From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a

pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together *Mastering the Basic Math Facts in Multiplication and Division* B&H Publishing Group Budgeting shows you how to assemble a complete system of budgets, including budgets for revenue, production, overhead, administration, and compensation. It also addresses several variations on the basic budgeting concept - the flexible budget, conditional budget, and zero-base budget. The book also delves into how to operate a business without a budget. Finally, there are

many procedures, controls, and reports designed to complement a budget.

Convex optimization problems arise frequently in many different fields. This book provides a comprehensive introduction to the subject, and shows in detail how such problems can be solved numerically with great efficiency. The book begins with the basic elements of convex sets and functions, and then describes various classes of convex optimization problems. Duality and approximation techniques are then covered, as are statistical estimation techniques. Various geometrical problems are then presented, and there is detailed discussion of unconstrained and constrained minimization problems, and interior-point methods. The focus of the book is on recognizing convex optimization problems and then finding the most appropriate technique for solving them. It contains many worked examples and homework exercises and will appeal to students, researchers and practitioners in fields such as engineering, computer science, mathematics, statistics, finance and economics.

The first two decades of the twenty-first century have witnessed an influx of innovations and reforms in public financial management. The current wave of reforms is markedly different from those in the past, owing to the sheer number of innovations, their widespread adoption, and the sense that they add up to a fundamental change in the way governments manage public money. This book takes stock of the most important innovations that have emerged over the past two decades, including fiscal responsibility legislation, fiscal rules, medium-term budget frameworks, fiscal councils, fiscal risk management techniques, performance budgeting, and accrual reporting and accounting. Not merely a handbook or manual describing practices in the field, the volume instead poses critical questions about innovations; the issues and challenges that have appeared along the way, including those associated with the global economic crisis; and how the ground can be prepared for the next generation of public financial management reforms. Does fear and insecurity keep you from looking at your bank account? Is your financial anxiety holding you captive? You don't have to stress about money anymore. YOU can take back control. As a newly divorced single mom making \$24,000 per year and facing down \$77,000 in debt, Kumiko Love worried constantly about money. She saw what other moms had—vacations, birthday parties, a house full of furniture—and felt ashamed that she and her son lived in a small apartment and ate dinner on the floor. Worse, when her feelings began to exhaust her, she binge-shopped, reasoning that she'd feel better after a trip to the mall. On the day she needed to pay for a McDonald's ice cream cone without her credit card, she had an epiphany: Money is not the problem. Self-Doubt is the problem. Shame is the problem. Guilt is the problem. Society's expectations for her are the problem. She is the solution. Once she reversed the negative thinking patterns pushing her toward decisions that didn't serve her values or goals, her financial plan wrote itself. Now, she's not only living debt-free in her dream home, which she paid for in cash, but she has spread her teachings around the world and helped countless women envision better lives for themselves and their families. Now, building on the lessons she's taught millions as the founder of The Budget Mom, she shares a step by step plan for taking control back over your financial life—regardless of your level of income or your credit card balance. Through stories from navigating divorce to helping clients thrive through recessions, depression, eviction, layoffs and so much more, you will learn foundational practices such as: How to use your emotions to your financial advantage, instead of letting them control you How to create a budget based on your real

life, not a life of self-denial How to create a motivating debt pay-off plan that makes you excited about your future, instead of fearing it My Money My Way will give you the tools to align your emotional health with your financial health—to let go of deprivation and embrace desire. Love's paradigm-shifting system will teach you how to honor your unique personal values, driving emotions, and particular needs so that you can stop worrying about money and start living a financially fulfilled life.

This lecture notes provides an overview of budgeting and financial management in the public and non-profit sectors. Fundamental concepts and practices of budgeting, financial management and public finance are introduced, with special emphasis on state and local government budgeting and financial management in the United States. The objectives of courses in Public Budgeting and this title are to teach the basic concepts and nomenclature of public finance, to develop an understanding of budget processes as well as the sources and uses of public revenues, and to make relatively simple, but useful computations in an intelligent way. Key course learning outcomes include the abilities to: There are no indispensable pre-requisites by the reader, and it has been designed for students from a wide variety of backgrounds and undergraduate majors. Although this works well as an introductory text to a broader public administration curriculum, it also can make sense for students to take after some more basic courses in economics, policy analysis, and public organizations. Issues of tax incidence and the effect of taxes on economic efficiency can be covered in greater depth.

Fiona Beckett teaches us how to buy and stretch our food, explaining that it's easy to eat well without shedding loads of money. This mouthwatering collection of recipes is split into three eminently useful sections. 'Survive' is all about the basics of cooking for yourself, with recipes which help you to eat well without breaking the bank. 'Share' is a selection of fantastic recipes for two and more, and for preparing big meals for students who live together. 'Splash Out' is a taste of something a little more swish: for those who want to impress but don't have a whole lot of money. Fiona shows you how to budget, buy and use your food carefully, with great ideas on how to save when you buy and stretch what food you do use and never waste what's leftover. An invaluable book for every student.

A budgeting handbook for academic administrators and faculty is presented. Economic and political influences on budgeting are considered, along with sources of funds for public and private colleges, and the chronology of the budget process. Multiyear summaries of the budget process in different types of colleges are included. Some major policy issues facing public colleges and state officials are identified, and the use of analytical tools and financial reporting to alter budget outcomes is addressed. A hypothetical college is used to introduce fund accounting, and six budgeting approaches are summarized. Additional topics include: how participants can influence the budget process, the relationship of the capital budget to the annual operating budget, sources of flexibility in the budget process, budget planning for reallocation and retrenchment, policy issues for endowment management, cost analysis procedures, the instructional workload matrix, enrollment forecasting, the nature of indirect costs associated with sponsored programs, and a range of mathematical models used in budgeting. Appendices include strategies for increasing revenue and decreasing expenditures, and documents of the American Association of University Professors and the National Association of College and University Business Officers. It is difficult to think of a business process that is as widely unpopular, dysfunctional and discredited as traditional budgeting - yet over a decade after the creation of the Beyond Budgeting movement, many business people are unaware of its existence. And many of those that have heard of it find the Beyond Budgeting ideas difficult to grasp because they have been conditioned by experience to think in a very narrow way about the process of management. This book fills in these gaps in awareness and understanding by answering the question 'what is Beyond Budgeting?' in a clear and succinct way to help you make informed choices about the way that you run your business, as an alternative to blindly copying your predecessors. Amongst the things you will discover are: How the financial operating model used to organise and run the affairs of an enterprise impacts many aspects of corporate life, not just the level of business performance The universal law of complexity that explains why traditional budgeting will always fail to deliver what it promises: predictable performance. How the Beyond Budgeting process model is better equipped to deal with the complexity of modern organisational life and the uncertainty of the world Why and how an organisation has to be designed to complement the processes used to plan and control its activities. How to bring about change The goal is to help build healthier, more adaptive organisations, better able to meet the challenges and exploit the opportunities thrown up by the modern world.
