Strategies from Business Leaders on
Making the Most of China's Future
Springer Nature

This book provides an overview of the global pharmaceutical pricing policies. Medicines use is increasing globally with the increase in resistant microbes, emergence of new treatments, and because of awareness among consumers. This has resulted in increased drug expenditures globally. As the pharmaceutical market is expanding, a variety of pharmaceutical pricing strategies and policies have been employed by drug companies, state organizations and pharmaceutical pricing authorities.

The Book in Africa John Wiley & Sons
The COVID-19 pandemic has demonstrated our fragility as a species. Humanity was attacked by a previously unknown virus that spread very rapidly, thanks to a speed of population mobility never before seen in human history. It succeeded in creating the complete upset of the global socio-economic system. Such an event gives us an important stimulus to re-evaluate health in the context of a circular system that encompasses humans and the environment in which we live. The key challenge we face is the discovery of novel paths to crisis resolution. Can we abandon the often cherished, but now rather obsolete, tendency to specialize in a restricted subject area? Can we re-discover the ability to become permeable to ideas that reach us from

other disciplines and embrace a thinking-out-of-the-box approach? This book encourages the reader to consider this challenge via the telling of stories, both great and small. Stories that, although sometimes overlooked, have defined the course of our history and thus open the door to a new pathway of progress. In some ways, COVID-19 may have shown the direction nature expects us to take. Ilaria Capua suggests to us that, today more than ever, we are the responsible actors in the circle of life, guardians of our planet and defenders of its health. As one entity of circular nature.

First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

Fighting Corruption in Public Services OUP Oxford

This book provides a new institutional economics perspective on alternative models of local governance, offering a comprehensive view of local government organization and finance in the developing world. The experiences of ten developing/transition economies are reviewed to draw lessons of general interest in strengthening responsive, responsible, and accountable local governance. The book is written in simple user friendly language to facilitate a wider readership by policy makers and practitioners in addition to students and scholars of public finance, economics and politics.

Living Planet Report 2018 Springer

Walkthrough with Maps - Each area of the new Sinnoh region will be comprehensively covered so players will be able to find all the new Pokémon.

Corporate Social Responsibility in the Maritime Industry Random House Books for Young Readers

This book tackles the ethical problems of the "Fourth Industrial Revolution" (4IR) and offers readers an overview of the ethical challenges connected to Artificial Intelligence (AI), encryption and the finance industry. It specifically focuses on the situation of females in these industries, from women lawyers, judges, attorneys-at-law, investors and bankers, to portfolio managers, solicitors and civil servants. As the 4IR is more than "just" a technology-driven transformation, this book is a call to policymakers and business leaders to harness new technologies in order to create a more inclusive, human-centered future. It offers many practical cases of proactive change agents, and offers solutions to the ethical challenges in connection with implementing revolutionary disruptive products that often eliminate the intermediary. In addition, the book addresses sustainable finance in startups. In this context, education, training, agility and life-long learning in financial literacy are some of the key solutions highlighted here. The respective contributors supply a diverse range of perspectives, so as to promote a multi-stakeholder approach.

Financial Services Law Springer

The Little Data Book on Financial Inclusion 2015 is a pocket edition of the Global Financial Inclusion Database published in 2015 in The Global Findex Database 2014: Measuring Financial Inclusion around the World by Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, and Peter Van Oudheusden

(World Bank Policy Research Paper 7255). It provides 41 country-level indicators of financial inclusion summarized for all adults and disaggregated by key demographic characteristics gender, age, income, and rural residence. The book also includes summary pages by region and by income group aggregates. Covering 143 economies, the indicators of financial inclusion measure how people save, borrow, make payments and manage risk."

Proceedings of the International Russian Automation Conference, RusAutoCon 2019, September 8-14, 2019, Sochi, Russia Routledge

This book focuses on solar energy conversion systems that can be implemented in the built environment, at building or at community level. The quest for developing a sustainable built environment asks for specific solutions to provide clean energy based on renewable sources, and solar energy is considered one of the cleanest available energy on Earth. The specific issues raised by the implementation location are discussed, including the climatic profile distorted by the buildings, the available surface on the buildings for implementation, etc. This book also discusses the seasonal and diurnal variability of the solar energy resource in parallel with the variability of the electrical and thermal energy demand in the built environment (particularly focusing on the residential buildings). Solutions are proposed to match these variabilities, including the development of energy mixes with other renewables (e.g. geothermal or biomass, for thermal energy production). Specific solutions, including case studies of systems implemented on buildings all over the world, are presented and analyzed for

electrical and for thermal energy production and the main differences in the systems design are outlined. The conversion efficiency (thus the output) and the main causes of energy losses are considered in both cases. The architectural constraints are additionally considered and novel solar energy convertors with different shapes and colors are presented and discussed. The durability of the solar energy conversion systems is analyzed considering the specific issues that occur when these systems are implemented in the built environment; based on practical examples, general conclusions are formulated and specific aspects are discussed in relation to experimental results and literature data. With renewables implemented in the built environment likely to expand in the near future, this book represents welcome and timely material for all professionals and researchers that are aiming to provide efficient and feasible solutions for the sustainable built environment. Simon and Schuster

