 This groundbreaking study investigates defining themes in the field of social memory studies as they bear on the politics of post-Cold-War, post-apartheid Southern Africa. Examining the government's attempts to revise postcolonial Mozambique's traumatic past with a view to negotiating the present, Alice Dinerman stresses the path-dependence of memory practices while tracing their divergent trajectories, shifting meanings and varied combinations within ruling discourse and performance. Central themes include: * the interplay between past and present* the dialectic bet.

This comprehensive atlas, featuring a wealth of top quality photographs of fresh cadaveric dissections, is a superb guide to anatomic structures in the oral and maxillofacial region that will be an ideal aid in clinical practice. It has the important benefit of enabling readers to observe the anatomy from the same view as seen during invasive clinical procedures. This is critical for a better understanding of these procedures, and surgical annotations are included as necessary. *Atlas of Oral and Maxillofacial Anatomy* is the first book of its kind to be devoted to the clinical anatomy of the region for dentists and oral and maxillofacial surgeons. It will satisfy the demand for such a comprehensive atlas in this field of surgery and will be welcome and timely for clinicians and trainees. Beyond specialists and residents in oral and maxillofacial surgery and general dentists, the book will be of value for craniofacial surgeons, anatomists, plastic surgeons, ENT surgeons, head and neck surgeons, neurosurgeons, dental students, medical students, dental

hygienists, and nurses working with dentists and oral and maxillofacial surgeons.

This textbook provides a global, chronological mapping of significant areas of theatre, sketched from its deepest history in the evolution of our brain's 'inner theatre' to ancient, medieval, modern, and postmodern developments. It considers prehistoric cave art and built temples, African trance dances, ancient Egyptian and Middle-Eastern ritual dramas, Greek and Roman theatres, Asian dance-dramas and puppetry, medieval European performances, global indigenous rituals, early modern to postmodern Euro-American developments, worldwide postcolonial theatres, and the hyper-theatricality of today's mass and social media. Timelines and numbered paragraphs form an overall outline with distilled details of what students can learn, encouraging further explorations online and in the library. Questions suggest how students might reflect on present parallels, making their own maps of global theatre histories, regarding geo-political theatrics in the media, our performances in everyday life, and the theatres inside our brains.

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.
