Elsevier Health Sciences

The past decade has seen several revisions to the MRCPsych examinations but the latest changes have been the most radical. It is now a three part written examination along with a clinical assessment of skills and competencies. This has changed the focus of the 'new' MRCPsych Paper I, which now includes two thirds 'one-best-item-from-five' multiple choice questions (MCQs). This collection of 'one-best-item-from-five' style multiple choice questions mirrors the new format for the exam. Its companion volume *Extended Matching Items for the MRCPsych Examinations Part 1* by Michael Reilly and Bangaru Raju remains relevant for the new format where EMIs make up one third of the questions. Together, these two guides thoroughly prepare you for the revised format, incorporating the new areas of study such as basic ethics, philosophy and history of psychiatry, and stigma and culture. With varying degrees of question difficulty, a wide-range of styles and topics, and full explanations of answers overleaf, MRCPsych Paper I One-Best-Item MCQs is ideal for examination preparation and self-study.

Management Information Systems Elsevier Health Sciences

This new revision guide with over 1500 questions, reasoned answers and links to explanatory text gives a comprehensive range of multiple choice questions

(MCQs) and extended matching items (EMIs). Complete with sample papers, this book provides everything you need for the written parts of the MRCPsych and comparable higher postgraduate examinations in psychiatry. Contains over 550 MCQs and 350 EMIs divided into syllabus topics Includes full-length sample exam papers for Parts 1, 2 and 3 of the MRCPsych Challenging questions written to bring out key learning points Full, detailed answers and links to revision and remediation Prepared by experienced teachers and writers of examination questions This book is essential for all psychiatrists preparing for the written MRCPsych and similar examinations, allowing candidates to approach the exam with confidence. *MRCP SCE in Respiratory Medicine: 300 SBAs* World Health Organization MRCPsych CASC: 150 Clinical Scenarios offers a complete and practical skills guide for trainees preparing for the MRCPsych CASC exam. Presented in a clear layout, chapters cover the full range of psychiatry subspecialties that are likely to be encountered on exam day. MRCP SCE in Respiratory Medicine: 300

SBA is a unique resource that offers a wealth of practice questions for candidates preparing for the Specialty Certificate Exam in Respiratory Medicine. Chapters in the book correspond to the topics in the syllabus, while the number of questions in each chapter is weighted in accordance with the college's exam blueprint. Featuring questions written in line with relevant British and international guidelines this book is an indispensable revision aid designed to maximise the chances of exam success. *Get Through MRCPsych Paper A2* Oxford University Press

The third edition of *Postgraduate Orthopaedics* has been fully updated, revised and expanded to meet the challenges of a continually changing exam format, providing detailed core orthopaedic knowledge and insight into tactics and pre-exam planning to increase a candidate's chance of success. Written by a core of authors chosen specifically for their knowledge of the key factors for exam success, this edition includes more illustrations and diagrams and additional exam-focused material for the trickier areas of the syllabus. The trauma chapter has been separated into four distinct sections to improve the overall trauma content. The book also includes a dedicated chapter on what books to read, reflecting the fact that this area has become more complicated in recent years, and an applied basic science chapter, which focuses on basic science viva questions in detail. This guide continues to evolve and has established itself as the definitive text for the FRCS (Tr & Orth) exam.

MRCP Part 1 MCQ Revision Book CRC Press

Revision Notes in Psychiatry, Third Edition continues to provide a clear and

contemporary summary of clinical psychiatry and the scientific fundamentals of the discipline. It is an essential study aid for all those preparing for postgraduate examinations in psychiatry and a superb reference for practising psychiatrists. Structured to follow the entire MRCPsych exam syllabus, the book covers the following key areas, along with the CACS examination: Paper 1: General and adult psychiatric disorder History and mental state examination Cognitive assessment Neurology and psychology for psychiatrists Psychopathology History of psychiatry and psychiatric ethics Paper 2: Psychopharmacology Neurobiology for psychiatrists Psychiatric genetics Epidemiology Advanced psychological processes and treatments Paper 3: Critical appraisal Learning disability Child and adolescent psychiatry Old age psychiatry Forensic psychiatry Consultation liaison psychiatry Neuropsychiatry Psychosexual medicine Fully updated with recent references and many additional figures, this third edition features a wealth of new material (including NICE guidelines) and updates the DSM-IV-TR criteria to the new DSM-5. Designed to meet the needs of today's candidates, *Revision Notes in Psychiatry, Third Edition* continues to provide a source of trusted expert information to ensure examination success for all those taking higher examinations in psychiatry.

