With over 80 per cent of global trade by volume and more than 70 per cent of its value being carried on board ships and handled by seaports worldwide, the importance of maritime transport for trade and development cannot be overemphasized. The 2017 Review of Maritime Transport presents and discusses key developments in the world economy and international trade and related impacts on shipping demand and supply, freight and charter markets, as well as seaports and the regulatory and legal framework. In addition to relevant developments in 2016 and the first half of 2017, this year's edition of the Review also features a special chapter on maritime transport connectivity, reflecting the prominence of physical and electronic connectivity as a priority area in the trade and development policy agenda.

Ten Years to Midnight Springer

Energy is a major global industry with rapid ongoing changes in areas such as carbon taxes, emissions trading regimes, and the development of renewable energy. The cross-border nature of the industry calls for the thorough, expert, and up-to-date analysis provided in this timely and practical book. Taking a down-to-earth, problem-solving approach to policy and practice in the field worldwide, the author focuses on the international tax framework, and the tax regimes in leading energy producing and consuming countries. The book introduces and analyses significant international tax issues related to energy production and distribution, extending from the tax regime in the country where the oil, gas, or coal exploration and production activities are located, through to cross-border transportation using pipelines, tankers, and bulk carriers, to the taxation of power stations and electricity transmission and distribution networks. The taxation issues covered include the following: - upstream oil and gas and mining taxes; - incentives for renewable energy; - carbon taxes and emission trading regimes; - dividend, interest, and royalty flows; - foreign tax credits; - permanent establishments; - mergers and acquisitions; - taxation issues for derivatives and hedging; - transfer pricing; - regional purchasing, marketing, service, and intangible property structures; - free trade agreements and customs unions; - dispute resolution; and - tax administration and risk management. Detailed updates are included on the most recent international tax developments affecting the energy industry, including the OECD Action Plan on Base Erosion and Profit Shifting (BEPS) and the 2017 OECD Transfer Pricing Guidelines. Case studies offer an opportunity to apply international tax analysis to specific examples, and gain practice in identifying and discussing relevant international

taxation issues. This book will be of significant value to corporate tax managers and in-house counsel, together with accountants, lawyers, economists, government officials, and academics connected with the energy industry and related international taxation issues.

The Future Leader Routledge

By 2030, the world will be short of approximately 15 million health workers - a fifth of the workforce needed to keep healthcare systems going. Global healthcare leader and award-winning author, Dr Mark Britnell, uses his unique insights from advising governments, executives, and clinicians in more than 70 countries, to present solutions to this impending crisis. Human: Solving the Global Workforce Crisis in Healthcare, calls for a reframing of the global debate about health and national wealth, and invites us to deal with this problem in new and adaptive ways that drive economic and human prosperity. Harnessing technology, it asks us to reimagine new models of care and levels of workforce agility. Drawing on experiences ranging from the world's most advanced hospitals to revolutionary new approaches in India and Africa, Dr Mark Britnell makes it clear what works - and what does not. Short and concise, this book gives a truly global perspective on the fundamental workforce issues facing health systems today.

Innovation Feeding the World Berrett-Koehler Publishers

"Time to get out of Law Land and back into the Jungle" Fuelled by advancing technology, new business models, and altered client expectations, the legal industry faces unprecedented change across its entire value chain. Unfortunately, many legal professionals fear the technology train and the convergence of other fields with law. They see legaltech, AI, and bots like "lions and tigers and bears oh my." We (the editors and authors of this book) see opportunity. Although the future may require us to put on "new suits"—it represents an enormous opportunity for lawyers to reinvent ourselves for our own and our clients' benefit. Filled with chapters written by experts in the intersection of law, innovation, and technology, this book provides a global perspective on the diverse legal service delivery ecosystem that will be our future. It provides chapter upon chapter (reason upon reason) explaining why lawyers can and should increase their appetite for disruption in the legal world. So welcome to the jungle and enjoy the ride as we attempt to systematically map the uncharted waters of the future legal realm and simultaneously inspire you to build a new future in law. *International Taxation of Energy Production and Distribution* Edward Elgar Publishing
 Extending Financial Inclusion in Africa unveils the genesis and transformation of Africa's financial sector and its ability to provide finance for all. Contributors of the Book traverse the whole spectrum of African financial systems, examining their depth and

breadth and empirically evaluating their appropriateness and effectiveness to achieve inclusive financial services. Explores the evolution of the financial sector in Africa from the pre-colonial to post-colonial era Investigates the financial inclusion-economic growth nexus Explores the role of financial regulation and governance in either enhancing or limiting financial inclusion Evaluates unintended consequences of financial inclusion, including over-indebtedness and increased propensity to spend Assesses cross-sectional evidence on the link between financial inclusion and technological developments such as the internet and mobile technology

