You have been able to get SBBI? data from Wiley since 1991. This Stocks, Bonds, Bills, and Inflation® (SBBi®): 2020 Summary Edition enables investors to understand how to calculate, interpret, and use the US historical stock and bond data that the CFA Institute Research Foundation has made available to CFA Institute members. The data include the capital appreciation, income, and total returns of the major asset classes of the US

economy: large-cap stocks, small-cap stocks, corporate bonds, government bonds of various maturities, and inflation. Most of the data start in 1926, and are presented in monthly, annual, decade, or longer period form. The raw data itself are mostly monthly but are not included in this summary volume. Rather, this summary volume includes illustrative data, methodology, formulae, and analysis that will help investors and analysts learn how to use market

time series raw data, which is separately available.
