### **Water Resources Paper**

Springer Nature

This book examines localism as a political idea and policy approach and explains what localism is about, why it is growing in importance and how it relates to other themes in

politics. Illustrated with case studies from the United Kingdom, mainland Europe and the Indian sub-continent, the book analyses localism in conceptual and theoretical terms and locates it within the overall landscape of political thought. Key themes covered in the book include place, space and scale;

decentralization and devolution; multi-level governance; public value; democracy and empowerment; and political design. With the focus on the bottom-up, constructivist aspects of localism, the book argues that localism is most likely to work successfully in a political order where sovereignty is 'distributed' across

various social spheres and levels of government. It offers a comprehensive view of localism by synthesizing its various strands and creating a distinctive framework for design and evaluation. This book will be of particular interest to scholars, students and practitioners of localism, particularly within local and regional government, public administration and policy, human and political geography, and urban studies. Building on a series of ESRC funded seminars, this edited collection of expert papers by academics and practitioners is concerned with access to civil and administrative justice in constitutional democracies, where, for the past decade governments have reassessed their priorities for funding legal services:

embracing 'new technologies' that reconfigure the delivery and very concept of legal services; cutting legal aid budgets; and introducing putative cost-cutting measures for the administration of courts, tribunals and established systems for the delivery of legal advice and assistance. Without underplaying the future potential of technological innovation, or the need for a fair and rational system for the prioritisation and funding of legal services, the book

questions whether the absolutist approach to the dictates of austerity and the promise of new technologies that have driven the Coalition Government's policy, can be squared with obligations to protect the fundamental right of access to justice, in the unwritten constitution of the United Kingdom.

Malaysia's natural resources and its well-educated population are

some of the many credentials that keep the country in good stead, with priorities centred on preparing for the ASEAN Economic Community in 2015 and steering the policy framework toward more inclusive political representation. The economy is built around global trade, and the government is working to encourage greater private investment. Malaysia's GDP per capita is the highest in South-east Asia, with the exception of smaller countries like Singapore and Brunei

Darussalam, \$ reaching 10,548 in 2013 based on a GDP of \$ 307.25bn and a population of almost 30m. The country produces 39% of the world's palm oil and 44% of its exports, and Increasing global demand for the commodity Bodes well for the industry. Malaysia has seen its stock rise in the World was Bank's Annual " the Ease of Doing Business" report, moving up to 6th position in 2014 from 8th the previous year. 's Avatar Recent times have seen the Government

push hard for a Greater role for the : private sector in the country's development, with the various Government Programmes aiming to boost Transparency, accountability and Sustainable Growth. The overall aim of these plans is to elevate Malaysia to become a high -income country by 2020. Handbook of Climate Change Across the Food Supply Chain Cambridge University Press A series of titles written to cover the complete Cambridge IGCSE

Mathematics (0580) syllabus and endorsed by Cambridge International Examinations. Cambridge IGCSE Mathematics Extended Practice Book offers a wealth of questions, with hints and tips along the way to reinforce skills and learning. It provides comprehensive and targeted exercises ensuring plenty of practice both for the classroom and for independent learning. With concise reminders at the start of each topic, and hints in the margin, it

is designed to work as a stand alone practice tool that will successfully accompany any IGCSE mathematics textbook. Those using the Cambridge Coursebook will find this a complementary asset with extra questions. For additional exam practice, access to full exam-style papers is also available. The Report: Malaysia 2014 Edward Elgar Publishing  
Kurds are the largest stateless people in the world. An estimated thirty-two million Kurds

live in "Kurdistan," which includes parts of Turkey, Iraq, Syria, and Iran today's "hot spots" in the Middle East. The Kurdish Spring explores the subjugation of Kurds by Arab, Ottoman, and Persian powers for almost a century, and explains why Kurds are now evolving from a victimized people to a coherent political community. David L. Phillips describes Kurdish rebellions and arbitrary divisions in the last century, chronicling the nadir of Kurdish experience in the 1980s.

He discusses draconian measures implemented by Iraq, including use of chemical weapons, Turkey's restrictions on political and cultural rights, denial of citizenship and punishment for expressing Kurdish identity in Syria, and repressive rule in Iran. Phillips forecasts the collapse and fragmentation of Iraq. He argues that US strategic and security interests are advanced through cooperation with Kurds, as a bulwark against ISIS and

Islamic extremism. This work will encourage the public to look critically at the post-colonial period, recognizing the injustice and impracticality of states that were created by Great Powers, and offering a new perspective on sovereignty and statehood.

