Cognitive and Perceptual Rehabilitation John Wiley & Sons
 Rev. ed. of: *Neurological rehabilitation* / [edited by] Darcy A. Umphred; with section editors, Gordon U. Burton, Rolando T. Lazaro, Margaret L. Roller. 5th ed. c2007.
Assessment in Occupational Therapy and Physical Therapy John Wiley & Sons
 Special education students often learn about the characteristics of disabilities, but can lack an understanding of the relationship between diagnostic assessment and eligibility for special education services. The Special Educator's Guide to Assessment: A Comprehensive Overview by IDEA Disability Category focuses on the role that assessment plays in the diagnosis of a disability, determination of eligibility for special education services, and education of students with disabilities to provide a meaningful interconnection between assessment concepts and classroom application for teachers. Authors Tara S. Guerriero, Mary A. Houser, and Vicki A. McGinley want to ensure that future special education teachers have the preparation to provide comprehensive instruction to P-12 students through this text. While special education teachers are often not the ones conducting comprehensive evaluations, it is paramount that they understand their students' individual characteristics, and understand how assessment is used to determine diagnosis and eligibility. Framing the text around The Individuals with Disabilities Act (IDEA) provides students with concrete standards by which all disabilities are evaluated and regulated in our public educational system. Part I introduces the basic topics of assessment, ethics, and assessment types. Part II moves on to provide diagnostic and eligibility criteria according to IDEA categories that are most commonly diagnosed in an educational setting while Part III describes the criteria for IDEA categories most commonly diagnosed in a medical setting. Features like case studies and sample comprehensive evaluations help bring to life assessment and how it applies in real classrooms.
A Clinical Guide to Evaluation and Management across the Lifespan Springer Nature
 Life Care Planning is an advanced collaborative practice concerned with coordinating, accessing, evaluating, and monitoring necessary services for individuals with significant medical adversity. This handbook provides a comprehensive resource for all people involved with catastrophic impairments who need to solve complex medical care problems. Upda
Clinical Assessment of Child and Adolescent Intelligence Springer Science & Business Media
 Fully revised to reflect the latest AOTA standards, *Occupational Therapy Evaluation for Adults: A Pocket Guide, 2nd Edition* is a quick, comprehensive reference to guide students and practitioners as they perform efficient evaluations of adults, identify problems, and plan and implement interventions to produce optimal therapeutic outcomes. Clinical examples illustrate the application of content, illustrations demonstrate assessment techniques, and extensive tables capture information in an easy-to-read manner. This completely revised and updated Second Edition covers a wide range of new assessments and tools for community-based practitioners, includes up-to-coverage of assessing clients in natural settings, and offers a strong focus on helping readers develop practical skills for the workplace.
Developmental Disabilities Abstracts Elsevier Health Sciences
 Designed for screening, diagnostic, and research purposes, to assess visual perception while avoiding any motor involvement that would influence the assessment. For use with children and adults.
Critical Issues in Clinical, Forensic and School Settings Elsevier Health Sciences
 Using a problem-solving approach based on clinical evidence, *Neurological Rehabilitation, 6th Edition* covers the therapeutic management of people with functional movement limitations and quality of life issues following a neurological event. It reviews basic theory and covers the latest

screening and diagnostic tests, new treatments, and interventions commonly used in today's clinical practice. This edition includes the latest advances in neuroscience, adding new chapters on neuroimaging and clinical tools such as virtual reality, robotics, and gaming. Written by respected clinician and physical therapy expert Darcy Umphred, this classic neurology text provides problem-solving strategies that are key to individualized, effective care. UNIQUE! Emerging topics are covered in detail, including chapters such as Movement Development Across the Lifespan, Health and Wellness: The Beginning of the Paradigm, Documentation, and Cardiopulmonary Interactions. UNIQUE! A section on neurological problems accompanying specific system problems includes hot topics such as poor vision, pelvic floor dysfunction, and pain. A problem-solving approach helps you apply your knowledge to examinations, evaluations, prognoses, and intervention strategies. Evidence-based research sets up best practices, covering topics such as the theory of neurologic rehabilitation, screening and diagnostic tests, treatments and interventions, and the patient's psychosocial concerns Information. Case studies use real-world examples to promote problem-solving skills. Non-traditional approaches to neurological interventions in the Alternative and Complementary Therapies chapter include the movement approach, energy approach, and physical body system approaches therapies. Terminology adheres to the best practices of the APTA as well as other leading physical therapy organizations, following The Guide to Physical Therapy Practice, the Nagi model, and the ICF World Health Model of patient empowerment. Updated illustrations provide current visual references. NEW chapters on imaging and robotics have been added. Updated chapters incorporate the latest advances and the newest information in neuroscience and intervention strategies. Student resources on an Evolve companion website include references with links to MEDLINE and more.

