PERKINS DILLON

Idols and Celebrity in Japanese Media Culture National
Academies Press

This is the most complete and compelling account of idols and
celebrity in Japanese media culture to date. Engaging with the
study of media, gender and celebrity, and sensitive to history and
the contemporary scene, these interdisciplinary essays cover
male and female idols, production and consumption, industrial
structures and fan movements.

Engines and Powertrains Springer

Describes the expeditions embarked upon by sailors and

speculators to navigate the Northwest Passage during the Age of
Reason in the eighteenth century.

(2013) #1 New York Times Bestseller Baked goods that are
marvels of ingenuity and simplicity from the famed Bouchon
Bakery The tastes of childhood have always been a touchstone
for Thomas Keller, and in this dazzling amalgam of American and
French baked goods, you'll find recipes for the beloved TKOs and
Oh Ohs (Keller's takes on Oreos and Hostess's Ho Hos) and all the
French classics he fell in love with as a young chef apprenticing in
Paris: the baguettes, the macarons, the mille-feuilles, the tartes
aux fruits. Co-author Sebastien Rouxel, executive pastry chef for
the Thomas Keller Restaurant Group, has spent years refining

techniques through trial and error, and every page offers a new lesson: a trick that assures uniformity, a subtlety that makes for a professional finish, a flash of brilliance that heightens flavor and enhances texture. The deft twists, perfectly written recipes, and dazzling photographs make perfection inevitable.

National Agenda for Motorcycle Safety Artisan

Starting your own business is a daunting task. No matter how talented you are, no matter how much capital you have, no matter how good your business plan is, if you're pursuing a fundamentally flawed opportunity you're heading for failure. So before spending time and money on a new enterprise it's vital to know if your idea is actually going to work in practice. The New Business Road Test shows you how to avoid the obvious mistakes that everyone else makes. The new edition of this best-selling book features: * A new version of the 7 domains model. * Updated case studies that reflect the changes that have happened in the last four years. * Chapter 13 has been rewritten to make the Industry Analysis Checklist more understandable. * A new author run companion website for readers to access extra information.

Tires and Tracks HarperCollins UK

This book sheds light on all aspects of earnings claims, including defining what an earnings claim really is, the origins of its regulation under the franchise disclosure laws, how a franchisor should prepare an earnings claim, how a franchisee should use an earnings claim, how a franchisee may attack lawful and unlawful earnings claims, how a franchisor may defend against such attacks, and how the government franchise enforcement authorities, investigate unlawful earnings claim activity.

SNOWMOBILE SERVICE MANUAL. 11TH ED. Haynes Publishing

The acclaimed bestseller that's teaching the world about the power of mass collaboration. Translated into more than twenty languages and named one of the best business books of the year by reviewers around the world, Wikinomics has become essential reading for business people everywhere. It explains how mass collaboration is happening not just at Web sites like Wikipedia and YouTube, but at traditional companies that have embraced technology to breathe new life into their enterprises. This national bestseller reveals the nuances that drive wikinomics, and share fascinating stories of how masses of people (both paid and volunteer) are now creating TV news stories, sequencing the human genome, remixing their favorite music, designing software, finding cures for diseases, editing school texts, inventing new cosmetics, and even building motorcycles.

Desert Fever Penguin Books

Faced with a series of dark occurrences that are linked to a twenty-year-old murder, private investigator Cork O' Connor must stop a vengeful force before his family and friends pay the ultimate price.

Motorcycles and Our 2nd 50 Years Capstone Publishing

An analysis of globalisation as an international system that today directly or indirectly influences the politics, environment, geopolitics and economics of virtually every country in the world.