Geostrategic Shifts and the Sustainability Trilemma John Wiley & Sons

What is 'digital health'? And, what are its implications for medicine and healthcare, and for individual citizens and society? 'Digital health' is of growing interest to policymakers, clinicians, and businesses. It is underpinned by promise and optimism, with predictions that digital technologies and related innovations will soon 'transform' medicine and healthcare, and enable individuals to better manage their own health and risk and to receive a more 'personalised' treatment and care. Offering a sociological perspective, this book critically examines the dimensions and implications of 'digital health', a term that is often ill defined, but signifies the promise of technology to 'empower' individuals and improve their lives as well as generating efficiencies and wealth. The chapters explore relevant sociological concepts and theories; changing conceptions of the self-evident in citizens' growing use of wearables, online behaviours and patient activism; changes in medical practices, especially precision (or 'personalised') medicine and growing reliance on 'big data' and algorithm-driven decisions; the character of the digital healthcare economy; and the perils of 'digital health'. It is argued that, for various reasons, including the way digital technologies are designed and operate and the influence of big technology companies and other interests seeking to monetise citizens' data, 'digital health' is unlikely to deliver much of what is promised. Citizens' use of digital technologies is likened to a Faustian bargain: citizens are likely to surrender something of far greater value (their personal data) than what they obtain from their use. However, growing data activism and calls for 'algorithmic accountability' highlight the potential for citizens to create alternative futures—ones oriented to fulfilling human needs rather than techno-utopian visions. This

ground-breaking book will provide an invaluable resource for those seeking to understand the socio-cultural and politico-economic implications of digital health.

Raise the skill and competency level of project finance organizations Project Finance for Business Development helps readers understand how to develop a competitive advantage through project finance. Most importantly, it shows how different elements of project finance, such as opportunity screening and evaluation, project development, risk management, and due diligence come together to structure viable and financeable projects—which are crucial pieces missing from the current literature. Eliminating misconceptions about what is really important for successful project financings, this book shows you how to develop, structure, and implement projects successfully by creating competitive advantage. By shedding light on project finance failures, it also helps you avoid failures of your own. • Offers a roadmap for successful financing, participant roles and responsibilities, and assessing and testing project viability • Considers project finance from a broad business development and competitive advantage • Provides a strategic decision-forecasting perspective • Delves deeper than existing treatments of project finance into decisions needed to create and implement effective financing plans Helping readers develop, structure, and implement projects successfully by creating competitive advantage, this book is a useful tool for project sponsors and developers, helping them structure and implement projects by creating competitive advantage.

Combining Companies Across Borders, Second Edition Academic Press

This proactive guide brings the relationship between work life and mental well-being into sharp focus, surveying common challenges and outlining real-life solutions. The authors' approach posits managers as the chief mental health officers of their teams, offering both a science-based framework for taking stock of their own impact on the workplace and strategies for improvement. Areas for promoting mental wellness include reducing stress and stigma, building a safe climate for talking about mental health issues, recognizing at-risk employees, and embracing diversity and neurodiversity. Emphasizing key questions to which managers should be attuned, the book speaks to its readers—whether in corporate, nonprofit, start-up, or non-business organizations—as a friendly and trusted mentor. Featured in the coverage: • Mind the mind: how am I doing, and how can I do better? • Dare to care: how are my people doing, and how might I help? • Building blocks for mental health: how do I manage my team? • Stress about stressors: what is constantly changing in the environment? • Changing my organization and beyond: how can I have a greater impact? Compassionate Management of Mental Health in the Modern Workplace holds timely relevance for managers, human resources staff, chief medical officers, development heads in professional service firms, union or employee organization leaders, legal and financial professionals, and others in leadership and coaching positions. "Workplace mental health: Wow! A subject that frightens most managers. If they read this book, they will strengthen their own skills and transform their workplace and our society." Donna E. Shalala, Trustee Professor of Political Science and Health Policy, University of Miami; former U.S. Secretary of Health and Human Services "Mental health is an underappreciated, and oft-misunderstood challenge that is growing in the modern workplace. This book provides leaders with practical advice to address mental health challenges in their organization and improve productivity and wellbeing. This is a topic that can no longer be ignored by leaders in any field, and a book that will fundamentally change the way we think about and help improve mental health in the workplace." Dominic Barton, Managing Director, McKinsey & Company

