Neil Josten is the newest addition to the Palmetto State University Exy team. He's short, he's fast, he's got a ton of potential - and he's the runaway son of the murderous crime lord known as The Butcher. Signing a contract with the PSU Foxes is the last thing a guy like Neil should do. The team is high profile and he doesn't need sports crews broadcasting pictures of his face around the nation. His lies will hold up only so long under this kind of scrutiny and the truth will get him killed. But Neil's not the only one with secrets on the team. One of Neil's new teammates is a friend from his old life, and Neil can't walk away from him a second time. Neil has survived the last eight years by running. Maybe he's finally found someone and something worth fighting for.

The first comprehensive reference on mechatronics, The Mechatronics Handbook was quickly embraced as the gold standard in the field. From washing machines, to coffeemakers, to cell phones, to the ubiquitous PC in almost every household, what, these days, doesn't take advantage of mechatronics in its design and function? In the scant five years since the initial publication of the handbook, the latest generation of smart products has made this even more obvious. Too much material to cover in a single volume Originally a single-volume reference, the handbook has grown along with the field. The need for easy access to new material on rapid changes in technology, especially in computers and software, has made the single volume format unwieldy. The second edition is offered as two easily digestible books, making the material not only more accessible, but also more focused. Completely revised and updated, Robert Bishop's seminal work is still the most exhaustive, state-of-the-art treatment of the field available.
