## JAMAL ALISSON

*A Brief Edition* CRC Press  
 A comprehensive introduction to green criminology, this book is a discussion of the relationship between mainstream criminal justice and green crimes. Focused on environmental harm within the context of criminal justice this book takes a global perspective and introduces students to different theoretical perspectives in green criminology. Looks at the victims of environmental crime throughout. Covers topics such as; wildlife crimes, animal abuse, the causes of environmental crime, regulation, exploitation, environmental activism, policing, prosecution and monitoring. Designed to help readers develop a thorough understanding of the

principles of environmental justice and green criminology, as well as contemporary developments, this book will be excellent support to students of green criminology and environmental crime. *Practice and Process* Waterside Press  
*Introduction to Criminology: Why Do They Do It?* presents a comprehensive and integrated approach to introductory criminology. Acclaimed authors and professors Pamela J. Schram and Stephen G. Tibbetts skillfully connect criminological theories to real-life cases to help students better understand criminology fundamentals. They thoroughly introduce theoretical perspectives that explain criminal behavior and are most respected by modern criminologists, while illustrating the theories with real-life examples such as street violence and property crimes. This text also includes many contemporary topics that are not well represented in

competing texts, such as cybercrime, hate crimes, white-collar crime, homeland security, and identity theft. *Why Do They Do It? - Interactive Ebook* SAGE Publications  
*Introduction to Criminology: A Brief Edition* provides students with coverage of core concepts supported by student-tested pedagogical tools that promote student engagement, thought-provoking classroom discussions, and critical-thinking skills. *International Criminology* Routledge  
*Introductory Criminology: The Study of Risky Situations* takes a unique and intuitive approach to teaching and learning criminology. Avoiding the fragmentation of ideas commonly found in criminology textbooks, Marcus Felson and Mary A. Eckert develop a more practical, readable structure that engages the reader and enhances their understanding

of the material. Their descriptive categories, simultaneously broad and realistic, serve better than the usual philosophical categories, such as "positivism" and "classicalism," to stimulate students' interest and critical thinking. Short chapters, each broken into 5–7 sections, describe situations in which crime is most likely to happen, and explain why they are risky and what society can and can't do about crime. They create a framework to organize ideas and facts, and then link these categories to the leading theories developed by criminologists over the last 100 years. With this narrative to guide them, students remember the material beyond the final exam. This fresh new text was created by two professors to address the main points they encounter in teaching their own criminology courses. Problems solved include: reluctant readers, aversion to abstract thinking, fear of theory, and boredom with laundry lists of disconnected ideas. Felson, a leader in criminology theory with a global reputation for innovative thinking, and Eckert, an experienced criminal justice researcher, are uniquely qualified to reframe criminology in a unified arc. By design, they offer abstractions that are useful and not overbearing; their prose is readable, and their concepts are easy to comprehend and remember. This new textbook challenges instructors to re-engage with theory and present the essence of criminological thought for adult learners, coaching students to grasp the concept before any label is attached and allowing them to emerge with deeper understanding of what each theory means and offers. Lean, with no filler or fluff like stock photos, *Introductory Criminology* includes the authors' graphics to crystallize and expand concepts from the text.

### **An Introduction to Sociological Criminology**

**Introduction to Criminology Why Do They Do It?** This full-colour textbook offers a fresh conceptual approach to understanding the intersections of crime, criminal justice and family life. In doing so, it proposes a brand new sub-discipline of Criminology that places the family at the heart of its analysis, offering a groundbreaking approach to the study of crime and deviance. Adopting an interdisciplinary perspective, this introductory text explores topics from across the spectrum of criminological scholarship, including youth justice, prisons, organized crime, family violence and homicide, and victimology. By drawing together these distinct topics and identifying and

discussing their familial connections, this book argues for the importance of family life in the theory and practice of crime and justice. Key questions discussed throughout the text include: How does the criminal justice system engage with families across different contexts? In what ways do crime and criminal justice processes impact on family life? In what ways can families transform the criminal justice system for the betterment of all? This book challenges commonly-held and simplistic assumptions about what the family is in relation to crime and justice and, by doing so, engages in deeper debates about human rights, social justice and the role of the state in relation to families and crime. It includes pedagogic features including conceptual toolboxes, questions for reflection, textboxes, a glossary and interviews with practitioners. *An Introduction to Criminology* Sage Publications, Incorporated

Criminology, or the study of crime, has developed rapidly as a subject in recent years, while crime and the problem of how to respond to it have become major concerns for society as a whole. This book provides a succinct, highly readable - and much needed - introduction to criminology for those who want to learn more, whether they are already studying the subject, thinking of doing so, or just interested to discover what criminology is about.

*Introducing Criminology* begins by asking basic questions: what is crime? what is criminology?, before examining the ways in which crime has been studied, and looking at the main approaches and schools of thought within criminology and how these have been developed. The authors focus particularly upon attempts to understand and explain crime by the disciplines of psychology and sociology, and consider also the impact of feminist and postmodern thought on the development of the subject. In the second part of the book the authors take three very different topics to illustrate themes raised in the first half of the book, exploring the particular issues raised by each topic, and showing how criminologists have gone about their work.

*Introduction to Criminology* Sage Publications, Incorporated

Now thoroughly updated with new articles, new content, and new statistics, tables, and figures, this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories, concepts, and research from sociology, psychology, genetics,

evolutionary biology, and the neurosciences. The new edition is divided into 15 sections that mirror chapters in a typical criminology textbook. Section 10 now focuses only on murder, rape, robbery, aggravated assault, and domestic violence, making it easier for students to absorb the material. New articles appear in the structural theories section, the sections devoted to violent crime, and throughout the text/reader as needed. The authors now more closely link sections on types of crime to sections on theory to give readers a more cohesive understanding of the connections between the two. Contemporary criminologists' favored theories (drawn from a survey of 770 criminologists) now appear in a table to give readers insight into the professional opinion today on criminological theories. Features: Each Section has a 15-page introduction (a "mini-chapter") that contains vignettes, photos, tables and graphs, end-of-chapter questions, and Web exercises, followed by three to four supporting readings. Theory Section introductions contain a unique table that compares and contrasts the theories presented, while theory concluding sub-sections focus on policy and crime prevention. A "How to Read a Research Article" guide (which appears prior to the first reading) illustrates key aspects of a research article. The book's readings are drawn from carefully selected, edited journal articles appropriate for an undergraduate audience.
