Communication networks evolved due to the need to exchange and share information to a group of machines. During the last century many kinds of communication networks have been

developed. RM-E - Practical Radio Telemetry Systems for Industry This chapter discusses some practical system examples of telemetry systems. A dockside communications system for Liquefied Natural Gas (LNG) tankers is presented. The 2 Mb link is available for traffic and several telephone lines on the tanker are available for the ship's business and for the crew to call friends and relatives. Practical Radio Engineering and
