Adopting a truly global, theoretical and multidisciplinary perspective, *Media Pluralism and Diversity* intends to advance our understanding of media pluralism across the globe. It compares metrics that have been developed in different parts of the world to assess levels of, or threats to, media pluralism.

The Criminalization of European

Cartel Enforcement Routledge

The most important book yet from the author of the international bestseller *The Shock Doctrine*, a brilliant explanation of why the climate crisis challenges us to abandon the core “free market” ideology of our time, restructure the global economy, and remake our political systems. In short, either we embrace radical change ourselves or radical changes will be visited upon our physical world. The status quo is no longer an option. In *This Changes Everything* Naomi Klein argues that climate change isn’t just another issue to be neatly filed between taxes and health care. It’s an alarm that calls us to fix an economic system that is already failing us in many ways. Klein meticulously builds the case for how massively reducing our greenhouse emissions is our best chance to simultaneously reduce gaping inequalities, re-imagine our broken democracies, and rebuild our gutted local economies. She exposes the ideological desperation of the climate-change deniers, the messianic delusions

of the would-be geoengineers, and the tragic defeatism of too many mainstream green initiatives. And she demonstrates precisely why the market has not—and cannot—fix the climate crisis but will instead make things worse, with ever more extreme and ecologically damaging extraction methods, accompanied by rampant disaster capitalism. Klein argues that the changes to our relationship with nature and one another that are required to respond to the climate crisis humanely should not be viewed as grim penance, but rather as a kind of gift—a catalyst to transform broken economic and cultural priorities and to heal long-festered historical wounds. And she documents the inspiring movements that have already begun this process: communities that are not just refusing to be sites of further fossil fuel extraction but are building the next, regeneration-based economies right now. Can we pull off these changes in time? Nothing is certain. Nothing except that climate change changes everything. And for a very brief time, the nature of that change is still up to us.

This volume examines how various forms of governance have emerged in South Asia after colonialism, and the developmental and conflict-related challenges the region faces. Drawing from the contexts of India, Sri Lanka and Nepal, it highlights the degree of institutionalization of democracy. The book further points to the manner in which shortcomings in governmental arrangements intersect with the

prevalence of conflict at the national as well as sub-national levels. It showcases that democratic and more authoritarian cultures have influenced developmental successes and failures, and reveals how (external) interventions and policy reforms in the name of development have led to diverse outcomes in different South Asian countries.

Handbook on Electricity Markets

"Americans are using new strategies and tools to renew democracy and curb unbalanced corporate power. STILL ESSENTIAL: The Citizens United decision continues to distort the electoral process and expand the power of corporations; UPDATED THROUGHOUT: This second edition details both the ruling's expanding damage to democracy and, in an all-new chapter, how citizens can lead the battle against it. The Supreme Court's Citizens United ruling that corporations are people eliminated campaign finance restrictions and dramatically increased corporate power, but attorney Jeff Clements shows how you can fight back. Clements explains the strange history of how the Supreme Court came to embrace a concept that flies in the face of not only all common sense but most of American legal history as well. He shows how unfettered corporate rights will impact public health, energy policy, the environment, and the justice system. In this new edition Clements details Citizens United's ongoing destructive effects-for example, Chevron was able to spend \$1.2 million to influence a single local election in a city of 100,000 people. But he also describes the growing movement to reverse the ruling-since the first edition 16 states, 160 members of Congress, and 500 cities and towns have called for a Constitutional amendment to

overturn Citizens United. And in a new chapter, Do Something!, Clements shows how-state by state and community by community-Americans are using new strategies and tools to renew democracy and curb unbalanced corporate power. A plain-English guide to the disastrous practical consequences of the bizarre legal doctrine of corporate personhood enshrined most recently in the Supreme Courts Citizens United decision; Features a constitutional amendment designed to overturn Citizens United and restore the government to the people; Includes a tool kit to help citizens mount a grassroots campaign to pass the Peoples Rights amendment; The January 2010 Supreme Court Citizens United v. Federal Election Commission decision marked a culminating victory for the legal doctrine of corporate personhood. Corporations, as legal persons, are now entitled to exercise their alleged free-speech rights in the form of campaign spending, effectively enabling corporate domination of the electoral process. Jeffrey Clements uncovers the roots, expansion, and far-reaching effects of the strange and destructive idea, which flies in the face of not only all common sense but, Clements shows, most of American legal history, from 1787 to the 1970s. He details its impact on the American political landscape, economy, job market, environment, and public health and how it permeates our daily lives, from the quality of air we breathe to the types of jobs we can get to the politicians we elect. Most importantly, he offers a solution: a constitutional amendment to reverse Citizens United and tools readers can use to mount a grassroots drive to get it passed. Overturning Citizens United is not about a triumph of one political ideology over

