German Pop Literature

POWERS RODRIGO

Fourth Edition McGraw-Hill Education

Pop literature of the 1990s enjoyed bestselling success, as well as an extensive and sometimes bluntly derogatory reception in the press. Since then, less censorious scholarship on pop has emerged to challenge its flash-in-the-pan status by situating the genre within a longer history of aesthetic practices. This volume draws on recent work and its attempts to define the genre, locate historical antecedents and assess pop's ability to challenge the status quo. Significantly, it questions the 'official story' of pop literature by looking beyond Ralf Dieter Brinkmann's works as origin to those of Jürgen Ploog, Jörg Fauser and Hadayatullah Hübsch. It also remedies the lack of attention to questions of gender in previous pop lit scholarship and demonstrates how the genre has evolved in the new millennium via expanded thematic concerns and new aesthetic approaches. Essays in the volume examine the writing of well-known, established pop authors – such as Christian Kracht, Andreas Neumeister, Joachim Lottman, Benjamin Lebert, Florian Illies, Feridun Zaimoğlu and Sven Regener – as well as more recent works by Jana Hensel, Charlotte Roche, Kerstin Grether, Helene Hegemann and songwriter/poet Peter Licht.

This open access book looks at how a democracy can devolve into a post-factual state. The media is being flooded by populist narratives, fake news, conspiracy theories and make-believe. Misinformation is turning into a challenge for all of us, whether politicians, journalists, or citizens. In the age of information, attention is a prime asset and may be converted into money, power, and influence – sometimes at the cost of facts. The point is to obtain exposure on the air and in print media, and to generate traffic on social media platforms. With information in abundance and attention scarce, the competition is ever fiercer with truth all too often becoming the first victim. Reality Lost: Markets of Attention, Misinformation and Manipulation is an analysis by philosophers Vincent F. Hendricks and Mads Vestergaard of the nuts and bolts of the information market, the attention economy and media eco-system which may pave way to postfactual democracy. Here misleading narratives become the basis for political opinion formation, debate, and legislation. To curb this development and the threat it poses to democratic deliberation, political self-determination and freedom, it is necessary that we first grasp the mechanisms and structural conditions that cause it.

Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like

English, Afrikaans, and the Scandinavian languages. It takes its

inspiration from the idea of a "Germanic Sandwich", i.e. the

hypothesis that sets of genetically related languages diverge in

systematic ways in diverse domains of the linguistic system. Its

contributions set out to test this approach against new

phenomena or data from synchronic, diachronic and, for the first

time in a Sandwich-related volume, psycholinguistic perspectives.

With topics ranging from nickname formation to the IPP (aka

'Ersatzinfinitiv'), from the grammaticalisation of the definite

article to /s/-retraction, and from the role of verb-second order in

the acquisition of L2 English to the psycholinguistics of gender,

the volume appeals to students and specialists in modern and

historical linguistics, psycholinguistics, translation studies,

language pedagogy and cognitive science, providing a wealth of

fresh insights into the relationships of German with its closest

relatives while highlighting the potential inherent in the

integration of different methodological traditions.

For many years, *Protective Relaying: Principles and Applications* has been the go-to text for gaining proficiency in the technological fundamentals of power system protection. Continuing in the bestselling tradition of the previous editions by the late J. Lewis Blackburn, the Fourth Edition retains the core concepts at the heart of power system analysis. Featuring refinements and additions to accommodate recent technological progress, the text: Explores developments in the creation of smarter, more flexible protective systems based on advances in the computational power of digital devices and the capabilities of communication systems that can be applied within the power grid Examines the regulations related to power system protection and how they impact the way protective relaying systems are designed, applied, set, and monitored Considers the evaluation of protective systems during system disturbances and describes the tools available for analysis Addresses the benefits and problems associated with applying microprocessor-based devices in protection schemes Contains an expanded discussion of inertia protection requirements at dispersed generation facilities Providing information on a mixture of old and new equipment, *Protective Relaying: Principles and Applications, Fourth Edition* reflects the present state of power systems currently in operation, making it a handy reference for practicing protection engineers.

And yet its challenging end-of-chapter problems, coverage of the basic mathematical requirements for fault analysis, and real-world examples ensure engineering students receive a practical, effective education on protective systems. Plus, with the inclusion of a solutions manual and figure slides with qualifying course adoption, the Fourth Edition is ready-made for classroom implementation.

GERMAN FOR DUMMIES (With CD) Springer Nature

Any reader of scholarship on the ancient and early medieval world will be familiar with the term 'Germanic', which is frequently used as a linguistic category, ethnonym, or descriptive identifier for a range of forms of cultural and literary material. But is the term meaningful, useful, or legitimate? The term, frequently applied to peoples, languages, and material culture found in non-Roman north-western and central Europe in classical antiquity, and to these phenomena in the western Roman Empire's successor states, is often treated as a legitimate, all-encompassing name for the culture of these regions. Its usage is sometimes intended to

suggest a shared social identity or ethnic affinity among those who produce these phenomena. Yet, despite decades of critical commentary that have highlighted substantial problems, its dominance of scholarship appears not to have been challenged. This edited volume, which offers contributions ranging from literary and linguistic studies to archaeology, and which span from the first to the sixteenth centuries AD, examines why the term remains so pervasive despite its problems, offering a range of alternative interpretative perspectives on the late and post-Roman worlds.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and

consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.