The Meritocracy Trap Springer

We have long been told that corporations rule the world, their interests seemingly taking precedence over states and their citizens. Yet, while states, civil society, and international organizations are well drawn in terms of their institutions, ideologies, and functions, the world's global corporations are often more simply sketched as mechanisms of profit maximization. In this book, John Mikler re-casts global corporations as political actors with complex identities and strategies. Debunking the idea of global corporations as exclusively profit-driven entities, he shows how they seek not only to drive or modify the agendas of states but to govern in their own right. He also explains why we need to re-territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail. We

know the global corporations' names, we know where they are headquartered, and we know where they invest and operate. Economic processes are increasingly produced by the control they possess, the relationships they have, the leverage they employ, the strategic decisions they make, and the discourses they create to enhance acceptance of their interests. This book represents a call to study how they do so, rather than making assumptions based on theoretical abstractions.

How Great Leaders Transform Their Organizations and Shape the Future United Nations

This book examines current topics and trends in strategic auditing, accounting and finance in digital transformation both from a theoretical and practical perspective. It covers areas such as internal control, corporate governance, enterprise risk management, sustainability and competition. The contributors of this volume emphasize how strategic approaches in this area help companies in achieving targets. The contributions illustrate how by providing good governance, reliable financial reporting, and accountability, businesses can win a competitive advantage. It further discusses how new technological developments like artificial intelligence (AI), cybersystems, network technologies, financial mobility and smart applications, will shape the future of accounting and auditing for firms.

World Intellectual Property Report 2017 Springer Nature

This book examines the nexus of cities and oceans and the interrelations between the Sustainable Development Goals (SDGs) 11 and 14, just after the first two critical years following the milestone year of hope in 2015. It advocates for actions both for sustainable cities, the largest interconnected and only human ecosystem, and for the global ocean that is the largest physical ecosystem. Cutting-edge concepts and actions are presented by and for cities and oceans, following the global engagements during the years 2015-2017. In the era of global geopolitics, cities offer major democratic spaces between the micro-regulations of the local communities and the governance of the global commons. The role of education, trust, and citizen empowerment cannot be stressed enough. This book offers an evidence-based, holistic and integrated view of key urban and ocean sustainability issues at the horizon of 2030 and of 2050. The chapters cover the most prominent issues at the heart of the matter, and highlight systemic multi-stakeholder eco-responses towards sustainability with economic, social, environmental dimensions, including political and cultural aspects. This book offers a full exploration of cities and seas with an emphasis on vigorous paradigm shifts, redesigning human systems, and reconciling them with nature. Building on robust evidence, and transformational cases, it provides structured advice for world leaders, stakeholders and scholars.

Business Sustainability, Corporate Governance, and Organizational Ethics Bloomsbury Publishing

In 2018 the Indonesian economy recorded a growth rate of 5.2%, the highest in five years. This was in spite of a slump in the rupiah and a trade imbalance, and took place against a backdrop of rising US interest rates and deteriorating trade relations between the world's two biggest economies. The country's emphasis on industrialisation and infrastructure development is laying the foundations for continued economic growth. Moreover, the archipelago's growing middle class population, geographical position and human capital development agenda, alongside progress in free-trade agreements, make it a strong contender on the global economic stage. The country holds considerable potential for developing entrepreneurial and creative prowess, already being home to four unicorn startups. Investors have continued to look beyond traditional destinations, with emerging cities like Surabaya and Palembang showing strong possibilities for economic growth. Although the outcome of the April 2019 national election will determine the course of further infrastructure development and tax reforms, the future looks promising, with predictions of continued growth accompanied by stable inflation.

