispensable issue in our current time. The green economy and sustainable development have become a key element in raising individuals’ awareness of sustainable development and

achieving a sustainable future. Sustainable. And I thinking that its means that individuals are able to have the necessary skills to provide creative solutions to environmental problems in order to preserve them. According to the importance of the book Sustainable Development, “Sustainable development is the ability to ensure the satisfaction of the needs of the present without sacrificing the needs of future generations. Sustainable development also focuses on the two concepts of needs and the specifics of the basic needs of the world’s poor, according to the Third Millennium Declaration - which defines the parameters of (60) goals of For peace, development, the environment, human rights, and vulnerability, it is based on a core set of

values that are articulated as follows. We take into account the core values to be fundamental in international relations during the 21st century, which included

- 1- Freedom: for men and women without discrimination
- 2- Equality: a right for all individuals in society
- 3- Solidarity: Global challenges should be dealt with in a way that includes equitable distribution of resources
- 4- Tolerance: Individuals should be respected and a culture of peace should be promoted
- 5- Shared responsibility: Protecting society from all threats facing international peace and security is a shared responsibility among nations in the world.

My wishes: to All the Readers: An Enjoyable Reading.
ECISM 2017 11th European Conference on Information Systems Management
 Academic Conferences Limited

These proceedings represent the work of authors at the 13th European Conference on e-Government (ECEG 2013). The Conference this year is hosted by the University of Insubria in Como, Italy. The Conference Chair is Professor Walter Castelnovo and the Programme Chair is Professor Elena Ferrari, both are from the Department of Theoretical and Applied Sciences at the University of Insubria. The opening keynote address is given by Dr Gianluca Misuraca from the European Commission, Joint Research Centre, Institute for Prospective Technological Studies, Seville, Spain and Gianluca is addressing the topic "eGovernment: Past, Present & Future: A policy-research perspective for renewing governance in the digital age." The second day of the

conference is opened by Dr Antoinio Cordella from the London School of Economics, London, UK, who will talk about "Public value creation: the new challenge for e-government policies." ECEG brings together, researchers, Government officials and practitioners in the area of e-Government from around the world. Participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community. With an initial submission of 153 abstracts, after the double blind, peer review process there are papers published in these Conference Proceedings from 40 countries including Australia, Austria, Belgium, Brazil, Canada, China, Costa Rica, Croatia, Denmark, Egypt, Germany,

Greece, India, Iran, Iraq, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, UK and USA. This will ensure a very interesting two days.

This Research Topic will honor Prof. M. Iqbal Choudhary for his pioneering contribution in the field of Bioorganic, Synthetic, and Natural Product Chemistry. Prof. M. Iqbal Choudhary is Director and Professor of Bioorganic and Natural Product Chemistry at the International Center for Chemical and Biological Sciences (H. E. J. Research Institute of Chemistry and Dr. Panjwani Center for Molecular Medicine and Drug

Research), Pakistan and Coordinator General COMSTECH. Since 1990, Prof. Choudhary has been among the world leaders in the field of natural product chemistry, and has made pioneering contributions in the discovery of novel natural products. Prof. Choudhary has 1,212 publications (cumulative impact of > 2500) with 33,550 citations (h index 76) in the fields of organic and bioorganic chemistry. He also published 94 patents (64 US Patents), 90 books and 40 chapters in books, published by major U.S. and European presses. He discovered many potent anti-epileptic and anti-leishmanial compounds from indigenous medicinal plants that are under clinical trials. His contributions to reverse bacterial resistance to antibiotics represent seminal

contributions in this important field. He has trained hundreds of young researchers, especially women, from across the Afro-Asian region in natural product chemistry and established several research centers in Pakistan, and helped to setup research units in Africa, and South and Central Asia. His scientific contributions have been recognized by prestigious national and international awards and honors, and fellowships of several academies of science.

Re-emergence of Natural Products for Drug Discovery in Honor of Prof. Dr. M. Iqbal Choudhary Academic Conferences and publishing limited

This book presents a review of the existing literature on natural mycotoxins to create a comprehensive reference for mycotoxin levels. Each entry includes

contamination, concentration rate, mostly mean mycotoxin concentration of organs (human and animal) and country of origin of the sample. Due to the serious spoilage and health issues the presence of mycotoxins can cause, it is imperative that corresponding scientists, health institutions and the food and feed industries have a more qualified understanding of mycotoxins in living things. To this end, *Natural Mycotoxin Contamination in Humans and Animals* provides an excellent resource. The present book complements the series of the author's previous books, *Mycotoxins in Feedstuffs* and *Mycotoxins in Foodstuffs*, in that it is a review of the literature to create a comprehensive reference for mycotoxin levels. As with *Mycotoxins and their Metabolites in*

Humans and Animals, the focus remains the same, but the scope now covers natural mycotoxins only. Comprehensive reference of natural mycotoxin levels in humans and animals Easy-to-use database of mycotoxins Each entry is comprehensive

The Handbook of Research on Islamic Business Ethics is an essential source for policymakers and researchers to gain an understanding of pressing ethical issues in the Islamic business world. The primary objective is to provide readers with an insight into the ethical principles that govern Islamic business conduct. These principles are articulated with a view to evaluating whether business actors uphold their social responsibilities

and are committed to ethical values in their conduct. Exploring the interweaving relationship between Islamic business ethics and the market, this Handbook examines the critical role that ethics can play in ensuring that business thrives. It offers theoretical perspectives on research and goes beyond the conventional treatment of Islamic ethics. It debates important

market issues and asserts that social actors in the Islamic business world should be cognisant of these issues so as to behave in a moral and responsible manner. Implications for researchers and for market conduct are illuminated. Readers wanting to familiarize themselves with day-to-day Islamic business ethics will find this Handbook an invaluable guide.
