Intersections of Race, Class, Gender, and Nation in Fin-de-siècle Spanish Literature and Culture SAGE Publications

Using a concise and easy-to-understand style, this guide provides an integrated approach to the implications of social class, race and ethnicity, and gender—explaining how each relates to economic, social, and political inequality. Its straightforward perspective views the considerations of race and gender as central to a full appreciation of the composition and dynamics of class systems. A significant and effective organization incorporates fresh conceptualizations, new research findings, and census data, with the fundamentals of social stratification. Five-part organization: Part I gives a broad overview and introduction to the field; Part II provides an expanded discussion of the evolution and institutionalization of industrial class systems; Part III covers the basic elements of inequality: economics, prestige, and politics; Part Four includes separate chapters on life chances and lifestyles as well as class consciousness; and Part V offers an exploration of social mobility. As a useful reference for professionals in the fields of sociology, social problems, or race and minorities/gender. For undergraduate courses in Social Stratification, Race, Class, and Gender, and Introduction to Gender Studies.

*Making Sense of Race, Class, and
Gender* Taylor & Francis

"We live in a time where it has never been more important to be knowledgeable about a host of social issues, and to be confident and appropriate in how to talk about them. What's the best way to ask someone what their pronouns are? How do you talk about racism with someone who doesn't seem to get it? What is intersectionality, and why do you need to understand it? While it can seem intimidating or overwhelming to learn and talk about such issues, it's never been easier thanks to [the author]. Accessible to learners of all levels--from those just getting started on the journey to those already versed in social justice-- [this book] covers a range of topics, including race, gender, class, disability, relationships, family, power dynamics, oppression, and beyond. This essential guide is a radical but warm and non-judgmental call to arms, structured in such a way that you can read it cover to cover or start with any topic you want to learn more about."--Provided by publisher.

Gender, Race, and Class in Media provides students a comprehensive and critical introduction to media studies by encouraging them to analyze their own media experiences and interests. Editors Bill Yousman, Lori Bindig Yousman, Gail Dines, and Jean McMahan Humez explore some of the most important forms of today's popular culture—including the Internet, social media, television, films, music, and advertising—in three distinct but related areas of investigation: the political economy of production, textual analysis, and audience response. Multidisciplinary issues of power related to gender, race, and class are integrated into a wide range of articles examining the economic and cultural implications of mass media as institutions. Reflecting the rapid evolution of the field, the Sixth Edition includes 18 new readings that enhance the richness, sophistication, and diversity that characterizes contemporary media scholarship.

diversity of women's struggles against problems such as racism, violence, homophobia, focusing on the complex ways that gender, culture, race-ethnicity and class shape women's political consciousness in the US.

Inequality and Stratification Routledge
During the past decade, feminism and women's studies have been forced to acknowledge the diversities of women's experiences, as well as the patriarchal oppression that they share. The emphasis on difference has shattered the illusion of homogeneity and sisterhood which previously characterized white, middle-class Westernized feminist politics and analysis.; There is relatively little work which concentrates on the inter-relationships of race and gender in general, and the consequences of racism, for women of different backgrounds, in particular. "The Dynamics of Race and Gender" aims to contribute to the debate and understanding in this area. Emphasis has been given to age, class, disability, race and sexuality. The contributors to this volume are from different religious, cultural and ethnic backgrounds, giving a balanced and broad ranging perspective on this important social question.; Organized around three main themes, which are; issues of theory and method, questions of identity, racism and sexism at work, the chapters of this book indicate how the processes of race and gender interrelate in highly complex and contradictory ways. Demonstrating the benefits to be gained from analysing the interplay of various axes of differentiation in specific empirical and historical locations, and in doing so, under- scoring the point that diversity among women cannot be seen as a static phenomenon.

Using arresting case studies of how ordinary people understand the concepts of race, class, and gender, Celine-Marie Pascale shows that the peculiarity of commonsense is that it imposes obviousness—that which we cannot fail to recognize. As a result, how we negotiate the challenges of inequality in the twenty-first century may depend less on what people consciously think about "difference" and more on what we inadvertently assume. Through an analysis of commonsense knowledge, Pascale expertly provides new insights into familiar topics. In addition, by analyzing local practices in the context of established cultural discourses, Pascale shows how the weight of history bears on the present moment, both enabling and constraining possibilities. Pascale tests the boundaries of sociological knowledge and offers new avenues for conceptualizing social change. In 2008, *Making Sense of Race, Class and Gender* was the recipient of the Distinguished Contribution to Scholarship Book Award, of the American Sociological Association Section on Race, Gender, and Class, for "distinguished and significant contribution to the development of the integrative field of race, gender, and class."

This volume utilizes the cross-cultural, historical and ethnographic perspective of anthropology to illuminate the intrinsic connections of race, class and gender. She goes on to provide a critical analysis of the new scholarship on African-American women, and explores issues of race, class and gender in the arenas of work, kinship and resistance.

Sociological literature tends to view the social categories of race, class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity. This limited focus is clearly inadequate. *Systemic Crises of Global Climate Change* is an edited volume of 49 international, interdisciplinary contributions addressing global climate change (GCC) by intentionally engaging with the issues of race, gender, and class through an intersectional lens. The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional, and oftentimes reductionist, environmental science frame by examining issues within their turbulent political, cultural, and personal landscapes. Varied media and writing styles invite students and educators to reflexively engage different, yet complementary, approaches to GCC analysis and interpretation, mirroring the disparate voices and viewpoints within the field. The second volume, *Emergent Possibilities for Sustainability* will take a similar approach but will examine the possibilities for solutions, as in the quest for global sustainability. This book is a valuable resource for academics, researchers and both undergraduate and post-graduate students in the areas of Environmental Studies, Climate Change, Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC.

Understanding Race, Class, Gender, & Sexuality: A Conceptual Framework, Second Edition, is the only text that develops a theoretical framework for the analysis of intersectionality. Weber argues that these social systems are historically and geographically contextual power relationships that are simultaneously expressed and experienced at both the macro level of social institutions and the micro level of individual lives and small groups. This is also the only text that teaches students how to apply the theory to their own analyses. Originally published in its first edition as two separate books, the second edition integrates the main text and the case studies into one volume. As in the previous edition, Weber uses

education as an extended example to show students how to conduct a race, class, gender, and sexuality analysis. With completely updated data, this edition adds important new research in sexuality, globalization, and education. It also features new case studies, including one on Hurricane Katrina and another on the 2008 Presidential election.

Understanding Race, Class, Gender, & Sexuality: A Conceptual Framework, Second Edition, can be used in a variety of courses: in social inequality, communication, women's and gender studies, ethnic studies, American studies, sociology, political science, human services, and public health.
