RAMOS HORTON

The Protection of Intellectual Property Rights Under International Investment Law Edward Elgar Publishing

This volume concerns several aspects of China's changing market based economy. These include commercial contract enforcement, corporate structures, competition law and other issues related to China's membership in the WTO. In the past two decades, the rapid integration of China's economy into the global marketplace has created obligations and expectations of non-discrimination and regulatory transparency in domestic markets. The Chinese government has responded by demanding better governance within major companies, market sectors and public administration generally. However, as the articles in this volume show, it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance. It has also moved cautiously in creating legal controls over unfair competition. Moreover, the protection of state owned enterprises, which serve as vehicles for domestic economic, social and political policy, has been a recurring issue in China's

WTO trade disputes.

International Intellectual Property Law West Academic Publishing

This book analyses the governance foundations of innovation, brands, inventions, secrets and expression, which are the keys to a century based on knowledge. They are reflected in legal rights that have been fermenting over centuries of national policy deliberations on intellectual property rights, constantly in flux in the face of new advances in science, but overall a trend towards greater protectionism. As countries are challenged by the strictures of international agreements, often extorted through imbalanced power relationships, they seek their own national means for beneficial differentiation from the new global norms, whilst complying with international obligations. This book deals with the outcomes of regional governance of intellectual property, which often creates ripples in the search for harmony in the laws that form the basis for the future of intellectual property. The work has contributions that come from developing and developed nations, showing a common theme of the struggle to find the balance in an area of law that often does not provide clearcut solutions to real world environments. There are many intellectual property struggles illustrated in this work: patent at the boundaries of nature and invention, the need for drug development, which is driven by profit based on the patent monopoly; copyright, the expression of original thought, seeking to maximise exposure facilitated by the internet, but a

system that facilitates rampant copying; trade marks, supporting company branding, seeks to exploit global branding through naming domains names; and other areas concomitant to the globalisation of intellectual property governance, such as foreign direct investment. This book holds up a mirror to the issues of world governance of intellectual property rights in this century, asking whether the direction we are currently following is in the best interest of global citizens, and showing the divergence that constraints are stimulating on a national level.

Competition Policy and Intellectual Property in Today's Global Economy Edward Elgar Publishing

Compiled by the China National Intellectual Property Administration (CNIPA) with the support of the WIPO China Funds-in-Trust, this book gives students a basic yet comprehensive understanding of IP. Using a question-and-answer format, it covers the general rules of the IP system as well as the essentials of patents, copyright, trademarks and other forms of IP, such as industrial designs, geographical indications and traditional knowledge.

Documents Supplement to Accompany International Intellectual Property, Problems, Cases, and Materials Wolters Kluwer

This Supplement accompanies Chow and Lee's International Intellectual Property: Problems, Cases, and Materials, 3d. The new edition has been thoroughly updated.

Global Governance of Intellectual Property in the 21st Century Cambridge University Press
As companies and organisations increasingly operate across national boundaries, so the incentive to understand how to acquire, deploy and protect IP rights in multiple national jurisdictions has rapidly increased. Transnational Intellectual Property Law meets the need for a book that introduces contemporary intellectual property as it is practiced in today's global context. Focusing on three major IP regimes - the United States, Europe and China - the unique transnational approach of this textbook will help law students and lawyers across the world understand not only how IP operates in different national contexts, but also how to coordinate IP protection across numerous national jurisdictions. International IP treaties are also covered, but in the context of an overall emphasis on transnational coordination of legal rights and strategies. Providing detailed thematic coverage of the major IP rights, including Patents, Copyright, Trademarks, Trade Secrets and Design Protection, the book delves into the national laws and operational realities of these three jurisdictions, highlighting the issues and questions that are most frequently encountered in practice. Of special note are the many English translations of Chinese legal materials - providing the richest and most in-depth coverage of authoritative IP-related statutes, cases and commentaries currently available to students. The textbook draws heavily on cases and other primary sources to tease out the differences, commonalities, and ultimately, strategies for taking a global approach to IP protection. Thought-provoking questions and scenarios throughout the book will stimulate class discussion and cement understanding. Key features: * Introductory problems allow students to identify and navigate the key issues * An accessible layout with case extracts, questions and notes clearly highlighted illustrates examples of crucial issues, helps identify key information, and points to extensive practical and scholarly commentary on important issues * Comparative approach with numerous references to law and business context in China, the United States and Europe allows students to place national IP in a global context * Expert analytical commentary on carefully selected cases guides readers on the key issues. Engaging and comprehensive, this textbook will be essential for all IP courses that aspire to teach the global dimension of IP, and for all students whose aim is to practice IP in what is an increasingly transnational marketplace.

The Intersection of Antitrust and Intellectual Property Edward Elgar Publishing
In *The Protection Against Unfair Competition in the WTO TRIPS Agreement*, Christian Riffel offers an account of the potential which Article 10bis of the Paris Convention has for the world trading system. In particular, the author explores what hard law obligations emerge from it.

Transnational Intellectual Property Law Edward Elgar Publishing
This Supplement accompanies Chow and Lee's *International Intellectual Property: Problems, Cases, and Materials*. The new edition has been thoroughly updated.

