 Mindshift reveals how we can overcome stereotypes and preconceived ideas about what is possible for us to learn and become. At a time when we are constantly being asked to retrain and reinvent ourselves to adapt to new technologies and changing industries, this book shows us how we can uncover and develop talents we didn't realize we had—no matter what our age or background. We're often told to "follow our passions." But in Mindshift, Dr. Barbara Oakley shows us how we can broaden our passions. Drawing on the latest neuroscientific insights, Dr. Oakley shepherds us past

simplistic ideas of "aptitude" and "ability," which provide only a snapshot of who we are now—with little consideration about how we can change. Even seemingly "bad" traits, such as a poor memory, come with hidden advantages—like increased creativity. Profiling people from around the world who have overcome learning limitations of all kinds, Dr. Oakley shows us how we can turn perceived weaknesses, such as impostor syndrome and advancing age, into strengths. People may feel like they're at a disadvantage if they pursue a new field later in life; yet those who change careers can be fertile cross-pollinators: They bring valuable insights from one discipline to another. Dr. Oakley teaches us strategies for learning that are backed by neuroscience so that we can realize the joy and benefits of a learning lifestyle. Mindshift takes us deep

inside the world of how people change and grow. Our biggest stumbling blocks can be our own preconceptions, but with the right mental insights, we can tap into hidden potential and create new opportunities. [Stock Market Investing for Beginners & Dummies](#) Springer Science & Business Media  
 A New York Times Book Review Editors' Choice "In Daub's hands the founding concepts of Silicon Valley don't make money; they fall apart." --The New York Times Book Review From FSGO x Logic: a Stanford professor's spirited dismantling of Silicon Valley's intellectual origins Adrian Daub's *What Tech Calls Thinking* is a lively dismantling of the ideas that form the intellectual bedrock of Silicon Valley. Equally important to Silicon Valley's world-altering innovation are the language and ideas it uses to explain and justify itself.

And often, those fancy new ideas are simply old motifs playing dress-up in a hoodie. From the myth of dropping out to the war cry of “disruption,” Daub locates the Valley’s supposedly original, radical thinking in the ideas of Heidegger and Ayn Rand, the New Age Esalen Foundation in Big Sur, and American traditions from the tent revival to predestination. Written with verve and imagination, *What Tech Calls Thinking* is an intellectual refutation of Silicon Valley’s ethos, pulling back the curtain on the self-aggrandizing myths the Valley tells about itself. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech’s reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry’s many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

NEW YORK TIMES BESTSELLER • From the author of the international sensation *Crazy Rich Asians* and *China Rich Girlfriend*, here is the trilogy’s uproarious conclusion. • “A memorable, laugh-out-loud Asian glitz fest that’s a pure pleasure to read.” —USA Today  
When Nicholas Young hears that his grandmother, Su Yi, is on her deathbed, he rushes to be by her bedside—but he’s not alone. The entire Shang-Young clan has convened from all corners of the globe to stake claim on their matriarch’s massive fortune. With each family member vying to inherit Tyersall Park—a trophy estate on 64 prime acres in the heart of Singapore—Nicholas’s childhood home turns into a hotbed of speculation and sabotage. As her relatives fight over heirlooms, Astrid Leong is at the center of her own storm, desperately in love with her old sweetheart Charlie Wu, but tormented by her ex-husband—a man hell bent on destroying Astrid’s reputation and relationship. Meanwhile Kitty Pong, married to China’s second richest man, billionaire Jack Bing, still feels second best next to her new step-daughter, famous fashionista Colette Bing. A sweeping novel

that takes us from the elegantly appointed mansions of Manila to the secluded private islands in the Sulu Sea, from a kidnapping at Hong Kong’s most elite private school to a surprise marriage proposal at an Indian palace, caught on camera by the telephoto lenses of paparazzi, Kevin Kwan’s hilarious, gloriously wicked new novel reveals the long-buried secrets of Asia’s most privileged families and their rich people problems.

"Aven is a perky, hilarious, and inspiring protagonist whose attitude and humor will linger even after the last page has turned." —School Library Journal (Starred review) Aven Green loves to tell people that she lost her arms in an alligator wrestling match, or a wildfire in Tanzania, but the truth is she was born without them. And when her parents take a job running Stagecoach Pass, a rundown western theme park in Arizona, Aven moves with them across the country knowing that she'll have to answer the question over and over again. Her new life takes an unexpected turn when she bonds with Connor, a classmate who also feels isolated because of his own disability, and they discover a room at Stagecoach Pass that holds bigger secrets than Aven ever could have imagined. It's hard to solve a mystery, help a friend, and face your worst fears. But Aven's about to discover she can do it all . . . even without arms.

