James Biester sees the shift in late
Elizabethan England toward a witty,

rough, and obscure lyric style—metaphysical wit and strong lines—as a response to the heightened cultural prestige of wonder. That same prestige was demonstrated in the search for strange artifacts and animals to display in the wonder-cabinets of the period. By embracing the genres of

satire and epigram, poets of the Elizabethan court risked their chances for political advancement, exposing themselves to the danger of being classified either as malcontents or as jesters who lacked the gravitas required of those in power. John Donne himself recognized both the risks and benefits of adopting the 'admirable' style, as Biester shows in his close readings of the First and Fourth Satyres. Why did courtier-poets adopt such a dangerous form of self-representation? The answer, Biester maintains, lies in an extraordinary confluence of developments in both poetics and the interpenetrating spheres of the culture at large, which made the pursuit of wonder through style unusually attractive, even necessary. In a postfeudal but still aristocratic culture,

he says, the ability to astound through language performed the validating function that was once supplied by the ability to fight. Combining the insights of the new historicism with traditional literary scholarship, Biester perceives the rise of metaphysical style as a social as well as aesthetic event.

Bloomsbury Publishing

Exploring travellers' tales of wonder in contemporary literature, this study challenges a sensibility of disenchantment with travel. It reassesses travel writing as an aesthetically and ethically innovative form in contemporary international literature, and demonstrates the crucial role of wonder in the travel narratives of writers such as Bruce Chatwin, V.S. Naipaul, and W.G. Sebald. Their

'travellers' tales of wonder' are read as a challenge to the hubris of thinking the world too well known, and an invitation to encounter the world - including its most troubling histories - with a sense of wonder.

A Sense of Wonder Child's World

The essays in this groundbreaking collection stage conversations between the thought of the controversial feminist philosopher, linguist and psychoanalyst Luce Irigaray and premodern writers, ranging from Empedocles and Homer, to Shakespeare, Spenser and Donne. They explore both the pre-Enlightenment

roots of Luce Irigaray's thought, and the impact that her writings have had on our understanding of ancient, medieval and Renaissance culture. Luce Irigaray has been a major figure in Anglo-American literary theory, philosophy and gender studies ever since her germinal works, *Speculum of the Other Woman* and *This Sex Which Is Not One*, were published in English translation in 1985. This collection is the first sustained examination of Irigaray's crucial relationship to premodern discourses underpinning Western culture, and of the transformative effect she has had on scholars working in pre-Enlightenment periods. Like Irigaray herself, the essays work at the intersections of gender, theory, historicism and language. This collection offers powerful ways of

understanding premodern texts through Irigaray's theories that allow us to imagine our past and present relationship to economics, science, psychoanalysis, gender, ethics and social communities in new ways.

Cambridge University Press

Gathers decades of research on figurative language cognition to answer the question, 'Why don't people just say what they mean?'

Reading for Wonder Springer

A new way of understanding our place in the web of life from a scholar praised for his "graceful prose" (Publishers Weekly). The disconnection between humans and nature is perhaps one of the most fundamental problems faced by our species today. This schism is arguably

the root cause of most of the environmental catastrophes unraveling around us. Until we come to terms with the depths of our alienation, we will continue to fail to understand that what happens to nature also happens to us. In *The Biology of Wonder* Andreas Weber proposes a new approach to the biological sciences that puts the human back in nature. He argues that feelings and emotions, far from being superfluous to the study of organisms, are the very foundation of life. From this basic premise flows the development of a "poetic ecology" which intimately connects our species to everything that surrounds us—showing that subjectivity and imagination are prerequisites of biological existence. Written by a leader in the emerging fields of biopoetics and

biosemiotics, *The Biology of Wonder* demonstrates that there is no separation between us and the world we inhabit, and in so doing it validates the essence of our deep experience. By reconciling science with meaning, expression, and emotion, this landmark work brings us to a crucial understanding of our place in the rich and diverse framework of life—a revolution for biology as groundbreaking as the theory of relativity for physics. “Grounded in science, yet eloquently narrated, this is a groundbreaking book. Weber’s visionary work provides new insight into human/nature interconnectedness and the dire consequences we face by remaining disconnected.” —Richard Louv, author of *Last Child in the Woods*
Wonder Columbia University Press

A survey of the last 100 years of science fiction, with representative stories and illuminating essays by the top writers, poets, and scholars, from Edgar Rice Burroughs and Samuel Butler to Robert A. Heinlein and Jack Vance, from E.E. “Doc” Smith and Clifford D. Simak to Ted Chiang and Charles Stross—and everyone in between. More than one million words of classic fiction and essays!

Aliveness, Feeling and the Metamorphosis of Science Routledge
Originally published in 1979, this volume includes the full text of James Marston’s *The Wonder of Women*, alongside critical and textual notes. Previously to this volume, *Sophonisba* had appeared in print five times, once independently and four times in collections of Marston’s

plays; the first edition is a quarto printed in 1606 by John Windet.

Tales of Old from All Parts of the World
“The courtiers all agreed with the Court musician, and the Emperor commanded him to show it to the people on the following Saturday, and let them hear it sing. This he did, and the Chinese people felt so pleased and happy they all

nodded their heads and shook their forefingers and said "Ah!" Only the fishermen, who had heard the real bird sing,” - Kate Douglas Wiggin, *Tales of Wonder Every Child Should Know* Set off on a journey to Europe and Asia and prepare to meet mad kings, fairies, dragons, Rajahs and other fantastic beings who try to put the world out of balance. Fortunately for all of us, there is always a hero ready to set things right and solve the villain’s puzzles and schemes. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. Samuel R. Delany is one of today's most interesting writers. 'A Sense of Wonder' shows how Delany's works participate in African American cultural traditions.