A Neofederalist Vision of TRIPS Juris Publishing, Inc.
Elgar Advanced Introductions are stimulating and thoughtful introductions to major fields in the social sciences and law, expertly written by the world's leading scholars. This authoritative introduction provides a detailed overview of the complexities of the international intellectual property regime and the ways in which it operates. The authors cover the key international institutions and agreements that regulate and inform intellectual property at an international level such as the TRIPS Agreement, WIPO, WTO, the Paris Convention and the Berne Convention. The book serves as a platform to understand and contextualize policy discussions on topics such as public health, Internet regulation, as well as regional and bilateral trade treaties. Key features include: • Accessible and carefully summarized overview of the field • Comprehensive and up-to-date review of all major international intellectual property institutions and instruments • Introduces current issues within international IP negotiations • Provides tools to analyze the history and possible future development of international IP norms. Students, researchers, policy makers and practitioners of intellectual property will find this book to be an invaluable resource in gaining an understanding of the international rules and context in which both domestic and international IP policy issues should be understood.

BRILL
Focusing on private international business transactions, this book covers the planning, structure, and implementation of these transactions in today's global economy. New Key Features New Supreme Court jurisprudence on international litigation and arbitration. New developments in international investment law. New cases on corporate social responsibility.

International Business Transactions West Academic Publishing
This authoritative report analyzes IP activity around the globe. Drawing on 2019 filing, registration

and renewals statistics from national and regional IP offices and WIPO, it covers patents, utility models, trademarks, industrial designs, microorganisms, plant variety protection and geographical indications. The report also draws on survey data and industry sources to give a picture of activity in the publishing industry.

Wolters Kluwer
Features: Organizes the many strands of trademark and unfair competition doctrine around a coherent conceptual framework. The clear structure is divided into three parts: foundation and purposes, creation, and scope andamp; enforcement Traditional case-and-note format, enhanced by summarizing problems that help students better understand the intricacies of key topics. Features numerous Internet-related trademark issues, such as cybersquatting, keyword advertising, and domain name disputes. Also addresses the relationship between trademarks and domain name, and the potential secondary liability of online auction websites such as eBay Integrates international trademark issues with domestic issues Thoroughly treats trade dress protection, integrated with issues of word mark protection New to the Fourth Edition: The Second Circuit's important decision in *Louboutin v. YSL* Important new appellate decisions on functionality, including the Federal Circuit's *Becton Dickinson* opinion and the decision of the Seventh Circuit in *Franco and Sons* The Fourth Circuit's decision in *Rosetta Stone* on trademark liability for keyword advertising The Eleventh Circuit's *University of Alabama* opinion on First Amendment limitations on the scope of trademark rights Cases exploring trademark fair use, including the *DELICIOUS* shoes case and the *Tabari* case on nominative fair use in connection with domain names New applications of the trademark dilution and anti-cybersquatting provisions New cases on remedies

Transnational Intellectual Property Law Oxford University Press
The fast-evolving relationship between the promotion of welfare-enhancing competition and the balanced protection of intellectual property (IP) rights has attracted the attention of policymakers, analysts and scholars. This interest is inevitable in an environment that lays ever greater emphasis on the management of knowledge and innovation and on mechanisms to ensure that the public derives the expected social and economic benefits from this innovation and the spread of knowledge. This book looks at the positive linkage between IP and competition in jurisdictions around the world, surveying developments and policy issues from an international and comparative perspective. It includes analysis of key doctrinal and policy issues by leading academics and practitioners from around the globe and a cutting-edge survey of related developments across both developed and developing economies. It also situates current policy developments at the national level in the context of multilateral developments, at WIPO, WTO and elsewhere.

Edward Elgar Publishing
With this publication, WIPO and the author aim at making available for judges, lawyers and law enforcement officials a valuable tool for the handling of intellectual property cases. To that effect, the case book uses carefully selected court decisions drawn from various countries with either civil or common law traditions. The extracts from the decisions and accompanying comments illustrate the different areas of intellectual property law, with an emphasis on matters that typically arise in connection with the enforcement of intellectual property rights in civil as well as criminal proceedings.

INTERNATIONAL INTELLECTUAL PROPERTY. Aspen Publishers
The TRIPS Agreement (Agreement on Trade-Related Aspects of Intellectual Property Rights), signed on April 15, 1994, introduced intellectual property protection into the World Trade Organization's