*The Routledge Handbook of Magazine Research*  
CRC Press

This book offers a unique understanding of what administrative justice means in Wales and for Wales, whilst also

providing an expert and timely analysis of comparative developments in law and administration. It includes critical analysis of distinctly Welsh administrative laws and redress measures, whilst examining contemporary administrative justice issues across a range of common and civil law, European and international jurisdictions. Key issues include the roles of commissioners, administrative courts, tribunals and ombudsmen in devolved and federal

nations, and evolving relationships between citizens and the state – especially in the context of localisation and austerity – and will be of interest to legal and public administration professionals at home and internationally.

*The Kurdish Spring*  
Springer

This book describes an effective decision-making and planning architecture for enhancing the navigation capabilities of automated vehicles in the presence of non-detailed, open-source maps. The

system involves dynamically obtaining road corridors from map information and utilizing a camera-based lane detection system to update and enhance the navigable space in order to address the issues of intrinsic uncertainty and low-fidelity. An efficient and human-like local planner then determines, within a probabilistic framework, a safe motion trajectory, ensuring the continuity of the path curvature and limiting longitudinal and lateral accelerations. LiDAR-

based perception is then used to identify the driving scenario, and subsequently re-plan the trajectory, leading in some cases to adjustment of the high-level route to reach the given destination. The method has been validated through extensive theoretical and experimental analyses, which are reported here in detail.

Oxford University Press  
Current worldwide trends are not sustainable. The Club of Rome's warnings

published in the book *Limits to Growth* are still valid. Remedies that are acceptable for the great majority tend to make things worse. We seem to be in a philosophical crisis. Pope Francis says it clearly: our common home is in deadly danger. Analyzing the philosophical crisis, the book comes to the conclusion that the world may need a "new enlightenment"; one that is not based solely on doctrine, but instead addresses a balance between humans and

nature, as well as a balance between markets and the state, and the short versus long term. To do this we need to leave behind working in "silos" in favor of a more systemic approach that will require us to rethink the organization of science and education. However, we have to act now; the world cannot wait until 7.6 billion people have struggled to reach a new enlightenment. This book is full of optimistic case studies and policy proposals that will lead us

back to a trajectory of sustainability. But it is also necessary to address the taboo topic of population increase. Countries with a stable population fare immensely better than those with continued increase. Finally, we are presenting an optimistic book from the Club of Rome.  
Political, Economic and Financial Country Risk  
 Routledge  
 Volume 6/2 of the Catalogue of Palaearctic Coleoptera focuses on the second part of the beetle

superfamily Chrysomeloidea reported from the Palaearctic biogeographic region. For the genus and species-groups taxa all relevant names are given and all nomenclatural data are cross-checked and the distribution of species and subspecies is given per country or smaller region. A group of 14 experts have worked to collect data based on a critical review of published sources including a significant amount of new information. This volume is also a tool for

specialists as well as amateurs, which warrants unambiguous communication.

Nuova Cultura

Like so many of us, Margret Kopala lost a significant portion of her life savings in the stock market crash of 2008. Unlike us, however, she went on a long and intense financial odyssey to find out what caused the losses and what she could do to protect herself in the future. Armed with

her skills as a journalist and public policy analyst, fueled by equal measures of fear and determination, and mentored by successful investment strategist and financial broadcaster John Budden, Kopala researched and wrote this magisterial analysis of how Russian economist Nikolai Kondratieff's long-wave theory is playing out in what many today describe as a financial Winter. Along the way, she is introduced to financial experts familiar with Kondratieff scholarship.