another, it's about restoring the democratic principles on which America was built. Republican president Theodore Roosevelt and conservative Supreme Court Chief Justice William Rehnquist both vocally opposed the idea of corporate personhood. Community by community, state by state, we can cross party and ideological lines to form a united front against unchecked corporate power in America and reinstate a government that is truly of, by, and for the people."--

Lawrence Alloway (1926-1990) was a key figure in the development of modern art in Europe and America from the 1950s to the 1980s. He is credited with coining the term pop art and with championing conceptual art and feminist artists in America. His interests as a critic and as a curator at the Solomon R. Guggenheim Museum in New York were wide-ranging, however, and included architecture, design, earthworks, film, neorealism, science fiction, and public sculpture. Early in his career he was associated with the Independent Group in London and although he was largely self-taught, he was a noted educator and lecturer. A prolific writer, Alloway sought to escape the conventions of art-historical discourse. This volume illuminates how he often shaped the field and anticipated approaches such as social art history and visual and cultural studies. Lawrence Alloway: Critic and Curator provides the first critical analysis of the multiple facets of Alloway's life and career, exploring his formative influence on the disciplines of art history, art criticism, and museum studies. The nine essays in this volume depend on primary archival research, much of it conducted in the Lawrence Alloway

Papers held by the Getty Research Institute. Each author addresses a distinct aspect of Alloway's eclectic professional interests and endeavors.

The Mighty Totara: The Life and Times of Norman Kirk Edward Elgar Publishing

With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) – and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit out flows – the various governments, both individually and through cooperative initiatives, have devised new international tax strategies that are proving to be of great interest and value to other countries, both developing and developed. The core of these strategies addresses the necessity of stemming the out flow of revenue while strongly supporting FDI, both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law, considering topics such as the following: – information exchange procedures and pitfalls; – response to the OECD's Base Erosion and Profit-Sharing (BEPS) initiative; – role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; – thin capitalization; – transfer pricing; – controlled foreign corporation rules; – shortcomings related to authorities' limited manpower; – international audit and investigation procedures; – the

BRICS approach to residence and mandatory and binding arbitration; and – the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities, as well as with leading BRICS academics and practitioners. Tax cases, together with human rights and investment cases and administrative guidelines in all ve countries are also included in the analysis. The study concludes with recommendations for improving each of the ve countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS' international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance: an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance of cials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities.

Over the past decade the European Union (EU) has gradually developed the European Neighbourhood Policy (ENP) with its neighbours. At the same time, the 'neighbours of the EU's neighbours' have presented new challenges. This

book addresses the EU's broader neighbourhood, comprising of the ENP countries and the neighbours of its neighbours. With specific focus on Saharan Africa, the Middle East and Central Asia, it discusses trans-regional policy issues that arise from the EU's relations with regions beyond the ENP. Based on an interdisciplinary, policy-oriented approach, this volume explores major political, legal, security and socio-economic challenges and identifies opportunities for cooperation across the EU's broader neighbourhood. This book will be of interest to students, experts and scholars interested in EU affairs and politics, international relations, EU and international law, diplomacy and area studies.

Lessons for the Future Springer The Gambian economy is still recovering from the severe drought and crop failure. Depreciation pressure on the Dalasi has largely been driven by weaknesses in the balance of payments and uncertainty about exchange rate policy. Executive Directors have urged the government to curb domestic borrowing and to sustain the fiscal adjustment needed to reduce the high cost and risks of domestic debt. They have also commended the progress achieved toward eliminating fiscal dominance and encourage implementing a restrained monetary policy.