MRCPsych Paper B: 600 MCQs and EMIs Cambridge University Press

The newly introduced Specialty Certificate Examinations are a compulsory component of assessment for all UK medical trainees and represent the final examination barrier before getting the certificate of completion of training. This book provides a unique

exam-specific revision guide for the Respiratory specialty certificate exam. Comprising of best of five test multiple choice questions and revision notes to facilitate targeted study, *Revision Notes for the Respiratory Medicine Specialty Certificate Examination* is the only book you need to prepare for this important examination. Questions are based around clinical scenarios and supplemented with images of radiological investigations such as x-rays, and lung function tests. Each question is structured as in the exam itself. The second half of the book comprises of a series of tutorials covering key areas and difficult concepts assessed in the examination including respiratory infection, respiratory malignancy, industrial lung disease, sleep disorders, standard respiratory tests and medical statistics. The combined approach allows trainees to become acquainted with the "best of five" format and facilitate recognition of areas of weakness and targeted study.

DBMS MCQ PDF: Questions and Answers Download | Database Management System MCQs Book CRC Press

This is the second edition of the WHO handbook on the safe, sustainable and affordable management of health-care waste--commonly known as "the Blue Book". The original Blue Book was a comprehensive publication used widely in health-care centers and government agencies to assist in the adoption of national guidance. It also provided support to committed medical directors and managers to make improvements and presented practical information on

waste-management techniques for medical staff and waste workers. It has been more than ten years since the first edition of the Blue Book. During the intervening period, the requirements on generators of health-care wastes have evolved and new methods have become available. Consequently, WHO recognized that it was an appropriate time to update the original text. The purpose of the second edition is to expand and update the practical information in the original Blue Book. The new Blue Book is designed to continue to be a source of impartial health-care information and guidance on safe waste-management practices. The editors' intention has been to keep the best of the original publication and supplement it with the latest relevant information. The audience for the Blue Book has expanded. Initially, the publication was intended for those directly involved in the creation and handling of health-care wastes: medical staff, health-care facility directors, ancillary health workers, infection-control officers and waste workers. This is no longer the situation. A wider range of people and organizations now have an active interest in the safe management of health-care wastes: regulators, policy-makers, development organizations, voluntary groups, environmental bodies, environmental health practitioners, advisers, researchers and students. They should also find the new Blue Book of benefit to their activities. Chapters 2 and 3 explain the various types of waste produced from health-care facilities, their typical characteristics and the hazards these wastes pose to patients, staff and the general environment. Chapters 4 and 5 introduce the guiding regulatory principles for developing local or national approaches to tackling

health-care waste management and transposing these into practical plans for regions and individual health-care facilities. Specific methods and technologies are described for waste minimization, segregation and treatment of health-care wastes in Chapters 6, 7 and 8. These chapters introduce the basic features of each technology and the operational and environmental characteristics required to be achieved, followed by information on the potential advantages and disadvantages of each system. To reflect concerns about the difficulties of handling health-care wastewaters, Chapter 9 is an expanded chapter with new guidance on the various sources of wastewater and wastewater treatment options for places not connected to central sewerage systems. Further chapters address issues on economics (Chapter 10), occupational safety (Chapter 11), hygiene and infection control (Chapter 12), and staff training and public awareness (Chapter 13). A wider range of information has been incorporated into this edition of the Blue Book, with the addition of two new chapters on health-care waste management in emergencies (Chapter 14) and an overview of the emerging issues of pandemics, drug-resistant pathogens, climate change and technology advances in medical techniques that will have to be accommodated by health-care waste systems in the future (Chapter 15).

The structure of the MRCPsych examination has changed significantly. This book is specifically written for the new exam, providing 250 practice best-of-five multiple choice questions (MCQs) and 100 extended matching item (EMI) questions for Paper III. It contains clear, concise answers to questions, along with explanatory notes and further reading for each topic. It gives practical advice on the format and content of the examination and techniques for answering questions. It is comprehensive and authoritative: both authors are members of the Psychiatric Trainees' Committee of the Royal College of Psychiatrists. This is an essential revision aid for candidates sitting Paper III of the MRCPsych examination.