A Function-Based Approach Elsevier Health Sciences

Preparing for the Occupational Therapy National Board Exam: 45 Days and Counting is a comprehensive overview for occupational therapy students preparing to take the National Board for Certification in Occupational Therapy (NBCOT) exam. Containing more than just study questions, this comprehensive review guide is organized by domain areas and each subject is addressed according to the degree it is covered on the NBCOT examination. Corresponding workbook pages include specific references to occupational therapy curricula, enabling additional exploration of content that is challenging or unfamiliar. Also included with each new print copy of the review guide, the companion CD-ROM simulates online testing with multiple choice practice questions, each providing evidence-based rationale for why a particular answer is correct or incorrect. Health and wellness is also addressed throughout the book with test-taking strategies, study plans, goal sheets and other stress-reducing tips. A well-rounded, informational, and helpful guide, *Preparing for the Occupational Therapy National Board Exam: 45 Days and Counting* is a valuable resource to help students prepare for the NBCOT exam. Features: Detailed schedule for 45-days of study In depth content outlines for each chapter References for each question with evidenced based rationale Over 100 Figures and Tables to illustrate key points Wellness Tips and Self Assessment forms to develop healthy study habits Study Plans and Goal Sheets to keep focused and on track Example of a completed study guide with resources *CD ROM with over 100 test questions, case studies, and work sheets *Please note: Electronic formats of this review guide do not include the CD ROM.

Learn to provide effective therapy for children and adolescents! *Pediatric Skills for Occupational Therapy Assistants, 5th Edition* covers the entire scope of pediatric OT practice, from normal childhood development to pediatric disorders and treatment planning. Case studies and helpful tips reinforce your understanding and make it easier to apply OT principles to the clinical setting. This

edition is thoroughly updated with online videos and new coverage of community systems, physical agent modalities, childhood obesity, Model of Human Occupation assessments, and Kinesio Taping®. Written by noted OTA educators Jean Solomon and Jane O'Brien, this resource is both a comprehensive textbook and a practical clinical reference! Hundreds of case examples provide snapshots of real-life situations and solutions, helping you apply key concepts in a real-life setting. UNIQUE! Clinical Pearls boxes highlight practical advice from the authors and contributors, sharing what they have learned from years of experience. Coverage of evidence-based practice includes clinical trials and outcome studies, especially those relating to evaluation and intervention. Coverage of cultural diversity and sensitivity issues addresses the many different groups of people that OTAs treat in practice. Information on preventive care takes the role of the OTA beyond intervention and treatment. Family-centered perspective uses the terminology of the AOTA Practice Framework in showing how to tailor your treatment to meet the needs of children from different environments. Key terms, outlines, and objectives at the beginning of each chapter prepare readers for the information they're expected to learn from the chapter. Content reviews and questions at the end of each chapter summarize key concepts and help you assess your understanding. Suggested activities in each chapter help readers to bridge the gap between the classroom and the clinic by exploring realistic situations. UNIQUE! Learning resources on the Evolve companion website include video clips and review questions, reinforcing your understanding and demonstrating how concepts apply to actual practice. NEW! Every Moment Counts content is added to The Occupational Therapy Process chapter, promoting pediatric mental health. NEW! Coverage of educational expectations is added to the Educational System chapter. NEW! Coverage of "signature" constraint-induced movement therapy (CIMT) is added to Cerebral Palsy chapter. NEW photographs and illustrations are added throughout the book. NEW video clips on the Evolve companion website show the typical development of children/adolescents. NEW! Extensive assessment and abbreviations appendices are added to Evolve. NEW! Expanded glossary is added to Evolve.

