For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to

patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of

patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

The so-called Slovak question asked what place Slovaks held—or should have

held—in the former state of Czechoslovakia. Formed in 1918 at the end of World War I from the remains of the Hungarian Empire, and reformed after ceasing to exist during World War II, the country would eventually split into the Czech Republic and Slovakia after the “Velvet Divorce” in 1993. In the meantime, the minority Slovaks often clashed with the majority Czechs over their role in the nation. The Slovak Question examines this debate from a transatlantic perspective. Explored through the relationship between Slovaks, Americans of Slovak heritage, and United States and Czechoslovakian policymakers, it shows how Slovak national activism in America helped the Slovaks establish a sense of independent identity and national political assertion

after World War I. It also shows how Slovak American leaders influenced US policy by conceptualizing the United States and Slovakia as natural allies due to their connections through immigration. This process played a critical role in undermining attempts to establish a united Czechoslovakian identity and instead caused a divide between the two groups, which was exploited by Nazi Germany and then by other actors during the Cold War, and proved ultimately to be insurmountable. *Taxmann's CRACKER for Environmental Social Governance (ESG) | Principles & Practice (Paper 1 | ESG) - Past exam questions (topic-wise) & answers | CS Professional | New Syllabus | June 2024 Exam* Taxmann Publications Private Limited

Main author Ravi S. Iyer created the eklavyasai.blogspot.com blog and used it from September 2011 to play a part-time, peaceful and amicable, Indian Computer Science (CS) and Information Technology (IT) academic reform, Internet-based activist role. His focus was on improving the practice of software development in Indian CS & IT academia. But he thought that it is such a vital part of the CS & IT field and that it is so poor in many parts of Indian CS & IT academia, that he referred to his efforts as Indian CS & IT academic reform activism. Other contributors to the blog have given their views on certain topics. Main work period has been from 2011 to 2014 with a little work later, off & on. The main author is no longer active in this area. This book is aimed at helping

other activists involved in improving the practice of software development in Indian CS and IT academia to get the views of the blog in a convenient form. The book may also be of interest to similar activists in other countries. About the author: Main author Ravi S. Iyer is a Physics graduate from Ruia college, University of Bombay (Mumbai) who was industry trained and later self-taught in software development. He worked in the international software industry (US, Europe, Japan, South Korea, India etc.) developing systems as well as applications software (CS & IT) for over 18 years after which he retired from commercial work. Later, mainly as a "visiting faculty", he offered free service of teaching programming courses (lab. courses) and being a "technical

consultant" for student projects in a Maths & Computer Science department of a deemed university in India for 9 years.

ICSI CSEET 2024 : Company Secretary Executive Entrance Test - 10 Mock Tests and 8 Sectional Tests (1400 Solved Practice Questions)

Unforgettable Taylor & Francis

The Global Collaboration initiatives related in this book are examples of how educators have experimented with different mechanisms to provide science, technology, engineering and

mathematics (STEM) education programmes through information and communication technologies. In many cases, these programmes have looked at the allied personal communication and collaboration skills that students of these subjects also need: the so-called STEM+ curriculum. In particular, these approaches to STEM+ provision show how the internationalization of education can be made more effective and accessible through the exploitation of collaborative technologies and non-traditional pedagogies. The approaches address the following themes: technologies for distance learning and collaboration pedagogies for online learning remote communication and collaboration An international perspective is made possible within the

book through the inclusion of authors from North America, Europe and Asia. These authors present case studies from technology-enhanced learning projects over the past six years.

Dying in America Taylor & Francis
ECPA 2014 Christian Book Award Winner (Non-Fiction)! Fifty years after his death, C. S. Lewis continues to inspire and fascinate millions. His legacy remains varied and vast. He was a towering intellectual figure, a popular fiction author who inspired a global movie franchise around the world of Narnia, and an atheist-turned-Christian thinker. In *C.S. Lewis—A Life*, Alister McGrath, prolific author and respected professor at King's College of London, paints a definitive portrait of the life of C. S. Lewis. After thoroughly examining

recently published Lewis correspondence, Alister challenges some of the previously held beliefs about the exact timing of Lewis's shift from atheism to theism and then to Christianity. He paints a portrait of an eccentric thinker who became an inspiring, though reluctant, prophet for our times. You won't want to miss this fascinating portrait of a creative genius who inspired generations.

The rapidity of change in education has intensified in recent years. With the emergence of 'co-operative schools' and a new framework focusing heavily on co-operation, a direct challenge to ways of thinking about education, at both school

and university level, has developed. Co-operation, Learning and Co-operative Values addresses the urgent need to describe, analyse and assess the growth of co-operative education. The relationship between co-operation and education is a complex process and this book critically reflects on the tensions and obstacles facing this movement. It brings together the contributions of academics and practitioners from a range of backgrounds, and explores topics including: Theories and histories of co-operative values and principles Critical views of the practice of co-operative education Case studies of processes in action from both schools and higher education Co-operative education in a wider context This book provides an essential introduction to a

new and expanding area of research with chapters by many leading commentators in education. It will be of interest to researchers and educators interested in education and social policy.

We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets. To turn it off is escapist, but to attempt to cognitively grapple with it is overwhelming. In *Unforgettable: Enabling Deep and Durable Learning*, a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion. Humans crave explanatory patterns, and this book

enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking. An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses. Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges.

The Singularity Is Nearer A&C Black

To get the best answer-in business, in life-you have to ask the best possible question. Innovation expert Warren Berger shows that ability is both an art and a science. It may be the most underappreciated tool at our disposal, one we learn to use well in infancy-and then abandon as we grow older. Critical to learning, innovation, success, even to happiness-yet often discouraged in our schools and workplaces-it can unlock new business opportunities and reinvent industries, spark creative insights at many levels, and provide a

transformative new outlook on life. It is the ability to question-and to do so deeply, imaginatively, and “beautifully.” In this fascinating exploration of the surprising power of questioning, innovation expert Warren Berger reveals that powerhouse businesses like Google, Nike, and Netflix, as well as hot Silicon Valley startups like Pandora and Airbnb, are fueled by the ability to ask fundamental, game-changing questions. But Berger also shares human stories of people using questioning to solve everyday problems-from “How can I adapt my career in a time of constant change?” to “How can I step back from the daily rush and figure out what really makes me happy?” By showing how to approach questioning with an open, curious mind and a willingness to work

through a series of “Why,” “What if,” and “How” queries, Berger offers an inspiring framework of how we can all arrive at better solutions, fresh possibilities, and greater success in business and life.

Process, Liquidation & Winding-up: An Overview

Proceedings of the United States

Naval Institute Tyndale House Publishers, Inc.

We live in a radically skeptical age.

Tough questions are being asked about Christianity. And most believers are ill-equipped to provide the answers our culture and communities desperately need. Many in today's church do not know the Bible as well as they should and they struggle with their own "big questions" about the faith. After receiving more than four thousand questions at his Christian Thinkers Society events over the span of six years, Dr. Jeremiah Johnston began to recognize six categories of recurring, trending questions that dominated the

rest. In Unanswered, he tackles these tough issues that plague the minds of believers but are rarely addressed in church, such as... Why is it that God often seems to remain silent? How can we trust in the bodily resurrection of Jesus, and what does it mean for us today? What do Christians need to understand about suicide and mental illness? How should Christians respond

to spiritual darkness and the obsession with paranormal activity? Why is biblical illiteracy so dangerous for Christians and the church? Why do we experience suffering and pain? Unanswered will leave you enriched, characterized by a thinking faith, capable to communicate confidently, and committed to escape the tendency to offer trite answers to a skeptical world.
