Explore the wondrous sea and the oddities of human nature in this international bestselling, thrilling epic novel of a Danish port town. Hailed in Europe as an instant classic, *We, the Drowned* is the story of the port town of Marstal, Denmark, whose inhabitants sailed the world from the mid-nineteenth century to the end of the Second World War. The novel tells of ships wrecked and blown up in wars,

of places of terror and violence that continue to lure each generation; there are cannibals here, shrunken heads, prophetic dreams, and miraculous survivals. The result is a brilliant seafaring novel, a gripping saga encompassing industrial growth, the years of expansion and exploration, the crucible of the first half of the twentieth century, and most of all, the sea. Called "one of the most exciting authors in Nordic literature" by Henning Mankell, Carsten Jensen has worked as a literary critic and a journalist, reporting from China, Cambodia, Latin America, the Pacific Islands, and Afghanistan. He lives in Copenhagen and Marstal. "We, the Drowned sets sail beyond the narrow channels of the seafaring genre and approaches Tolstoy in its evocation of war's confusion, its power to stun victors and vanquished alike...A gorgeous, unsparing novel."—Washington Post "A generational saga, a swashbuckling sailor's tale, and the account of a small town coming into modernity—both Melville and Steinbeck might have been pleased to read it."—New Republic "Dozens of stories coalesce into an odyssey taut with action and drama and suffused with enough heart to satisfy readers who want more than the breakneck thrills of ships battling the elements."—Publishers Weekly (starred)

A Suspense Thriller Houghton Mifflin Harcourt

As any reader of Jo Walton's *Among Others* might guess, Walton is both an inveterate reader of SF and fantasy, and a chronic re-reader of books. In 2008, then-new science-fiction mega-site Tor.com asked Walton to blog regularly about her re-reading—about all kinds of older fantasy and SF, ranging from acknowledged classics, to guilty pleasures, to forgotten oddities and gems. These posts have consistently been among the most popular features of Tor.com. Now this volumes presents a selection of the best of them, ranging from short essays to long reassessments of some of the field's most ambitious series. Among Walton's many subjects here are the Zones of Thought novels of Vernor Vinge; the question of what genre readers mean by "mainstream"; the underappreciated SF adventures of C. J. Cherryh; the field's many approaches to time travel; the masterful science fiction of Samuel R. Delany; Salman Rushdie's *Midnight's Children*; the early Hainish novels of Ursula K. Le Guin; and a Robert A. Heinlein novel you have most certainly never read. Over 130 essays in all, *What Makes This Book So Great* is an immensely readable, engaging collection of provocative, opinionated thoughts about past and present-day fantasy and science fiction, from one of our best writers. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Thiamine Deficiency Disease, Dysautonomia, and High Calorie Malnutrition explores thiamine and how its deficiency affects the functions of the brainstem and autonomic nervous system by way of metabolic changes at the level of the mitochondria. Thiamine deficiency derails mitochondrial oxidative metabolism and gives rise to the classic disease of beriberi that, in its early stages, can be considered the prototype for a set of disorders that we now recognize as dysautonomia. This book represents the life's work of the senior author, Dr. Derrick Lonsdale, and a recent collaboration with his co-author Dr. Chandler Marrs. Presents clinical experience and animal research that have answered questions about thiamine chemistry Demonstrates that the consumption of empty calories can result in clinical effects that lead to misdiagnosis Addresses the biochemical changes induced by vitamin deficiency, particularly that of thiamine

The Book of Basketball Houghton Mifflin Harcourt

Set in an alternate present that is a slightly, if dangerously, skewed version of our own, Keyhole Factory tracks the interwoven destinies of disparate characters up to and beyond the end of the world-as-we-know-it, brought on by a global super-virus. Beginning with a biting satire of an academic poetry conference, the novel moves on to encompass the stories of a poet-astronaut, a microbiologist contemplating an exit strategy from her high-level job designing biological weapons, a sports-car-driving killer who stages the aesthetic murders of utopian commune-dwellers, and a lone pirate radio disc jockey who may be the last person left alive broadcasting her story to nobody. Allowing form and content to shape each other, William Gillespie pries open the confusion in a moment of total crisis through a narrative web-work technique derived from deranged fiction pioneer Harry Stephen Keeler. Part imaginative free-for-all and part deeply felt examination of isolation and survival, the individual lives in Keyhole Factory shine through the chaos in all their beauty and tragedy. With his signature wit and originality, Gillespie spins a glittering fever-dream that questions our assumptions about the way we interpret events and our relation to the planet, without ever losing sight of the underlying experience of what it feels like to be a human being in the world we live in today.