You know that you need to start investing, because you won't be able to work your whole life. You don't want to be the old employee working as a door greeter at your big chain department store. It will also be frustrating and very depressing if you are not financially aware of your future. Time seems to go faster the older you get and it's never too late to get started. But getting started might be one of your problems. There is too much information available and too many scammers are trying to get you to invest in shady companies. You also don't have

the time to figure everything out by yourself, because it might seem too hard and complicated. However, getting the investing part of your life handled will improve your life tremendously. You will have peace of mind when you think about your future and you will also have the confidence to make sound investing decisions. You'll also have the knowledge to talk intelligently with your peers and financial advisors, making it easy to spot when someone is giving you wrong information. I begin with the basics, like what are stocks and how the stock market works. I then transition into how you can make money in the stock market, give you some stocks you should have on your watch list and some of the lies and mistakes you will have to deal with as an investor. So, don't wait and get this book now. It's on sale at this moment, but the price will go up!

*Cooperative Control of Multi-Agent Systems* extends optimal control and adaptive control design methods to multi-agent systems on communication graphs. It develops Riccati design techniques for general linear dynamics for cooperative state feedback design, cooperative observer design, and cooperative dynamic output feedback design. Both continuous-time and discrete-time dynamical multi-agent systems are treated. Optimal cooperative control is introduced and neural adaptive design techniques for multi-agent nonlinear systems with unknown dynamics, which are rarely treated in literature are developed. Results spanning systems with first-, second- and on up to general high-order nonlinear dynamics are presented. Each control methodology proposed is developed by rigorous proofs. All algorithms are justified by simulation examples. The text is self-contained and will serve as an excellent comprehensive source of information for researchers and graduate students working with multi-agent systems.

A detailed look at the common characteristics found in most successful traders While there are a variety of approaches to trading in the financial markets, profitable traders tend to share

similar underlying characteristics. Most have a methodology that they believe will prove profitable over the long run and are willing to endure short-term setbacks. If you're looking to make the most of your time in today's markets, you need to understand what separates the best from the rest. And with *Trade Like a Casino*, you'll gain the knowledge needed to excel at this challenging endeavor. Engaging and informative, this reliable guide identifies and explains the key techniques and mental processes characteristic of successful traders. It reveals that successful traders operate very much like a casino in that they develop a method that gives them "positive expectancy" and they unflappably implement the method in the face of changing, and oftentimes volatile, market conditions. Page by page, the book explores the intricacies of methodology, mental control, and flexibility that allow traders to develop and maintain the casino-like edge. Reveals how many successful traders tend to follow the same general principles, even if their approach to trading may differ Explores how to account for the risk of being wrong and the market moving against you Discusses how to develop an approach that combines trade selection with sound risk management, avoids emotional attachment to positions, exploits volatility cycles, and focuses on market action Regardless of how you approach markets, the insights found here will help improve the way you trade by putting you in a better position to distinguish the differences between successful and unsuccessful traders. *Cooperative Control of Multi-Agent Systems* ARMOUR PUBLISHING PTE LTD "If stretching is one of those activities you put off because you think you don't have the time, Robert The's "5-Minute Stretch will put an end to your excuses....offers dozens of stretches to do alone or with a partner...explains the exercises clearly, and all are accompanied by photographs...the stretches are derived from a wide variety of sources: Tai Chi, Qi Gong, yoga, modern dance, and massage...helpful advice on how to remain comfortable and loose at work, at home, and even when you're on the road or in the air."-- "Massage Therapy Journal . 96 pages, 184 duotone illus., 6 1/2 x 8 5/8. *Trading Mentors: Learn Timeless Strategies and Best Practices from Successful Traders* McGraw Hill Professional

If you want to help people learn from activities, exercises or experiences, this book is for you. This book fills a gap; it is the gap between doing an activity and

learning from it. Plenty of books describe activities that are good for icebreaking, for team-building, for project management or for cross-cultural understanding, etc. A few of these books do give advice about reviewing (or debriefing) the activities, and 90% of the times it reads: "Here are some questions you can ask ...". How's that for boring and/or limiting? The result of such advice is that reviews are often dull and they dwell on what went wrong.

When reading, they give off a feeling of discomfort. But why is that? Well, one of the reasons is because the same people speak up all the time. And that bores and might even annoy the rest of the participants. Thus, reviewing gets a bad name and people just want the review to finish as quickly as possible so that they can get on with the next activity. This is a rare book for two reasons: It is about

reviewing (How many books have you come across on this subject?) It is about reviewing actively. (Which makes it not just rare, but unique.) With the help of this book, you can make reviews at least as engaging as the activities you are reviewing. No more discomfort. No more unwanted silences. No more superficial reviews. Just engaging and practical ways to help people learn from experience! How does that sound for a change?
