The Newbery Medal-winning tale of an orphan boy whose dream of becoming a master potter leads to unforeseen adventure in ancient Korea. Tree-ear is an orphan boy in a 12th-century Korean village renowned for its ceramics. When he accidentally breaks a delicate piece of pottery, he volunteers to work to pay for the damage. Putting aside his own dreams, Tree-ear resolves to serve the master potter by embarking on a difficult and dangerous journey, little knowing that it will change his life forever. "Intrigues, danger, and a strong focus on doing what is right turn a simple story into a compelling read. . . . A timeless jewel."—Kirkus Reviews, Starred Review

Have you ever wondered what mysteries the ocean holds? Prepare to explore the ocean from sunlit shallows to the deepest, darkest depths. Along

the way, you'll meet many incredible creatures that are brand new to science. Dive to a coral reef and spot a new species of pygmy octopus. Travel deeper and discover fragile, nearly transparent jellies as they drift past. Then head down into a world of eternal night. You'll encounter animals that make their own light and zombie worms that feast on the bones of dead whales. Your adventure is based on the real journeys of scientists involved in the Census of Marine Life. From 2000 to 2010, more than two thousand researchers from eighty-two countries carried out the most extensive investigation of ocean life ever attempted. Author Rebecca L. Johnson takes readers to research sites around the globe, showing how ocean scientists do their work. Stunning photographs throughout bring readers face-to-face with some of the most mesmerizing creatures on Earth.

Meet Greg Kenton, billionaire in the making. Greg Kenton has two obsessions -- making money and his long-standing competition with his annoying neighbor, Maura Shaw. So when Greg discovers that Maura is cutting into his booming Chunky Comics business with her own original illustrated minibooks, he's ready to declare war. The problem is, Greg has to admit that Maura's books are good, and soon the longtime enemies become unlikely business partners. But their budding partnership is threatened when the principal bans the sale of their comics in school. Suddenly, the two former rivals find themselves united against an adversary tougher than they ever were to each other. Will their enterprise -- and their friendship -- prevail?

Most students in training to become teachers, psychologists, physicians, and social workers as well as many practicing professionals in these disciplines do not get the opportunity to fully understand and appreciate the circumstances of children ,parents, and teachers who have had to cope and adapt to childhood disorder. Most professionals in the field of childhood disorders are well trained in assessment and treatment methods and are aware of the clinical, theoretical, and empirical foundations of the work they do. In their training, they get some experience in diagnosing the educational, psychological, social, and medical problems of children through their supervised clinical internships. In their training and in their professional practice they get to interview, discuss, consult and collaborate with children and their families regarding developmental issues and treatment plans, however, they rarely get an opportunity to fully realize and understand what it is like to have a disorder and what it is like to be a mother, or father, or teacher of children with disorders. This book provides an opportunity for students in training and professionals in the field to gain some awareness of the life journeys of some exceptional children, their families and their teachers. Focuses on those childhood disorders that are most common or what are sometimes referred to as high incidence disorders such as learning disabilities, autism, behavior disorder, depression, and

Animals Building Homes Penguin

Wow! This is a powerful book that addresses a long-standing elephant in the mathematics room. Many people learning math ask ``Why is math so hard for me while everyone else understands it?'' and ``Am I good enough to succeed in math?'' In answering these questions the book shares personal stories from many now-accomplished mathematicians affirming that ``You are not alone; math is hard for everyone'' and ``Yes; you are good enough.'' Along the way the book addresses other issues such as biases and prejudices that mathematicians encounter, and it provides inspiration and emotional support for mathematicians ranging from the experienced professor to the struggling mathematics student. --Michael Dorff, MAA President This book is a remarkable collection of personal reflections on what it means to be, and to become, a mathematician. Each story reveals a unique and refreshing understanding of the barriers erected by our cultural focus on ``math is hard.'' Indeed, mathematics is hard, and so are many other things--as Stephen Kennedy points out in his cogent introduction. This collection of essays offers inspiration to students of mathematics and to mathematicians at every career stage. --Jill Pipher, AMS President This book is published in cooperation with the Mathematical Association of America.

José was a boy with a song in his heart and a dance in his step. Born in Mexico in 1908, he came into the world kicking like a steer, and grew up to love to draw, play the piano, and dream. José's dreaming took him to faraway places. He dreamed of bullfighters and the sounds of the cancan dancers that he saw with his father. Dance lit a fire in José's soul. With his heart to guide him, José left his family and went to New York to dance. He learned to flow and float and fly through space with steps like a Mexican breeze. When José danced, his spirit soared. From New York to lands afar, José Limón became known as the man who gave the world his own kind of dance. ¡OLÉ! ¡OLÉ! ¡OLÉ! Susanna Reich's lyrical text and Raúl Colón's shimmering artwork tell the story of a boy who was determined to make a difference in the world, and did. José! Born to Dance will inspire picture book readers to follow their hearts and live their dreams.