From Douglas Adams, the legendary author of one of the most beloved science fiction novels of all time, *The Hitchhiker's Guide to the Galaxy*, comes a wildly inventive novel—in trade paperback for the first time—of ghosts, time travel, and one detective's mission to save humanity from extinction. DIRK GENTLY'S HOLISTIC DETECTIVE AGENCY We solve the whole crime We find the whole person Phone today for the whole solution to your problem (Missing cats and messy divorces a specialty) Douglas Adams, the "master of wacky words and even wackier tales" (Entertainment Weekly) once again boggles the mind with a completely unbelievable story of ghosts, time travel, eccentric computer geniuses, Samuel Taylor Coleridge, the end of the world, and—of course—missing cats. *Ghost* DC

An ALA Best Book for Young Adults. "[A] spellbinding twist on the Round Table legend . . . a standout in this enormous canon."—Publishers Weekly (starred review) The newly crowned King Arthur is unsure of himself; worse, the people are unsure of him. Too many people want the throne, and treachery is everywhere. Merlin must do something before the king is betrayed, or murdered, or—worst of all—gets married. So Merlin magically places a sword into a slab of rock, lets it be known that whosoever removes the blade will rule all of England, and invites any man who would dare to try to pull out the sword. After a bit of showmanship, Arthur will draw the blade (with a little magical help, of course), and the people will rally around the young king. Except someone else pulls the sword out first . . . An argument for putting sentiment aside and maximizing the practical impact of our donated dollars: "Powerful, provocative" (Nicholas Kristof, *The New York Times*). Peter Singer's books and ideas have been disturbing our complacency ever since the appearance of *Animal Liberation*. Now he directs our attention to a challenging new movement in which his own ideas have played a crucial role: effective altruism. Effective altruism is built upon the simple but profoundly unsettling idea that living a fully ethical life involves doing the "most good you can do." Such a life requires a rigorously unsentimental view of charitable giving: to be a worthy recipient of our support, an organization must be able to demonstrate that it will do more good with our money or our time than other options open to us. Singer introduces us to an array of remarkable people who are restructuring their lives in accordance with these ideas, and shows how, paradoxically, living altruistically often leads to greater personal fulfillment than living for oneself. Doing the Most Good develops the challenges Singer has made, in the *New York Times* and *Washington Post*, to those who donate to the arts, and to charities focused on helping our fellow citizens, rather than those for whom we can do the most good. Effective altruists are extending our knowledge of the possibilities of living less selfishly, and of allowing reason, rather than emotion, to determine how we live. Doing the Most Good offers new hope for our ability to tackle the world's most pressing problems.

De wereld door de bril van psychiater Dirk De Wachter We leven in borderlinetijden. In de psychiatrie is borderline vandaag met voorsprong de vaakst gestelde diagnose. Bovendien is de lijn tussen patiënten en niet-patiënten flinterdun. Zijn wij collectief op weg naar ziekte en ongenoegen? Psychiatrie is de spiegel van de wereld waarin we leven. Dirk De Wachter schetst borderline dan ook als een maatschappelijk ziektebeeld. Eén conclusie staat als een paal boven water: In onze westerse maatschappij zijn de symptomen van borderline niet ver te zoeken. Meer nog, ze kenmerken onze leefwereld. Wij zijn ons brein in de tijd. Gelukkig zijn er andere, meer hoopgevende signalen met vooruitzicht op herstel. Onze wereld lijkt aan een grens te staan. Mensen verzetten zich uitdrukkelijk tegen de symptomen. Hechting, engagement, solidariteit en gemeenschapszin zijn waarden die broodnodig zijn om weerwerk te bieden tegen de huidige borderlinegesteldheid van dreigende verbroekeling, impulsiviteit en zinloosheid.

The Age of Absurdity Springer Science & Business Media

Desert Lake is a book combining artistic, scientific and Indigenous views of a striking region of north-western Australia. Paruku is the place that white people call Lake Gregory. It is Walmajarri land, and its people live on their Country in the communities of Mulan and Billiluna. This is a story of water. When Sturt Creek flows from the north, it creates a massive inland Lake among the sandy deserts. Not only is Paruku of national significance for waterbirds, but it has also helped uncover the past climatic and human history of Australia. Paruku's cultural and environmental values inspire Indigenous and other artists, they define the place as an enduring home, and have led to its declaration as an Indigenous Protected Area. The Walmajarri people of Paruku understand themselves in relation to Country, a coherent whole linking the environment, the people and the Law that governs their lives. These understandings are encompassed by the Waljirri or Dreaming and expressed through the songs, imagery and narratives of enduring traditions. Desert Lake is embedded in this broader vision of Country and provides a rich visual and cross-cultural portrait of an extraordinary part of Australia.
