List of members in each volume.

The Development of Crude Oil Tankers Springer Science & Business Media

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our

readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Lemon-Aid New and Used Cars and Trucks 1990-2016 Elsevier

Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

Transactions of the Royal Institution of Naval Architects Pen and Sword Transport

This fifth edition of Profile of the International Pump Industry - Market Prospects to 2007 reviews the markets, technological trends, and major manufacturers of industrial pumps. Profile of the International Pump Industry covers both the international pump industry and its associated market, illustrating the structure of the industry, highlighting developments, identifying future trends, and looking at recent mergers and acquisitions. Market estimates and forecasts to 2007, by region and pump type, are presented along with an analysis of the main end-user markets for industrial pumps, and a technology overview. Forty leading international pump manufacturers are profiled and a Top 20 league table of pump manufacturers, ranked by sales of pumps, is given. A directory of pump manufacturing companies and an index of companies by product type are also included.

Zosen Dundurn

This book has been created on the basis of contributions to the 54th International Conference of Machine Design Departments that was held for the 60th anniversary of Technical University of Liberec. This international conference which follows a tradition going back more than 50 years is one of the longest-running series of conferences held in central Europe, dealing with methods and applications in machine design. The main aim of the

conference was to provide an international forum where experts, researchers, engineers and industrial practitioners, managers and Ph.D. students could meet, share their experiences and present the results of their efforts in the broad field of machine design and related fields. The book has seven chapters which focus on new knowledge of machine design, optimization, tribology, experimental methods and measuring, engineering analyses and product innovation. Authors presented new design methods of machine parts and more complex assemblies with the help of numerical methods such as FEM. Research, measurements and studies of new materials, including composites for energy-efficient constructions are also described. The book also includes solutions and results useful for optimization and innovation of complex design problems in various industries.

Solutions, with Newbuildings Dundurn

Covers various trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, inter modal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This book includes one page profiles of transportation, supply chain and logistics industry firms.

WWS.

In this engaging book, Dr. Solly examines the history of crude oil tankers from early days when this vital commodity was carried aboard ordinary sailing vessels, through the innovative designs that resulted in significant breakthroughs leading to early single-hulled VLCCs, and the later stronger hence safer double-hulled vessel. The professional reader will identify with much of the author's thinking, especially his handling of the enormous advances in shipboard techniques, and examination of excellent contributions made by the International Maritime Organisation (IMO) from its conception in 1948, to its penetratingly effective work of today. Special attention is paid to their profound influence on the industry through MARPOL and SOLAS innovations, including arguably the greatest contribution made to tanker safety and environmental protection by Inert Gas Systems (IGS) and Crude Oil Washing (COW). Non-seagoing readers in allied shipping professions, and that huge army of ship enthusiasts, will learn a great deal

about the ins-and-outs of an industry which, for the immediate future, underpins virtually every aspect of practical 21st Century living. Ray Solly's authoritative story is lavishly supported by 211 images (many of which have never previously been published), plus accounts of two recent voyages aboard a Norwegian North sea shuttle tanker, and a product carrier. Both passenger trips not only updated his professional knowledge but provided penetrating insight into current maritime practices. Each confirmed his convincing observation that today's crude oil carriers present the safest and most regulated form of transportation in the world.

Summary & Recommendations

Offers advice for prospective buyers of cars and trucks, reveals information on secret warranties and confidential service bulletins, and tells how to complain and get results.

Popular Mechanics

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.