Transforming Climate Finance and Green Investment with Blockchains establishes and analyzes the connection between this revolutionary technology and global efforts to combat climate change. The benefits of blockchain come through various profound alterations, such as the adoption of smart contracts that are set to redefine governance and regulatory structures and transaction systems in coming decades. Each chapter contains a problem statement that describes the challenges blockchain technology can address. The book brings together original visions and insights from global members of the Blockchain Climate Institute, comprising thought leaders, financial professionals, international development practitioners, technology

entrepreneurs, and more. This book will help readers understand blockchain technology and how it can facilitate the implementation of the Paris Agreement and accelerate the global transition to a green economy. Provides an authoritative examination of this emerging digital technology and its implications on global climate change governance Includes detailed proposals and thorough discussions of implementation issues that are specific to green economy sectors Relates innovative proposals to existing applications to demonstrate the value add of blockchain technology Covers blockchain for the smarter energy sector, for fraud-free emissions management, to streamline climate investments, and legal frameworks for blockchain-based climate finance

United States and Canada Springer
This book explores how Asia's fast-growing cities can fulfil their potential as engines of economic prosperity and provide a livable environment for all citizens. But for this to happen, major challenges that reduce urban communities' quality of life and economic opportunities must be addressed. These include poor planning, a lack of affordable housing, inequalities, pollution, climate vulnerabilities, and urban infrastructure deficits. The book's 19 articles unwrap these challenges and present solutions focused on smart and inclusive planning, sustainable transport and energy, innovative financing, and resilience and rejuvenation.

This book features a selection of thoroughly refereed papers presented at two subconferences of the IFIP TC 3 Conference on Key Competencies in Informatics and Information and

Communication Technologies: the IFIP WG 3.4 Conference on Key Competencies for Educating ICT Professionals, KCICTP 2014, and the IFIP WG 3.7 Conference on Information Technology in Educational Management, ITEM 2014, held in Potsdam, Germany, in July 2014. The 28 revised full papers were carefully reviewed and selected from numerous submissions. They are organized in the following topical sections: key competencies for educating ICT professionals; key competencies, learning and life transitions; key competencies and school management; and education stakeholders and key competencies.

Emerging Trends in Real Estate

2018 Springer Nature

Drawing on the Household Living Arrangements of Older Persons 2019 Dataset, the World Population Ageing 2020 Highlights will document key patterns and trends of the household living arrangements of older persons around the world. These levels or trends will be described using indicators such as the average number of persons per household, the distribution of older persons by household type, by type of living arrangement and select characteristics of heads of household. The report will also address the impact of living arrangements of older persons on their vulnerability to the COVID-19 (coronavirus) pandemic. It will conclude with a brief discussion of global and regional trends in policies on population ageing based on the most recently available data from the United Nations Inquiry among Governments on Population and Development (2019).

Dracula Academic Press

This book addresses the environmental, legal, social, and economic aspects of corporate social responsibility in the

maritime industry. It discusses the voluntary aspects of the CSR concept and how the lines between informal and formal rules are merging and becoming fuzzy. Further, it shows how regulation is enhancing responsibility and sustainability in the maritime industry. The book gathers the experiences of the WMU, IMO, UN and public and private actors in developing and developed countries in the maritime industry.

by Keqiang Li. Published by Good Press.

Good Press publishes a wide range of

titles that encompasses every genre.

From well-known classics & literary

fiction and non-fiction to forgotten—or

yet undiscovered gems—of world

literature, we issue the books that need

to be read. Each Good Press edition has

been meticulously edited and formatted

to boost readability for all e-readers and

devices. Our goal is to produce eBooks

that are user-friendly and accessible to

everyone in a high-quality digital format.

World Population Ageing 2020

Highlights EGEA spa

This book focuses on the ways in which

military installations and small cities can

implement and integrate triple net

planning and energy, water, and waste

sustainability strategies into broad

installation operational management,

arrive at the best decision, create policy

and communicate effectively to

stakeholders. It explores current and

emerging technologies, methods, and

frameworks for energy conservation,

efficiency, and renewable energy within

the context of triple net zero

implementation practice. Recognizing

that the challenge extends beyond

finding technological solutions to

achieve triple net zero outcomes, the contributions also address the need for a systemic view in the planning phase, as well as adequate communication and policy measures and incentives.

City Integration and Tourism

Development in the Greater Bay Area,

China Springer

This book reports on innovative research and developments in automation. The chapters spans a wide range of disciplines, including communication engineering, power engineering, control engineering, instrumentation, signal processing and cybersecurity. Emphasis is given to methods and findings aimed at fostering better control and monitoring of industrial and manufacturing processes, and improving safety. Based on the International Russian Automation Conference, held in September 8-14, 2019, in Sochi, Russia, the book provides academics and professionals with a timely overview and extensive information on the state of the art in the field of automation and control systems, and is expected to foster new idea, as well as collaboration between different groups in different countries.

Critical Debates Gower Publishing, Ltd. The Enterprise Architecture Management (EAM) discipline deals with the alignment of business and information systems architectures. While EAM has long been regarded as a discipline for IT managers, this book takes a different stance: It explains how top executives can use EAM to leverage their strategic planning and controlling processes, as well as how it can contribute to their sustainable competitive advantage. Based on the analysis of best practices from eight leading European companies from various industries, the book presents the crucial elements of successful EAM. It outlines what executives need to do in

terms of governance, processes, methodologies, and culture in order to bring their management to the next level. Beyond this, the book points out how EAM could develop in the next decade, thus allowing today's managers to prepare for the future architecture management.

This new edition covers many significant changes impacting the petroleum industry including important updates such as current industry practice issues from a proprietary survey conducted by the Institute of Petroleum Accounting, and practical guidance on new standards of revenue recognition, joint arrangements, consolidated financial statements, and disclosure of interests in other entities which are of critical importance to those involved or interested in the petroleum industry. New chapters covering midstream operations, master limited partnerships, and SEC considerations have been added. The updated text will also address numerous operational issues that continue to evolve with the demand for capital,

inherent industry risks, and the impacts of product price fluctuation.
