Groundwater Resources Sustainability Management And Groundwater sustainability is the development and use of groundwater resources to meet current and future beneficial uses without causing unacceptable environmental or socioeconomic consequences. (USGS Circular 1186.) NGWA white paper on sustainability Groundwater sustainability white paper A call to action Groundwater | Groundwater Sustainability Sustainable Groundwater Management. At the same time that the demand for groundwater for public water supply is rising in the UK, regulations providing greater protection for the environment are having an impact on the amount of water that can be abstracted for public supply. Sustainable Groundwater Management Sustainable Groundwater Management Napa County Groundwater Sustainability Agency. New: The Napa County Groundwater Sustainability Agency (GSA) will meet on Tuesday, July 21, 2020 at 1:45pm. Videos, agendas, and meeting materials can be found on the GSA's agendas and minutes webpage. On July 9, 2020, the Agency

appointed 25 members to its Groundwater Sustainability Plan Advisory Committee (GSPAC). Sustainable Groundwater Management - Napa County The Sustainable Groundwater Management Act (SGMA) requires local public agencies and Groundwater Sustainability Agencies (GSAs) in high- and medium-priority basins to develop and implement Groundwater Sustainability Plans (GSPs) or Alternatives to GSPs. GSPs are detailed road maps for how groundwater basins will reach long term sustainability. The Department of Water Resources (DWR) has ... Groundwater Sustainability Plans Special Issue "Groundwater Resources Management: Reconciling Demand, High Quality ... the challenge is reconciling demand satisfaction and durable quality and quality sustainability of resources. ... including an assessment of climate change impacts on groundwater resources in terms of groundwater resource quantity and quality and ... Water | Special Issue : Groundwater Resources Management ... Sustainable allocation of groundwater resources will require catchment and aquifer management plans that clearly integrate groundwater and surface water

systems. This will require an accurate catchment and aquifer water balance to develop management plans which recognise the long timeframes of aquifer and catchment interaction. Sustainable Groundwater Management | Geoscience Australia Developing effective groundwater sustainability plans requires committing to: 1) establishing an open, transparent global monitoring and reporting system on aquifer conditions and groundwater use; 2) incorporating nature-based solutions and measures for protected and managed aquifer recharge and groundwater quality protection; 3) coordinating management of groundwater, surface water and new ... Global Groundwater Sustainability Statement The Sustainable Groundwater Management Act (SGMA) is a three-bill package that passed the California state legislature and was signed into California state law by Governor Jerry Brown in September 2014. Its purpose is to ensure better local and regional management of groundwater use and it seeks to have a sustainable groundwater management in California by 2042.
