With the appearance of *Grunch of Giants*, R. Buckminster Fuller consummates his literary canon, his panoramic lifetime survey of all aspects of the responsibility of human beings for their own destiny. This book is a modern allegory - his long-gestated myth-of the villainy of capitalism and the fecklessness of classic economics. For Fuller, the academic discipline of economics is irrelevant since it derives from an invalid assumption of scarcity. In fact, he has long argued that future historians of our era may subsume our business practices as a branch of mythology; thus it is not surprising that the word economic appears nowhere in his text. Fuller's myth is no idle fairy tale, since he faces his question - the question of a technological imperative which only he could raise with the deadly seriousness of satire. That question is: Can our system of national political sovereignties and corporate profits survive the inevitable technology revolution require to obviate wars by effecting a worldwide rise in the standard of living. One of the functions of myth is to

resolve contradictions in our culture. *Grunch of Giants* portrays the rising of multinational corporations in the paradoxical role of function both as the epitome of capitalistic selfishness and as the inadvertent vehicle for the dissolution of national political boundaries - the last deterrent to a one-world economy. The result is more subversive of the property and profit values of the capitalist system than anything dreamed of since Karl Marx. —E.J. Applewhite, collaborator with RBF on *Synergetics* and *Synergetics 2*, author of *Cosmic Fishing: A Memoir of Working With R. Buckminster Fuller*

Good Strategy, Bad Strategy Harper Collins

An epic account of the Navy SEALs of Alpha platoon, the startling accusations against their chief, Eddie Gallagher, and the courtroom battle that exposed the dark underbelly of America's special forces—from a Pulitzer Prize-winning reporter "Meticulously assembled and brilliantly written . . . [a] remarkable and engrossing book."—The New York Times By official accounts, the Navy SEALs of Alpha platoon returned as heroes after their 2017 deployment to Mosul, following a vicious, bloody, and successful campaign to drive ISIS from the city. But within the platoon a different war raged. Even as Alpha's chief, Eddie Gallagher, was being honored by the Navy for his leadership,

several of his men were preparing to report him for war crimes, alleging that he'd stabbed a prisoner in cold blood and taken lethal sniper shots at unarmed civilians. Many young SEALs regarded Gallagher as the ideal special operations commando. Trained as a sniper, a medic, and an explosives expert, he was considered a battle-tested leader. But in the heat of combat, some in his platoon saw a darker figure—a man who appeared to be coming unhinged after multiple deployments in America's forever wars. Their excitement to work with a tough, experienced chief soon gave way to a grim suspicion that his thirst for blood seemed to know no bounds and a belief that his unpredictability was as dangerous as the enemy. In riveting detail, Pulitzer Prize-winning New York Times correspondent David Philipps reveals the story of a group of special operators caught in a moral crucible—should they uphold their oath and turn in their chief, or honor the SEALs' unwritten code of silence? It is also a larger story of how the SEAL Teams drifted off course after 9/11, and of the "pirate" subculture that festered within their ranks—a secret brotherhood that, in a time of endless war with few clear victories, made the act of killing itself the paramount goal. The investigation and trial following Alpha's deployment—and Gallagher's ultimate acquittal on the most serious charges—would pit SEAL against SEAL, set the Navy brass on a collision course

with President Donald Trump, and turn Gallagher into a political litmus test in a hotly polarized America. A page-turning tale of battle, honor, and betrayal, Alpha is a remarkable exposé of the fault lines fracturing a country that has been at war for a generation and counting.

This book includes 1 Enoch: The Ethiopic Book of Enoch; 2 Enoch: The Slavonic Book of the Secrets of Enoch; 3 Enoch: The Hebrew Book of Enoch; and versions of the Book of Giants. The 1st Book of Enoch, the Ethiopic Book of Enoch, or 1 Enoch is more known as simply the Book of Enoch.

Although this book is considered apocryphal for the Western canon, it is contained in the Ethiopic Bible. It was considered sacred by some important first followers of Christ but it was left out of the Bible and disappeared for centuries until it was rediscovered in 1773 in Ethiopic. This manuscript was first translated into English in the 1820s and into German in the 1830s. According to most scholars, part of it was written in third century BCE and part of it in the first century CE (the part related to the Son of Man). Although the oldest complete copies of 1 Enoch are K-9 or Kebran 9, dated late fourteenth early fifteenth century and Ethiopian Monastic Microfilm Library (EMML 2080) of the fifteenth or fourteenth century, fragments found in Qumram in the 1950s are more than 2000 years old. Other old important manuscripts are Abbadianus 55 (possibly fifteenth century) and British Museum Orient 485 (first half of the sixteenth century). The 2nd Book of Enoch, the Slavonic Enoch, or 2 Enoch, is another apocryphal book, found complete only in Old Slavonic manuscripts, and it was once present in the Old Slavonic Bible. It's usually dated to the first century CE although Matthew Black in The Oxford Guide to People & Places of the Bible state that there is no manuscript "earlier than the fourteenth century BE." The 3rd Book of Enoch, the Hebrew Enoch, or 3 Enoch, is a Rabbinic text originally written in Hebrew usually dated to the fifth century CE. Some experts believe it was written by Rabbi Ishmael (second century CE), familiar with both 1 Enoch and 2 Enoch. The Book of Giants contains a narrative that involves the antediluvian giant offspring originally known from both the Genesis and the Book of Enoch. The Book of Giants resembles particularly 1 Enoch: The First Book of Enoch.

