MCKENZIE GREGORY

Legends And Reality Of The AK Penguin

While the 20th century brought many technological advancements to the battlefield, a key weapon of warfare remains the soldier and his rifle. This volume chronicles the historical development of the modern service rifle after World War II and examines its resurgence in Afghanistan after generations of absence following the introduction of the assault rifle. Individual chapters survey the most combat-tested models—including the FN FAL, U.S. M14 and HK 417—in technical detail, emphasizing key points in the evolution of rifle technology and ammunition. Also explored is the development of the current M16 series rifle, and how recent difficulties in Afghanistan have led to an increasing reliance on the venerable M14. Providing a strong knowledge base of the various weapons now in service throughout the world, this instructive work demonstrates that the battle rifle has not outlived its usefulness.

Objects don't just have stories, they tell stories. There is a certain paradox that surrounds them. They seem precise and fixed, literally tangible, yet they can put us in touch with the past in a direct and immediate way. What they said to their contemporaries may be different from what they say to us. Whether it's a silver tea urn from Georgian Dublin or an illuminated page from the Book of Kells, historical objects help us gain a more complex understanding of our past. When so much about the past - especially the Irish past - is contested, physical things can provide secure anchors in history. They ought to make things simpler, and yet, when an object is actually examined, this apparent simplicity quickly falls away. Such interesting objects tend to provoke more questions than they can answer. Over the

past two years, Fintan O'Toole, the literary editor of the Irish Times, has selected 100 objects - the majority of which can be found in the National Museum of Ireland - to narrate a history of Ireland. These objects have been chosen simply for their ability to illuminate moments of change, development, or crisis. Articles on these historical objects appeared weekly in the Irish Times and are now being collected in book form by the Royal Irish Academy. The book will act as a reminder that people have inhabited Ireland for quite some time and have survived innumerable ordeals and challenges. *** "The objects....span the centuries from 5000 B.C. to 2005....a wooden fish trap from the Mesolithic era, found preserved in a bog in Co. Meath....St. Patrick's Confessio (460-90), the oldest surviving example of prose writing in Ireland....an emigrant's suitcase from the 1950s tells the story of Ireland's diasporic expansion. The final object was selected by readers from a shortlist of ten. A decommissioned AK47 assault rifle, it speaks to Ireland's recent history of strife and commitment to peace; its links with the larger world, and its own unique story." - Sheila Langan, Irish America Magazine, June-July 2013. *** "Thoughtfully written and thoroughly accessible to readers of all backgrounds, A History of Ireland in 100 Objects is both a fascinating browse and a repository of historical highlights made tangible, highly recommended." - The Midwest Book Review, Wisconsin Bookwatch, The World History Shelf, May 2013~

A long-time specialist on Southern African affairs explores the history of conflict and cooperation--showing how a landlocked small state reduced its dependency upon its neighbors in Southern Africa. Drawing upon first-hand information and primary sources, this analysis of low-high politics from colonial days and independence to the present, defines how political leaders and the citizenry made Botswana one of the few stable democracies in Africa--one that has improved its economy and international standing over the last quarter century. Students, scholars, and policymakers concerned with world politics, international political economy, and African studies will find this study important for understanding the foreign policy options and policies of small and weak states today in Africa and in the international arena.

There are many excellent books about the AK. What makes Legends and Reality of the AK-47 different from all the other AK books? It is co-written by a very close associate of designer Mikhail Kalashnikov at the Izhmash Arms Factory and one of America's most respected military small-arms experts. Because

of Valery Shilin's close ties to both the designer and the factory, the authors were able to gain access to information, photos and weapons never before seen in public, including the AKB and AKB-1 assault rifles, the mysterious A-62 and the very latest prototypes of the AK's replacement, the AN-94. They fill in the gaps in the knowledge about the history and development of not only the Kalashnikov family of weapons but of other Russian small arms as well. Most important, as a friend and colleague, Shilin adds a personal perspective on the man behind the design of some of the most legendary weapons of the 20th century.

Provides the political and historical detail necessary to understand the motivations and probable outcomes of conflicts in the country. The volume explores related human security issues, including the willingness of several Filipino armed groups to negotiate political settlements to the conflicts, and to contemplate the demobilization and reintegration of combatants into civilian life. Light is also shed on the use of small arms - the weapons of choice for armed groups - whose availability is maintained through leakage from government arsenals, porous borders, a thriving domestic craft industry, and a lax regulatory regime.

In the sixty years since General Kalashnikov created the AK's distinctive silhouette, the gun has been at the centre of conflicts across the Middle East, Africa and Latin America. The weapon that made him a 'Hero of the Soviet Union' has also appeared on t-shirts and vodka bottles, featured in videos and song lyrics and been re-fashioned in crystal - a gift from Putin to George W. Bush. Power, politics and passion combine in the story of a weapon that has shaped the modern world. Using testimonies of people who have experienced the gun at first-hand - including a Sudanese child soldier, a Vietcong veteran and a Yorkshire teenager - Michael Hodges provides a compelling account of how the AK47 became an icon that ranks alongside Coca-Cola as one of the most recognisable brands in the world.

The Illustrated Directory of 20th Century Guns Osprey Publishing
 Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed.

Illicit Flows and Criminal Things offers a new perspective on illegal transnational linkages, international relations, and the transnational. The contributors argue for a nuanced approach that recognizes the difference between "organized" crime and the thousands of illicit acts that take place across national borders every day. They distinguish between the illegal (prohibited by law) and the illicit (socially perceived as unacceptable), which are historically changeable and contested. Detailed case studies of arms smuggling, illegal transnational migration, the global diamond trade, borderland practices, and the transnational consumption of drugs take us to Asia, Africa, Latin America, Europe, and North America. They allow us to understand how states, borders, and the language of law enforcement produce criminality, and how people and goods which are labeled "illegal" move across regulatory spaces.