multilateral trading system, and it remains the most comprehensive international agreement on intellectual property to date. A Neofederalist Vision of TRIPS by Graeme B. Dinwoodie and Rochelle C. Dreyfuss examines its interpretation, its impact on the creative environment, and its effect on national and international lawmaking. It propounds a vision of TRIPS as creating a neofederalist regime, one that will ensure the resilience of the international intellectual property system in time of rapid change. In this vision, WTO members retain considerable flexibility to tailor intellectual property law to their national priorities and to experiment with changes necessary to meet new technological and social challenges, but agree to operate within an international framework. This framework, while less powerful than the central administration of a federal government, comprises a series of substantive and procedural commitments that promote the coordination of both the present intellectual property system as well as future international intellectual property lawmaking. Part I demonstrates the centrality of state autonomy throughout the history of international negotiations over intellectual property. Part II, which looks at the present, analyzes the decisions of the WTO in intellectual property cases. It concludes that the WTO has been inattentive to the benefits of promoting cultural diversity, the values inherent in intellectual property, the rich fabric of its law and lore, the necessary balance between producers and users of knowledge goods, and the relationship between the law and the technological environment in which it must operate. Looking to the future, Part III develops a framework for integrating the increasingly fragmented international system and proposes the recognition of an international intellectual property *acquis*, a set of longstanding principles that have informed, and should continue to inform intellectual property lawmaking. The *acquis* would include both express and latent components of the international regime, put access-regarding guarantees such as user rights on a par with proprietary interests and enshrine the fundamental importance of national autonomy in the international system.

[Documents Supplement to Accompany International Intellectual Property](#) International Intellectual Property, Problems, Cases and Materials
This Supplement accompanies Chow and Lee's *International Intellectual Property: Problems, Cases, and Materials*. The new edition includes recent amendments and lists of members to the major international intellectual property agreements, European Patent Convention, and directives of the European Union.

3rd edition National Academies Press
'This clearly-written and comprehensive text, by two leading scholars of European intellectual property law, is extremely adaptable. It is a perfect platform for classroom teaching, and is also a fine resource for those researching in what is becoming an increasingly complex field.' - Graeme B. Dinwoodie, University of Oxford, UK 'This hybrid volume, part commentary, part primary sources, with questions to stimulate further thinking, serves both as a teaching tool and as a manual for lawyers who seek a comprehensive overview of EU intellectual property law. The book aims at a generalist legal audience, with very a helpful précis of international law, including the major multilateral treaties, as well as a summary of the EU legal framework that non-Europeans will find highly useful. The authors explore the full range of traditional and emerging IP rights. They also provide in-depth analysis of remedies and of the international private law issues that increasingly arise in contemporary complex IP litigation.' - Jane Ginsburg, Columbia Law School, US The first of its kind, this textbook has been carefully designed to give students and non-specialist practitioners a clear understanding of the fundamentals of European intellectual property law. Providing a comprehensive overview of both community IP rights, and areas of IP law that have been harmonised, and supported by judicious use of extracts from the most significant source material, the book assists the reader in navigating through the increasingly complex European IP system. *European Intellectual Property Law* deals with European patent, trade mark and copyright law copyright, as well as with adjacent areas such as protection of plant varieties, geographical indications, industrial design, competition law, enforcement, and private international law, with a focus on the most relevant case law to be found in those areas. Key Features: • Written by two of the leading authorities in European IP law • Concise and readable style • Extracts from key source material • Questions designed to stimulate thinking around legal problems • Coverage of related areas adjacent to IP • Offers an overview on international IP protection and the interrelation between European law and IP law in general. This detailed book is designed for all courses on European intellectual property, whether basic or advanced, as well as for practitioners looking for a comprehensive and concise overview on the structure and content of European IP law.

Problems, Cases and Materials West Academic Publishing

As technological developments multiply around the globe--even as the patenting of human genes comes under serious discussion--nations, companies, and researchers find themselves in conflict over intellectual property rights (IPRs). Now, an international group of experts presents the first multidisciplinary look at IPRs in an age of explosive growth in science and technology. This thought-provoking volume offers an update on current international IPR negotiations and includes case studies on software, computer chips, optoelectronics, and biotechnology--areas characterized by high development cost and easy reproducibility. The volume covers these and other issues: Modern economic theory as a basis for approaching international IPRs. U.S. intellectual property practices versus those in Japan, India, the European Community, and the developing and newly industrializing countries. Trends in science and technology and how they affect IPRs. Pros and cons

of a uniform international IPRs regime versus a system reflecting national differences.

International Trade Law Oxford International Arbitration

The second edition of this popular textbook has been thoroughly revised, expanded and updated in order to reflect the recent extensive changes in European IP legislation. Providing an in-depth examination of the core areas of IP law, from copyright, patents and trademarks through to the protection of plant varieties and industrial design, it is perfectly pitched to guide the reader through the complexities of the European IP system. New to this edition:* Coverage of recent legislative changes since the first edition, including detail on the proposed new copyright package* New expanded chapters on Plant Variety Rights, Industrial Designs and Geographical Indications * New chapter on IPRs and Unfair Competition, including Trade Secrets* Expanded chapter on patents by a patent expert who joined the author teamKey features:* Offers a clear and concise

style, giving students and non-specialist practitioners a clear understanding of the fundamentals of European intellectual property law* Highlights extracts from key cases and source material* Poses questions designed to provoke wider thinking around legal problems* Covers related areas adjacent to IP law, in order to help students understand the context in which IP legislation operates* Gives an overview of community and European IP rights and areas that have been harmonized legislatively* Considers international IP protection and the interrelation between European and IP law more broadly in order to promote comparative studyWith its detailed and comprehensive overview on the structure and content of European IP law, this textbook has proved an essential companion to both basic and advanced courses on European intellectual property across the globe.
