Thor I. Fossen

As a leading provider of control actuation plus micro-electro-mechanical systems (MEMS)-based and spinning-mass inertial sensors, Collins Aerospace offers precision guidance solutions to advanced missiles and munitions. Its targeting and guidance systems offer smart weapon solutions at low risk and an affordable cost.

Guidance, navigation and control (abbreviated GNC, GN&C, or G&C) is a branch of engineering dealing with the design of systems to control the movement of vehicles, especially, automobiles, ships, aircraft, and spacecraft. In many cases these functions can be performed by trained

humans.
