Freshwater Fish dichotomous key.

Purpose: The purpose of this laboratory experience is: -to correctly use a

dichotomous key for identifying common freshwater fish found in New York State,

-to understand how scientists in a variety of fields use classification keys to

identify specimens. -to further

understand the necessity of the

Linnaean classification system -to

correctly identify unknown

specimens Using a Dichotomous

Classification Key to Identify Common

...Background: A dichotomous key is a

tool that allows the user to determine the identity of items in the natural world,

such as trees, wildflowers, mammals, reptiles, rocks, and fish. Keys consist of a

series of "either or" choices that lead the user to the correct name of a given item.

"Dichotomous" means "divided into two

parts". Therefore, dichotomous keys

always give two choices in each

step. Using a Dichotomous Classification

Key to Identify Common ...Background: A

dichotomous key is a tool that allows the

user to determine the identity of items in the natural world, such as trees,

wildflowers, mammals, reptiles, rocks,

and fish. Keys consist of a series of
