### Study Guide and Review Manual of Human Embryology

Lippincott Williams & Wilkins

"Grant's Dissector provides step-by-step human cadaver dissection procedures for students to perform the dissections in lab and to recognize important relationships revealed through dissection. Each chapter is consistently organized beginning with a Dissection Overview, followed by detailed Dissection Instructions, and concluding with a Dissection Follow-up. The Dissection Overview provides a blueprint of what needs to be accomplished during the dissection session, and includes relevant surface anatomy as well as concise coverage of osteology. Dissection Instructions offer a logical sequence and numbered

steps for the dissection. The Dissection Follow-up emphasizes important features of the dissection and encourages students to reflect on and synthesize the information"--
