Like a Professional! *Beginner's Guide to Penny Stock Trading, Investing, and Making Money With Penny Stock Market Mastery (Ultimate Guide With Strategies & Techniques for Beginners)* Createspace Independent Publishing Platform Investing Is Easy- If You Know These Key Things Want to get into investing? Or maybe you've lost money investing pursuits in the past that now make you nervous and scared to try again? Don't worry, it's not your fault. Here's the problem. Investing advice is purposefully made too complicated, and "gurus" often hold strategies back so that you have to buy their "advanced" training. This leaves you frustrated and untrusting on any new opportunities that come your way in regards to investing. What makes this problem even worse, is that many gurus charge a premium for outdated information. All this can make trying to gain the lifestyle you want with investing a nightmare! Luckily for you, there's now a solution. So if you're a motivated beginner investor, that wants to learn solid investing fundamentals without getting scammed, and without having to go

to Havard to learn complicated terminology, then "Online Trading Mastery: Forex - Day - Options and Swing Trading" is for you! There are so many benefits to Forex Trading, and it can be made simple and easy for you. We won't name all the benefits, but here are a few. First, Forex is the largest financial market. Which means it likely won't ever go anywhere. In addition, four to five trillion dollars get traded each and every day. All you need is a small percentage to get some huge returns. Second, there is a low barrier to entry. You can get up and running with just \$500, whereas with other investment opportunities can require thousands of dollars to start. Third, the market is open 24 hours a day. This means you can trade whenever you want! Some markets are only open during business hours which makes it impossible for you to invest if you work a day job! Fourth, low trading costs. Trading costs can either be completely free, or extremely cheap. This is major because many other markets require \$5-\$10 trading fees. This way you can save your money to invest more! And

finally, thousands of people have made a fulltime income with Forex trading. That means there are proven methods and strategies for this. Strategies and secrets I want to share with you. In this book, you will discover: The 2020 A-Z guide on Forex trading so that you don't have to worry about what to do- No questions asked, even if you've never invested before Why having this one mindset will change your investing career forever A hidden strategy that the gurus don't want you to know How to turn Forex Trading into passive income so you can live the life you want Buyer psychology secrets that give you an unfair advantage when changes in the market happen I know what you might think, "Can't I just open a basic account and watch Youtube videos to learn"? With this book, you will only have up to date, and proven strategies that can help you achieve the goals you want. So if you're an investor who wants to

As a brand new self-directed investor and trader with zero knowledge of the business you are at a loss as to what information you actually do and do not need. You are a danger to yourself and to your account at this juncture, your mind and brain are telling you that you can make unlimited amounts of money from trading and investing in the financial markets. The good news is you can, the even better news is that you can do it from anywhere in the world you choose to be at any given moment as long as your head is in the game the right way. *Beginner Trading Psychology 101* affords readers who are brand new to trading and investing the opportunity to really learn and expand their knowledge base as

new traders from someone who came up on his own and trades and invests and trades with real money on a daily basis. The market is not a big secret and all of the information you need to make a trading decision is right out in the open on your trading chart. Much of what the current trading education industry is putting out is not only giving you information that is all backwards, is very unrealistic to do in the live markets, and can get you into a lot of trouble. There are very few books that deal with just how important the psychology of trading really is and brand new self-directed investors and traders have no idea what they up against and real money traders know what psychological mistakes you are going to make before you make them, beginner traders are who professionals get paid from in the live market. *Beginner Trading Psychology 101* should be a must read for beginner and inexperienced traders looking to build their foundations and strategies. It is my hope that one day it could be taught as a course at all of the top business schools and should be required reading for

anyone who has zero knowledge of trading and investing who wants to get into it and do it as a business. If you are a brand new self-directed investor and trader with zero knowledge of the business you should not skip one word of *Beginner Trading Psychology 101*.

Getting started with day trading is a pretty big decision. You can achieve the ideal of bringing in profits with only a few

hours a day trading, but that won't be reality for many people that are just beginners and it will be necessary to just stay above the water during the first year and to actually get a feel for what it's like with all the fluctuations. Your only goal during the beginning and the learning stages is to just stay in the game and not to sink. If you still want to undertake this activity, and if you are still interested after this introduction, then day trading just might be for you. You can't play by the ear when doing day trading and you need to have a plan and a certain strategy in order to have an advantage. Don't take any trade too lightly and always have an open mind. You should try to locate a live chart for a certain asset you have a decent knowledge base for and you should watch how the value of that asset changes over time. You should have a consistent strategy so that you can monitor your results and see what works and what doesn't over time. You can ask someone to provide you with a strategy or you can figure it out yourself by observing an asset and the changes in its value. In order to get started day