Governance, Conflict and Development in South Asia OUP Oxford

Economics for People and the Planet, a collection of essays by James K. Boyce on the environment, inequality and the

economy, argues that there is not an inexorable trade-off between advancing human well-being and having a clean and safe environment. The goal of economic policy should be to grow the good things that improve our well-being and environmental quality and reduce the bad things that harm humans and nature. To reorient the economy for these ends, we will need to achieve a more egalitarian distribution of wealth and power. Global climate change – the most pressing environmental challenge of our time – adds urgency to this task and creates historic opportunities for moving towards a greener future.

CEPOL aims is to bring together senior police officers from across Europe to share research and best practice, to encourage cross-border cooperation in the fight against crime and to help facilitate training and exchange programmes between European police forces. However, in March 2013, the Commission presented a proposal for a new Europol Regulation, one effect of which would have been to merge CEPOL with Europol. The Committee, the Government, the Directors of Europol and CEPOL, the European Parliament and the Council all opposed the proposed merger. A separate Regulation on CEPOL was therefore proposed. The new draft Regulation would allow CEPOL "broader objectives" and "modernised governance". The Government supports the work of CEPOL but is unhappy with a number of proposals in the Regulation,

including the removal of the requirement that all attendees on CEPOL courses should be senior police officers, and the suggestion that Member States should designate a national unit to contribute to CEPOL's work programmes. The Committee points out that there are legal reasons why the UK must, at some stage, opt-in to the Regulation. It recommends that the Government to do so now, to give the UK a place at the negotiating table when the draft Regulation is discussed.

International Law, New Diplomacy and Counterterrorism Naval Institute Press

This interdisciplinary book explores how terrorism is meant to target a government's legitimacy, and advocates for sounder defensive measures when countering international attacks. The dramatic increase in global cooperation throughout the twentieth century—between international organisations and their state missions of diplomats, foreign officers, international civil servants, intelligence officers, military personnel, police investigators, judges, legislators, and financial regulators—has had a bearing on the shape and content of the domestic political order. The rules that govern all of these interactions, and the diplomats engaged to monitor and advocate for compliance, have undergone a mushrooming development following the conclusion of each world war. This dramatic growth is arguably the most significant change the international structure has experienced since the inception of the state-based system ushered in with the Peace of Westphalia in 1648. *International Law, New Diplomacy and Counterterrorism* explores the impact of this growth on domestic legitimacy through the integration of two disciplines:

international law and political philosophy. Focusing particularly on the cross-border counterterrorism actions launched by the United States, the author investigates how civil societies have often turned to the standards of international law to understand and judge the legitimacy of their government's counterterrorism policies reaching across international borders. The book concludes that those who craft counterterrorism policies must be attentive to defending the target of legitimacy by being wholly mindful of the realms of legality, morality and efficacy when exercising force. This book will be of much interest to students of international law, diplomacy, counterterrorism, political philosophy, security studies and IR.

Disputes in the energy and natural resources sector are at the heart of international arbitration. With more arbitrations arising in the international energy sector than in any other sector, it is not surprising that the highest valued awards in the history of arbitration come from energy-related arbitrations. Energy disputes often involve complex and controversial issues relating to security, sovereignty, and public welfare.

International Arbitration in the Energy Sector puts international energy disputes into a global context, providing broad coverage of different forms and systems of dispute resolution across both renewable and non-renewable sectors. With contributions from leading practitioners, arbitrators, academics, and industry experts from across the globe, the eighteen chapters in the book enable readers to compare the approaches to, and learnings from, energy arbitrations across various legal

systems and geographic regions. After outlining the international energy arbitration legal framework, the text delves into a detailed analysis of the problems which regularly arise in practice. These include, among other things, commercial disputes in Part I (e.g. over the upstream oil sector and long-term gas supply contracts), investor-state disputes in Part II (e.g. under the Energy Charter Treaty), and public international law disputes in Part III (e.g. concerning international boundaries and the distribution of natural resources). Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes, which raise important questions about enforcing sustainability objectives on individuals, corporations, and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties, and other international legal instruments, as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector.

"In challenging popular misperceptions, Langworth has taken Churchill out of the clutches of both the worshipful and the iconoclasts, thus giving him over to the appreciative..those who can look at him, warts and all."--Warren Kimball, editor of Churchill & Roosevelt: The Complete Correspondence "No one alive knows more about Winston Churchill than Richard Langworth, his vicar on earth. This superb book lays bare the lies told by some, but also reveals new truths about The Greatest Englishman."-- Andrew Roberts, Lehrman Institute Distinguished Scholar, New-York Historical Society "No one is better qualified than Richard Langworth, a lifelong student of Churchill, to strip away the falsehoods that belittle the personality, the career and the greatness of this giant historical figure."-- Paul Addison, University of Edinburgh. Winston Churchill, indispensable when liberty was in peril, died in 1965. Yet he is still accused of numerous sins, from alcoholism and racism to misogyny and warmongering. On the Internet, he simmers in a stew of imagined misdeeds--using poison gas, firebombing Dresden, causing the Bengal famine, and so on. Drawing on the author's fifty years of research and writing on Churchill, this book uncovers scores of myths surrounding him--the popular and

the obscure--to reveal what he really said and did about many issues. Churchill had two personas--one that thought deeply about the nature of humanity, and one that helped to solve seemingly intractable problems. In his many decades in public life, he made mistakes, but his faults were eclipsed by his virtues.

50 years of fostering trade competitiveness around the globe generated a wealth of experience and expertise. ITC gained invaluable insights and learned many lessons in supporting SMEs in developing, least developed and transition economies to enhance their competitiveness and to internationalize. While ITC's mandate has remained unchanged over the last five decades, the trade landscape has altered radically and with it the manner in which ITC has delivered its trade-related technical assistance. The rise of a multi-polar global economy gave way to new trade, market and investment opportunities. A technological revolution transformed the way business is being transacted around the world. The multilateral, regional and bilateral trade regime matured and new governance patterns in international trade emerged in the form of supply chain trade.

First Review Under the Extended Credit Facility, Request for Nonobservance of Performance Criterion, and Request for Rephasing of Reviews United Nations Tibet's enduring myth, animated by the tales of Himalayan adventurers, British military expeditions, and the novel, *Lost Horizon*, remains an inspirational fantasy, a modern morality play about the failure of brutality to subdue the human spirit. Tibet also exercises immense "soft power" as one of the

lenses through which the world views China. This book traces the origins and manifestations of the Tibetan myth, as propagated by Younghusband, Madam Blavatsky, Himmler, Acheson and Roosevelt. The authors discuss how, after WW2, Tibet-- isolated, misunderstood and with a tiny elite unschooled in political-military realities -- misread the diplomacy between its two giant neighbours, India and China, forlornly hoping London or Washington might intervene. China's People's Liberation Army sought nothing less than to deconstruct traditional Tibet, unseat the Dalai Lama and "absorb" this vast region into the People's Republic, and Lhasa succumbed to China's invasion in 1950. Drawing on declassified CIA and Chinese documents, the authors reveal Mao's collusion with Stalin to subdue Tibet, double-dealing by Nehru, the brilliant diplomacy of Chou en Lai and how Washington see-sawed between the China lobby, who insisted there be no backing for an independent Tibet, and Presidents Truman and later Eisenhower, who initiated a covert CIA programme to support the Dalai Lama and resist Chinese occupation. It is an ignoble saga with few, if any, heroes, other than ordinary Tibetans.

There is now almost universal acceptance that tax law is overly complex and indeterminate; and yet, there has to date been no comprehensive assessment of the role of

the tax authority in the current arrangement. If the legislation and case law offer few immediate answers to the taxpayer, then the role of Her Majesty's Revenue & Customs (HMRC) in advising taxpayers becomes more apparent. This monograph contends that the provision of advice by HMRC is desirable by virtue of the rule of law and it follows that any such advice should be correct, clear, accessible and reliable. Additionally, there should exist some means of scrutinising the advice in order to check that it satisfies these criteria. Tax Authority Advice and the Public explores this view of HMRC's role in tax collection. It explains the deficiencies in the current system in this light, highlighting the pitfalls for taxpayers and practitioners as well as the potential remedies. Finally, the book assesses potential reforms which could be adopted in order to alleviate existing problems. A timely and ambitious work, this book is essential reading for practitioners and academics interested in the interaction between tax administration and public law.