A Sociological Inquiry WIPO

The main objective of this book is to provide an innovative set of concepts and tools regarding company management, internal and external stakeholders and social responsibilities, reflecting the necessities and opportunities generated by the digital transformation, the transition to a knowledge-based economy, and the COVID-19 crisis. The book, based on a holistic vision and contextual approach of business, contributes to the development of company management and stakeholder and social responsibility theories and practices, being structured in 12 chapters. The original company management vision, approaches, and tools are based on three pillars: a new "manager-relevant stakeholder" rather than "manager-subordinate" managerial paradigm; a new type of company social responsibility rather than corporate social responsibility; and a new concept of company-relevant stakeholder rather than that of salient stakeholders. The book contains two innovative managerial mechanisms: the managerial synapse and company-relevant stakeholders-based management system able to help companies and stakeholders face successfully the challenges of digital transformation and the COVID-19 crisis and to generate greater organization functionality and performance. The book will be of interest to company

managers and management specialists, management academics, consultants and researchers, and MBA students interested in a style of management with social responsibility at the forefront.

A Comprehensive Study WIPO

The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year's report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year's theme from academic, business, and particular country perspectives from leading experts and decision makers.

Proceedings of the 28th International Symposium on Mine Planning and Equipment Selection - MPES 2019 United Nations

In 2015, the United Nations launched the Sustainable Development Goals (SDGs) to define and coordinate global priorities and aspirations up to 2030 in response to the economic, social and environmental challenges faced by the planet. Many governments across the world signed up to these goals. United Nations Secretary-General Ban Ki-Moon noted at the outset that business would be a vital partner in achieving the SDGs. This easy-to-digest book provides a critical evaluation of how a range of multinational companies from across different commercial sectors are currently addressing the SDGs and the challenges they are facing in contributing to them. The private sector has thus been set the challenge of responding positively in support of the SDGs whilst at the same time acting in the shorter-term interests of its stakeholders. Using a wealth of illustrative materials drawn from company reports and other sources, this book looks at the response of 80 companies and organisations from eight different industry sectors. It examines the different approaches taken, discusses how far the SDGs are actively supported and reviews how progress is being assessed against related targets and objectives. In addition to an analysis of each industry sector, the book provides a summary overview of all industry sectors studied, identifying the most and least supported SDGs overall. This book will be of interest to the fast-growing body of academics studying and researching sustainability, as well as to industry managers and public-sector operators involved in sustainability management and reporting. It provides detailed commentary and insights, and identifies both key themes from the research and critical issues for the successful implementation of the SDGs in the period up to 2030.

Annual Update for Controllers Business Expert Press

What Globalization Now Means for Your Business Executives can no longer base their strategies on the assumption that globalization will continue to advance steadily. But how should they respond to the growing pressures against globalization? And what can businesses do to control their destinies in these times of uncertainty? In *The New Global Road Map*, Pankaj Ghemawat separates fact from fiction by giving readers a better understanding of the key trends affecting global business. He also explains how globalization levels around the world are changing, and where they are likely to go in the future. Using the most up-to-date data and analysis, Ghemawat dispels today's most dangerous myths and provides a clear view of the most critical issues facing policy makers in the years ahead. Building on this analysis, with examples from a diverse set of companies across industries and geographies, Ghemawat provides actionable frameworks and tools to help executives revise their strategies, restructure their global footprints, realign their organizations, and rethink how they work with local governments and institutions. In our era of rising nationalism and increased skepticism about globalization's benefits, *The New Global Road Map* delivers the definitive guide on how to compete profitably across borders.

Rob Carpenter took a school from Special Measures to Outstanding in less than two years and firmly believes that the quality of teaching and leadership holds the key to raising standards in our schools today. A Manifesto for Excellence in Schools will help all teachers and leaders to transform learning journeys, both individual and whole-school, so that your school is inclusive and supportive, creating the best education for all. This book suggests new ways to ensure that all children succeed, and advocates that learning journeys are connected to a moral purpose, positive learning habits and that they help young people make sense of the world around them. Framed around the context of ever increasing expectations for pupils and the growing focus on learning mastery, A Manifesto for Excellence in Schools contains a balance of both practical advice and multiple examples, resources and ideas for teachers and leaders to plan and deliver high quality learning experiences. At its heart, this book is all about helping teachers and leaders to become architects for learning by helping them to design classrooms, curricula and whole-school practices that are inclusive, engaging

and above all - excellent.
