From its birth in 1826, Lowell has thrived, declined, and been resurrected as a mill city. Today, it is celebrated for its rich history. These postcards from the 1890s to the 1940s display the energy of this industrial city and its native and immigrant population as it grew, built, worked, and played. Vintage cards capture both familiar mills along the Merrimack River and vanished businesses. Coupled with compelling narrative, they tell stories of a horse-drawn fire engine, textile mill workers, grand civic buildings, floods, and even the aftermath of an explosion.

A Doctor in the House Notion Press

Accessible, practical and concise, this revised edition expertly tackles the practical problems which writers face when they attempt to transfer the rich data experience of their real world research into a textual product. New attention is paid to the crucial issues of the nature and use of visual data, personal narrative, core and periphery data, and data reconstruction and fictionalization.

Sensitive issues dealing with the appropriate use of identity in research settings are clearly discussed, while techniques for avoiding reductive judgements are presented and critically discussed. By making the workings of written study transparent, the book demonstrates how to manage subjectivity and achieve scientific rigour in the qualitative research process. This book provides accessible advice for novice researchers on where to begin and how to proceed. But much more than a simple manual, it also guides the more experienced researcher through the social, cultural and political complexities involved in every step of the way. It is an essential tool for students in all disciplines that engage in qualitative research, including sociology, applied linguistics, management, sport science, health studies and education.

“Creativity and innovation are to events, what the heart and soul are to the living.” The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees’ creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

Though there has been much discussion on the academic aspects of Japanese education abroad (e.g., high scores on international tests, lesson study), there has been little information on the non-academic aspects of Japanese schooling. This non-academic aspect is called Tokkatsu (tokubetsu katsudo). Unlike math and reading, Tokkatsu is not confined to a certain period, but extends throughout the school day and even after-school activities — such as school excursions. It includes classroom activities such as classroom discussions, morning and afternoon meetings that take place daily, cleaning and serving lunch, school events such as sports day, school excursions, student councils, and club activities. Such activities occur every single day, throughout one's school years, from elementary school (actually, even kindergarten) to high school. They are, however, bound together by the common goals of the Tokkatsu framework. This book is the foremost attempt to address a gap in English literature on Tokkatsu.

When most people think of wikis, the first---and usually the only---thing that comes to mind is Wikipedia. The editors of Wiki Writing: Collaborative Learning in the College Classroom, Robert E. Cummings and Matt Barton, have assembled a collection of essays that challenges this common misconception, providing an engaging and helpful array of perspectives on the many pressing theoretical and practical issues that wikis raise. Written in an engaging and accessible manner that will appeal to specialists and novices alike, Wiki Writing draws on a wealth of practical classroom experiences with wikis to offer a series of richly detailed and concrete suggestions to help educators realize the potential of these new writing environments. Robert E. Cummings began work at Columbus State University in August 2006 as Assistant Professor of English and Director of First-Year Composition. Currently he also serves as the Writing Specialist for CSU's Quality Enhancement Plan, assisting teachers across campus in their efforts to maximize student writing in their curriculum. He recently concluded a three-year research study with the Inter/National Coalition for Electronic Portfolio Research and continues to research in the fields of computers and writing, writing across the curriculum, writing in the disciplines, and curricular reform in higher education. Matt Barton is Assistant Professor, St. Cloud State University, Department of English-Rhetoric and Applied Writing Program. His research interests are rhetoric, new media, and computers and writing. He is the author of Dungeons and Desktops: A History of Computer Role-Playing Games and has published in the journals Text and Technology, Computers and Composition, Game Studies, and Kairos. He is currently serving as Associate Editor of Kairosnews and Managing Editor of Armchair Arcade. "Wiki Writing will quickly become the standard resource for using wikis in the classroom." ---Jim Kalmbach, Illinois State University digitalculturebooks.org is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication.
