The Transport Manager's and Operator's Handbook 2006 Teach Yourself

This second edition of the Handbook of Crime Prevention and Community Safety provides a completely revised and updated collection of essays focusing on the theory and practice of crime prevention and the creation of safer communities. This book is divided into five comprehensive parts: Part I, brand new to this edition, is concerned with theoretical perspectives on crime

prevention and community safety. Part II considers general approaches to preventing crime, including a new chapter on the theory and practice of deterrence. Part III focuses on specific crime prevention strategies, including a new chapter on regulation for crime prevention. Part IV focuses on the prevention of specific categories of crime and the fear they generate, including new chapters on organised crime and cybercrime. Part V considers the preventative process: the methods through which presenting problems can be analysed, responses formulated and implemented, and their effectiveness evaluated. Bringing together leading academics and practitioners from the UK, US, Australia and the Netherlands, this volume will be an invaluable reference for researchers and practitioners whose work relates to crime prevention and community safety, as well as for undergraduate and postgraduate courses in crime prevention.

This edited open access book gives a comprehensive overview of small and lightweight electric three- and four-wheel vehicles with an international scope. The present status of small electric vehicle (SEV) technologies, the market situation and main hindering factors for market success as well as options to attain a higher market share including new mobility concepts are highlighted. An increased usage of SEVs can have different impacts which are highlighted in the book in regard to sustainable transport, congestion, electric grid and transport-related potentials. To underline the effects these vehicles can have in urban areas or rural areas, several case studies are presented covering outcomes of pilot projects and studies in Europe. A study of the operation and usage in the Global South extends the scope to a global scale. Furthermore, several concept studies and vehicle concepts on the market give a more detailed overview and show the deployment in different applications.