John Budden's interviews in the book with Dean LeBaron, J. Anthony Boeckh, Ian Gordon, Larry Jeddelloh, Don Lindsey, the late Lord William Rees-Mogg, Jim Rogers, Eric Sprott, and Ronald-Peter Stöferle show how investors must put a new spin on asset allocation and security of their assets: like a dog that buries bones in different places, we would be advised to allocate our assets to different parts of the world - and to ensure that a good portion of those assets include gold,

the only continuous basis of wealth across history and around the world. Kopala explores the global, national, and personal effects of: overconsumption; underproduction; energy and innovation; the printing of money to "save" the economy; competitive devaluations; deflation, reflation, and inflation; and war (the ultimate economic crisis). She documents those technologies that seeded previous New Economy Spring seasons -- from the era of canals to those of

railroads, automobiles, and infotech -- and probes today's innovations most likely to seed the Next New Economy that we desperately need if we are to escape the doldrums of the current financial Winter. With trenchant explanations of how individuals can achieve portfolio strength by first preserving capital then being vigilant about the financial effects of politics, economic theory, culture, and our own choices, *The Dog Bone Portfolio* is a gift to investors, policy-makers,

and, ultimately, nations everywhere.

*Presidential Leadership*

Oxford Business Group  
Scholarly engagement with the magazine form has, in the last two decades, produced a substantial amount of valuable research.

Authored by leading academic authorities in the study of magazines, the chapters in *The Routledge Handbook of*

Magazine Research not only create an architecture to organize and archive the developing field of magazine research, but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments and interpretive breakthroughs. Exploration of the digital challenges and opportunities which

currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form, as well as of the sociocultural realities it both mirrors and influences. The book includes six sections: - Methodologies and structures presents theories and models for magazine research in an evolving, global context. - Magazine publishing: the people and the work introduces the roles and practices of those involved in the editorial

and business sides of magazine publishing. - Magazines as textual communication surveys the field of contemporary magazines across a range of theoretical perspectives, subjects, genre and format questions. -Magazines as visual communication explores cover design, photography, illustrations and interactivity. - Pedagogical and curricular perspectives offers insights on undergraduate and graduate teaching topics in magazine research. -The future of

the magazine form speculates on the changing nature of magazine research via its environmental effects, audience, and transforming platforms.

*Sessional Papers* BPP Learning Media

This significantly revised and updated second edition addresses the rapid development of EU copyright law in relation to the advancement of new technologies, the need for a borderless digital market and the considerable number of EU legal instruments

enacted as a result. Taking a comparative approach, the Commentary provides comprehensive coverage and in-depth commentary on each of the EU legal instruments and policies, both from an EU and an international perspective. Alongside full legislative analysis and article-by-article commentary, the Commentary illustrates the underlying basic principles of free movement and non-discrimination and provides insights into the influence of copyright on

other areas of EU policy, including telecoms and bilateral trade agreements.

The world has witnessed extraordinary economic growth, poverty reduction and increased life

expectancy and population since the end of WWII, but it has occurred at the expense of undermining life support systems on Earth and subjecting future generations to the real risk of destabilising the planet. This timely book exposes and explores this colossal environmental cost and the dangerous position the world is now in. Standing up for a Sustainable World is written by and about key individuals who have not only understood the threats to our planet, but

also become witness to them and confronted them.

### **Pandora's DNA**

University of Wales Press  
This book presents climate change as a global phenomenon which affects the entire food chain. Many studies analyzing environmental impacts of food systems confirm significant effects of food production on climate change. Most of them associate primary production with emission of greenhouse gasses identified as one of the causes resulting in

warming the atmosphere and global climate effects. A wider perspective shows that the food chains start at farms with consumers being at the end of the pipeline. This approach emphasizes the role of the entire food chain highlighting different kinds of environmental impacts affecting climate change. On the other side, temperature changes and variations of precipitation patterns, together with extreme weather events and water reduction, are recognized as predictors for producing less food,

decreased food quality, new food safety risks, biodiversity losses, and depletion of resources associated with food production in modified circumstances. Last but not least, these effects introduce new threats known as food security where some assumptions stress that almost one billion of people are hungry not receiving enough food as a result of climate changes. As a result, the UN highlights the need for combating

climate change and promotes sustainable (food) consumption and production. Based on the perceived need to promote and disseminate information on climate change related to food system, the "Handbook of Climate change across the food supply chain" is being produced. The publication compiles information, experiences, practical initiatives, and projects around the subject matter and makes

it available to a wide audience. It is expected that the "Handbook of Climate change across the food supply chain" makes many benefits of climate service clearer and, inter alia, leads to an increase in the demand for such important services. *Competition Law* Chicago Review Press "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.