Cannibals with Forks John Deere Publishing

La 4e de couverture indique : "The swift expansion of developing Asia is probably the most significant structural change in the world economy of the twenty-first century. Latin America, and in particular South America, have strongly benefited from developing Asia's surge. China has become one of the region's main trade partners. Despite their benefits, strengthened trans-Pacific economic relations have also become a cause for concern in Latin America, due to major imbalances of different kinds. The purpose of this book is twofold. On the one hand, it aims to document the growing investment and trade relations between Latin America and Asia, as well as some of their imbalances. On the other hand, it provides several examples on how to upgrade trans-Pacific economic relations."

When Mahabali, the Asura king who conquered the three worlds, reigned there was no crime or inequality. People enjoyed their fraternity and liberty to the fullest. The unhappy gods of the Sky World decide to take the help of Lord Vishnu to overthrow Mahabali. Millions of years later, a 21st-century narrator is chosen by God to tell the untold story of Mahabali's life. Secrets soon begin to uncover. How did Mahabali create a Utopia on earth? Did Guru Sukracharya cheat him? Did he find true love? Is Mahabali still alive? Will he come again to regain his throne as the Emperor of the three worlds?

Introduction to Business Wiley Global Education

How a team of musicians, engineers, computer scientists, and psychologists developed computer music as an academic field and ushered in the era of digital music. In the 1960s, a team of Stanford musicians, engineers, computer scientists, and psychologists used computing in an entirely novel way: to produce and manipulate sound and create the sonic basis of new musical compositions. This group of interdisciplinary researchers at the nascent Center for Computer Research in Music and Acoustics (CCRMA, pronounced "karma") helped to develop computer music as an academic field, invent the technologies that underlie it, and usher in the age of digital music. In *The Sound of Innovation*, Andrew Nelson chronicles the history of CCRMA, tracing its origins in Stanford's Artificial Intelligence Laboratory through its present-day influence on Silicon Valley and digital music groups worldwide. Nelson emphasizes CCRMA's interdisciplinarity, which stimulates creativity at the intersections of fields; its commitment to open sharing and users; and its pioneering commercial engagement. He shows that Stanford's outsized influence on the emergence of digital music came from the intertwining of these three modes, which brought together diverse supporters with different aims around a field of shared interest. Nelson thus challenges long-standing assumptions about the divisions between art and science, between the humanities and technology, and between academic research and commercial applications, showing how the story of a small group of musicians reveals substantial insights about innovation. Nelson draws on extensive archival research and dozens of interviews with digital music pioneers; the book's website provides access to original historic documents and other material.

St. Joseph Anthology WIPO

With production and planning for new electric vehicles gaining momentum worldwide, this book – the third in a series of five volumes on this subject – provides engineers and researchers with perspectives on the most current and innovative developments regarding electric and hybrid-electric vehicle technology, design considerations, and components. This book features 13 SAE technical papers, published from 2008 through 2010, that provide an overview of research on electric vehicle engines and powertrains. Topics include: Hybrid-electric vehicle transmissions and propulsion systems The development of a new 1.8-liter engine for hybrid vehicles Vehicle system control software validation The impact of hybrid-electric powertrains on chassis systems and vehicle dynamics High-torque density motors, and interior permanent magnet synchronous motors

Advanced Materials by Design Johns Hopkins University Press

Mini Down Under traces the history of one of New Zealand's - and the world's - best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car and the eventual development into the latest generation Mini for a new century.

El espacio, ya sea físico o virtual, puede tener un impacto

significativo en el aprendizaje. Learning Spaces se centra en la forma en que las expectativas de los alumnos influyen en dichos espacios, en los principios y actividades que facilitan el aprendizaje y en el papel de la tecnología desde la perspectiva de quienes crean los entornos de aprendizaje: profesores, tecnólogos del aprendizaje, bibliotecarios y administradores. La tecnología de la información ha aportado capacidades únicas a los espacios de aprendizaje, ya sea estimulando una mayor interacción mediante el uso de herramientas de colaboración, videoconferencias con expertos internacionales o abriendo mundos virtuales para la exploración. Este libro representa una exploración continua a medida que unimos el espacio, la tecnología y la pedagogía para asegurar el éxito de los estudiantes.