Figurative Language Routledge

During the early modern period, western Europe was transformed by the proliferation of new worlds—geographic worlds found in the voyages of discovery and conceptual and celestial worlds opened by natural philosophy, or science. The response to incredible

overseas encounters and to the profound technological, religious, economic, and intellectual changes occurring in Europe was one of nearly overwhelming wonder, expressed in a rich variety of texts. In the need to manage this wonder, to harness this imaginative overabundance, Mary Baine Campbell finds both the sensational beauty of early scientific works and the beginnings of the divergence of the sciences—particularly geography, astronomy, and anthropology—from the writing of fiction. Campbell's learned and brilliantly perceptive new book analyzes a cross section of texts in which worlds were made and unmade; these texts include cosmographies, colonial reports, works of natural philosophy and natural history, fantastic voyages, exotic fictions, and

confessions. Among the authors she discusses are André Thevet, Thomas Hariot, Francis Bacon, Galileo, Margaret Cavendish, and Aphra Behn. Campbell's emphasis is on developments in England and France, but she considers works in languages other than English or French which were well known in the polyglot book culture of the time. With over thirty well-chosen illustrations, *Wonder and Science* enhances our understanding of the culture of early modern Europe, the history of science, and the development of literary forms, including the novel and ethnography.

The Shape of the Gospel Routledge

This work's chief aim is to restore to readers, performers, and audiences the richness and vitality of Shakespeare's comedies. Richman explores the way in

which a reader's relations to Shakespeare's literary texts differ from those of the relations between performers of Shakespeare's works and their audiences. Richman also examines the forms of humor and empathy that Shakespeare's comedies elicit.

Cross-Cultural and Cross-Linguistic Perspectives Cambridge University Press

This study examines ways in which wonder has been used by classical and medieval playwrights, and by Shakespeare.

Between the Tick and the Tock Xist Publishing

In this utterly transporting debut about the power of words, the importance of friendship, and the magic of wonder, Carly Hines must decide whether to fight

to save the mountain he calls home. Having lost most of his family to coal mining accidents as a little boy, Curley Hines lives with his grandfather in the Appalachian Mountains of Wonder Gap, Kentucky. Ever since Curley can remember, Papaw has been giving him a word each week to learn and live. Papaw says words are Curley's way out of the holler, even though Curley has no intention of ever leaving. When a new coal boss takes over the local mining company, life as Curley knows it is turned upside down. Suddenly, his best friend, Jules, is interested in the coal boss's son, and worse, the mining company threatens to destroy Curley and Papaw's mountain. Now Curley faces a difficult choice. Does he use his words to speak out against Big Coal and save

his mountain, or does he remain silent and save his way of life? From debut author Mary Knight comes a rich, lyrical, and utterly transporting tale about friendship, the power of words, and the difficult hurdles we must overcome for the people and places we love. Praise for *Saving Wonder* : "Knight delivers a strong environmental message and a language lesson in her debut novel... Readers will feel Curley's sorrow and cheer him on during his campaign to save what he loves most. Knight frankly addresses the reality of harsh changes, but Curley's spirit, moving people inside and outside the community to act, is inspirational." -- Publishers Weekly
A Less-Is-More Approach to Integrated Literacy Instruction Saving Wonder
Wonder has an established link to the

history and philosophy of science. However, there is little acknowledgement of the relationship between the visual arts and wonder. This book presents a new perspective on this overlooked connection, allowing a unique insight into the role of wonder in contemporary visual practice. Artists, curators and art theorists give accounts of their approach to wonder through the use of materials, objects and ways of exhibiting. These accounts not only raise issues of a particular relevance to the way in which we encounter our reality today but ask to what extent artists utilize the function of wonder purposely in their work.

The Crossover Psychology Press
Young children love to explore their world through drama—characters,

dialogue, story arcs, and props are all standard elements of a child’s play. It is no surprise then that professional theatre has long been regarded as a way to support children’s social-emotional, cognitive, and creative development. Increasingly, there is an international interest in theatre for very young audiences, and the Wall Street Journal reported on a “baby boom” in American theatre, with a marked upswing in the number of stage plays being written and produced for toddlers and preschoolers. Fueled by ongoing research into developmental psychology and theatre arts, the Children’s Theatre Company (CTC) of Minneapolis presents in this book four of its newly commissioned plays for preschoolers. CTC is widely recognized as the leading theatre for

young people and families in North America; it received the 2003 Tony award for regional theatre, and Time magazine rated it the number one children's theatre in the United States. These four plays encompass a broad range of styles and subjects: Bert and Ernie, *Goodnight!* is a musical about Bert and Ernie's unlikely but true friendship, written by Barry Kornhauser and based on the original songs and scripts from Sesame Street. *The Biggest Little House in the Forest* is a toy-theatre play about a group of diverse animals trying to share a very tiny home, adapted by Rosanna Staffa from the book by Djemma Bider. *The Cat's Journey* is a dazzling shadow-puppet play with a little girl who rides on a friendly cat, written by Fabrizio Montecchi. And Victoria

Stewart's *Mercy Watson to the Rescue!*, adapted from the Kate DiCamillo *Mercy Watson* series, is a comic romp featuring the inadvertent heroics of everyone's favorite porcine wonder. While these plays are as different as they could be, they all help young children to develop a moral compass and critical-thinking skills—while also showing them the power of the theatre to amaze, delight, and inspire.