trading, you should know how much capital you really need. You can look at capital like you would look at employees and how good of a manager of your capital you are will determine the money you will be making. Whichever amount of capital you decide to start trading with, you want to give yourself a safety net and deposit a little more money than that initial amount, around 20% more. It is good to have this as a measure since there are rules and restrictions and, for example, in the example of trading stocks, you will not be able to get into and get out of the trade during the same day if events start to unfold contrary to what you expected as a part of your strategy. When you look at forex, for example, the minimum amount of capital for entering doesn't really exist, but you still want to have a decent amount of capital since very little capital means that you don't have a lot of opportunities and a lot of possible plays. This book covers the following topics: - Tools and platforms - How day trading works - How to find stock for trades? - Introduction to candlesticks - Risk and

account management - Day trading strategies - Step by step to a successful trade - Secrets for success - Common mistake with day trading - Rules for successful day trading ...And much more Day trading is not something with which you can make money overnight so you will have to commit to mastery and that is done through settling on a strategy and then consistently practicing that strategy until you can prove that your strategy can net you a profit.

This is a useful guidebook for those looking to engage in day or short-term trading in the stock market. The topics covered include technical analysis of stocks, market fundamentals, skills and

strategies of professional traders, and how to select an online broker. The author discusses how to trade in 4 different time frames (day trade, short-term, swing, scalp) and how to avoid the pitfalls inherent in each. The book includes numerous (very helpful) images and explanations of Nasdaq Level II quote screens. The author has a rare ability to make the topic of technical analysis of stocks understandable to beginning day traders.

Forget about all the hype you've heard about day trading. Seriously. Get that stuff out of your mind. Most of the authors trying to pump you up about day trading have a vested interest in steering you in the wrong direction and getting your hopes up. They get to sell a book or a series of books. You, on the other hand, may be at risk of losing thousands, if not tens of thousands, of dollars! If you are a complete newbie to day trading and want the inside dope or straight talk about this form of securities trading, you are looking at the right book. Instead of

spending an inordinate amount of time and book space on how much you can earn from day trading as well as the financial freedom you can enjoy, this book focuses most of its firepower on what you need to know so you can succeed with day trading. Completely free of hype and focused solely on complete day trading newbies, this book peels back the hype and gives you the kind of basic step by step information you've been looking for to make an informed decision about day trading. Make no mistake about it, this type of speculative stock trading is NOT for everyone. By laying out the process you need to go through in a practical and no nonsense way, you get a clear idea of just exactly what you'll be getting into when you do day trading. Far from discouraging or pessimistic, this book presents a balanced and realistic view of what its like to prepare to day trade, as well as the realities you'll face when you day trade. You get crucial tips on the mindsets you need to adopt, the tools you need to get, key tactics effective and successful day traders use, as well as instructions on how to

develop your very own successful personal day trading strategy. Succeeding with stock trading is not quick nor easy. This is especially true with day trading. By being clear on the risks, rewards, strategies, techniques, and tools of day trading, you can position yourself for a greater chance of success. This book is not intended to be some sort of magical 'one size fits all' resource for people curious about day trading. Instead, you get all the key information you need to make an initial decision on whether you should look into day trading further. Accordingly, this book acts as a value-packaged information gateway to a very exciting way to make money off the global financial market. Again, day trading is not for everyone but this book, based on hard won personal experience, gives you the information you need to see if day trading is good personal option for you on your journey to financial freedom and security. As a brand new self-directed investor and trader with zero knowledge of the business you are a danger to yourself and your account. You will need to develop mental toughness if you wish to compete in the live markets against the best traders in the world. The good news is you can do it; the even better news is that you can do it fairly quickly if you follow the suggestions in this book. There is really no easy way to do it honestly, there is a certain progression of steps all new traders must go

through to be able to drive their own money train. Some of the first steps are to study and learn money management, gain a hold on your own trading psychology, and compose a rules based trading amongst others. There are no short cuts and what I just said to study and learn can take quite a while. It all depends on you and how much time and effort you are willing to put in to learn what needs to be known to be a successful market participant. You are in control of your investing and trading business and once you have your psychology and emotions under control you will

achieve consistency and be able to make as much money in the live markets as you desire. There is also a lot of fear involved in trading and as a professional investor and trader you must be able to pull the trigger on a position and do it without hesitation or fear. When traders make a mistake in their analysis, which causes them to take a loss, they can develop a fear of being wrong all the time.