A Dieselpunk Adventure Harvard University Press

A cultural exploration of the Dark Age landscapes of Britain that poses a significant question: Is the modern world simply the realization of our ancient past? The five centuries between the end of Roman Britain and the death of Alfred the Great have left few voices save a handful of chroniclers, but Britain's "Dark Ages" can still be explored through their material remnants: architecture, books, metalwork, and, above all, landscapes. Max Adams explores Britain's lost early medieval past by walking its paths and exploring its lasting imprint on valley, hill, and field. From York to Whitby, from London to Sutton Hoo, from Edinburgh to Anglesey, and from Hadrian's Wall to Loch Tay, each of his ten walking narratives form free-standing chapters as well as parts of a wider portrait of a Britain of fort and fyrd, crypt and crannog, church and causeway, holy well and memorial stone. Part travelogue, part expert reconstruction, In the Land of Giants offers a beautifully written insight into the lives of peasants, drengs, ceorls, thanes, monks, knights, and kings during an enigmatic but richly exciting period of Britain's history.

The Innovator's Dilemma Penguin

In this authorised biography of one of the most remarkable Irishmen of the twentieth century, Richard Aldous is independent in his judgements and frank in his examination of his subject's shortcomings and eccentricities. But most of all, he writes with verve and pace. Tony Ryan was born in a railwayman's cottage and rose to enormous success, overseeing the spectacular making of two business fortunes and the dramatic loss of one. After an early spell in Aer Lingus, he set up

an airline leasing company, Guinness Peat Aviation (GPA), which had its headquarters in Shannon and quickly became the largest such enterprise in the world. Ryan was a hard taskmaster and the company reflected his ferocious work ethic. Yet, despite a stellar board of directors, a botched and poorly timed Initial Public Offering in the 1990s saw GPA crash and burn. Ryan lost almost everything. All that remained was a little airline running massive deficits. Ryan set about turning Ryanair around, putting in one of his assistants, Michael O'Leary, to help knock it into shape. The rest is history. Ryan remade his fortune, lived lavishly and elegantly, was a generous patron of the arts, and in every respect larger than life. His spirit is one that Ireland needs more than ever today. As the nation strives for its own recovery, it can find inspiration in the story of how one of its most famous sons rose and fell, and then rose again. Not one to stand still or lament mistakes, Tony Ryan's determination never to give up is the real lesson of this story. He was in so many ways Ireland's Aviator.

An exploration of how plant behavior and adaptation offer valuable insights for human thriving. We know that plants are important. They maintain the atmosphere by absorbing carbon dioxide and producing oxygen. They nourish other living organisms and supply psychological benefits to humans as well, improving our moods and beautifying the landscape around us. But plants don't just passively provide. They also take action. Beronda L. Montgomery explores the vigorous, creative lives of organisms often treated as static and predictable. In fact, plants are masters of adaptation. They "know" what or who they are, and they use this knowledge to make a way in the world. Plants experience a kind of sensation that does not require eyes or ears. They distinguish kin, friend, and foe, and they are able to respond to ecological competition despite lacking the capacity of fight-or-flight. Plants are even capable of transformative behaviors that allow them to maximize their chances of survival in a dynamic and sometimes unfriendly environment. Lessons from Plants enters into the depth of botanic experience and shows how we might improve human society by better appreciating not just what plants give us but also how they achieve their own purposes. What would it mean to learn from these organisms, to become more aware of our environments and to adapt to our own worlds by calling on perception and awareness rather than reason? Montgomery's meditative study puts before us a question with the power to reframe the way we live: What would a plant do?

It turns challenges into crises, dilemmas into catastrophes. It's the single greatest obstacle business leaders face. Now Harvard business School professor Richard S. Tedlow tackles two essential questions: Why do so many sane, smart leaders often refuse to accept and act on the facts that threaten their companies and careers? And how do we find the courage to resist denial when facing new trends, changing markets, and tough new competitors? Tedlow highlights strategies the best leaders use to face hard facts and turn challenges into opportunities. His book will help you become one of them.

Dreams, schemes and opportunity as space opens for tourism and commerce. Twentieth century space exploration may have belonged to state-funded giants such as NASA, but there is a parallel history which has set the template for the future. Even before Apollo 11 landed on the Moon, private companies were exploiting space via communication satellites - a sector that is seeing exponential growth in the internet age. In human spaceflight, too, commercialisation is making itself felt. Billionaire entrepreneurs Elon Musk, Jeff Bezos and Richard Branson have long trumpeted plans to make space travel a possibility for ordinary people and those ideas are inching ever closer to reality. At the same time, other companies plan to mine the Moon for helium-3, or asteroids for precious metals. Science writer Andrew May takes an entertaining, in-depth look at the triumphs and heroic failures of our quixotic quest to commercialise the final frontier.

They are but the most visible signs of the fundamental flaws in the current system of federal lands management. In Plundered Promise, leading resource management scholar Richard W.