Financial Performance Representations UN

Fun and Software offers the untold story of fun as constitutive of the culture and aesthetics of computing. Fun in computing is a mode of thinking, making and experiencing. It invokes and convolutes the question of rationalism and logical reason, addresses the sensibilities and experience of computation and attests to its creative drives. By exploring topics as diverse as the pleasure and pain of the programmer, geek wit, affects of play and coding as a bodily pursuit of the unique in recursive structures, Fun and Software helps construct a different point of entry to the understanding of software as culture. Fun is a form of production that touches on the foundations of formal logic and precise notation as well as rhetoric, exhibiting connections between computing and paradox, politics and aesthetics. From the formation of the discipline of programming as an outgrowth

of pure mathematics to its manifestation in contemporary and contradictory forms such as gaming, data analysis and art, fun is a powerful force that continues to shape our life with software as it becomes the key mechanism of contemporary society.

Including chapters from leading scholars, programmers and artists, *Fun and Software* makes a major contribution to the field of software studies and opens the topic of software to some of the most pressing concerns in contemporary theory.

Wikinomics Edward Elgar Publishing

The picture on the front cover of this book is of the former site of M. Jeff Thompson's (1826-1876) home on Fifth Street in St. Joseph, Missouri. Originally from Virginia, he moved first to Liberty, Missouri and then to St. Joseph in 1848. In St. Joseph, he began as a store clerk before becoming a surveyor and the city engineer. Thompson served as St. Joseph's mayor from 1857 to 1860 and presided over the ceremony initiating the first ride of the Pony Express on April 3, 1860. The following year, in May, he received national notoriety for cutting down the union flag over the St. Joseph post office and tossing it down to a crowd of southern sympathizers who tore it to pieces. In his capacity as a brigadier general of the First Division, Missouri State Guard, during the Civil War, his patrol covered the swampy area in the southeastern part of Missouri. His battalion was referred to as the "Swamp Rats" and Thompson became known as the "Swamp Fox of the Confederacy." Picture taken by Denise Bartles-Tapia. The Origin: In the Spring semester of 2010 I taught a college course that dealt with local cultural history. The class met at various historical locations throughout the City of St. Joseph, Missouri. Frequently, community members that were acquainted with the

sites we visited would graciously discuss the historical and cultural significance of their particular place. As the class visited various places our numbers grew. Community people, including some who had discussed their site with the class, joined in our walks about town. As interest developed, I came up with the idea of publishing a book based on student stories about the history and culture of St. Joseph. Not only were students interested in this project but so too were the community members that had joined in our walks about town. In addition, as the word spread about this project, some historians familiar with the history of St. Joseph also wrote stories for inclusion in this book. The Editor: John Tapia received his Associate of Arts generalist degree from Pierce Junior College, California, a Bachelor of Arts degree in Speech Communication in 1972 from California State University, Northridge, a Master of Arts degree in Speech Communication in 1973 from the University of Massachusetts and a Doctorate of Philosophy degree, Speech Communication emphasis, in 1978 from the University of Arizona with minors in American History and Medical Statistics. He has published seven books including, most recently, *Rhetoric and Centers of Power in the Greco-Roman World* (University Press of America 2009) and *Circuit Chautauqua: From Rural Education to Popular Entertainment* (McFarland 1997, 2008). The latter book became the basis of the television documentary "Circuit Chautauqua: A Bridge Between Two Centuries." In addition, he has published twenty papers in scholarly journals and presented over seventy papers at scholarly conferences. He has also served as an editor for the *Southern Speech Journal* and the *Quarterly Journal of Speech*. Currently, he is working with the former Chief Diplomatic Interpreter of the

White House and State Department on a book discussing various aspects of diplomatic communication. He has also been requested to write a sequel to Rhetoric and Centers of Power.

Mahabali Simon and Schuster

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to

delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel
