This third edition is a basic textbook on the development of pipe organ composition in geographically diverse schools. Its nineteen chapters include charts of organ composers and a historical background of contemporary events and figures for each organ composition school. Chapter bibliographies cover readings published in the seventies, eighties, and early nineties. A listing of Bach organ compositions with pagination of various editions is also included.

The Organist's Handbook Edition Lade

Leopold Stokowski began his career in England as an organist and choirmaster. This first major study of Stokowski's early years covers his education at the Royal College of Music, his church posts in London, and his three years spent as director of music at New York's prestigious St. Bartholomew's Church. An examination of the programs of his organ recitals (played on the third largest organ in America), a list of his repertoire, facsimiles of his original choral works, an analysis of his Aeolian player organ roll of Bach's Passacaglia, and a detailed study of his famous orchestral transcriptions of Bach's organ works, reveals a new and unique

insight into Stokowski's unparalleled career in music.