Handbook for the Assessment of Driving Capacity MVPT: Motor-free Visual Perception Test Scoring Sheet MVPT-3 Motor-free Visual Perception Test Individually administered test designed to assess overall visual perceptual ability in individuals ages 4 years 0 months through 95 years old and above. MVPT-VM Motor-free Visual Perception Test - Vertical Format Designed for screening, diagnostic, and research purposes, to assess visual perception while avoiding any motor involvement that would influence the assessment. For use with children and adults. A Review of Assessment Instruments and Procedures for Young Exceptional Children Handbook for the Assessment of Driving Capacity

Individually administered test designed to assess overall visual perceptual ability in individuals ages 4 years 0 months through 95 years old and above.

A Comprehensive Overview by IDEA Disability Category Oxford University Press
Pedretti's Occupational Therapy: Practice Skills for Physical Dysfunction, 8th Edition prepares you for occupational therapy practice with adults who have physical disabilities. This cornerstone text provides a foundation for the development of clinical reasoning skills in a comprehensive, case-based learning approach to physical dysfunction. New full color photos and helpful pedagogy, including threaded case studies, OT Practice Notes, ethical considerations, and end-of-chapter review questions, reinforce learning, enhance retention, and prompt you to apply principles in a clinical setting. UNIQUE! Threaded case studies, woven throughout each chapter, help you apply concepts to real-life clinical practice. UNIQUE! Ethical Considerations boxes highlight the key ethical concerns of treatment options so you can practice ethically. UNIQUE! OT Practice Notes convey important considerations for professional practice. Focuses on the occupational therapist's role in health and wellness, which the OTA has identified as a key practice area in the 21st century. Information on prevention, rather than simply intervention or treatment, shows how OTs can take a proactive role in patient care. Evidence-based content included throughout, especially in regards to evaluation and intervention. Content on occupational therapy's commitment to considering cultural and ethnic diversity in every chapter. Key terms, chapter outlines, chapter objectives lay out the information you can expect to learn from each chapter.

Handbook of Clinical Child Neuropsychology John Wiley & Sons
Every chapter has been updated to reflect current thought and research in the field. Chapters devoted to specialized tests in neuropsychology have been updated to reflect new editions of these popular instruments. Special topic chapters have been added such as working in pediatric coma rehabilitation, using the planning, attention, sequential, simultaneous theory of neuropsychological processes, additions on ADHD, and more appear written by the leading experts and practitioners in these fields to reflect the demands of current practice in clinical child neuropsychology.

Dtvp-2 Prentice Hall

A compelling and compassionate case study approach to a broad range of neuropsychological disorders Neuropsychological Assessment and Intervention for Childhood and Adolescent Disorders focuses on the neuropsychological assessment and evidence-based practices available for assessing and treating children living with the etiological and neurological components of various disorders. Each chapter provides one or more case studies along with helpful background information, assessment results, and recommendations based on assessment data. Bridging science and practice, the book reviews the scientific literature, research on clinical implications, and evidence-based treatment of such disorders as: Dyslexia and Dyscalculia Specific Language Impairment/Dysphasia Autism Spectrum Disorders Attention-Deficit/Hyperactivity Disorder Tourette Syndrome Traumatic Brain Injury Childhood Cancer Epilepsy Cerebrovascular Disease Low Birth Weight Environmental Toxin Exposure Neurotoxins, Pregnancy, and Subsequent Disorders Chromosomal Anomalies Neurocutaneous Disorders Metabolic Disorders Each case study complements the content of each chapter by illustrating how the assessment process can inform intervention efforts for children. In addition, the cases humanize the effects of various disorders and demonstrate the usefulness of neuropsychological information in treatment and intervention planning, especially within children's educational and social contexts.

Pediatric Skills for Occupational Therapy Assistants E-Book John Wiley & Sons
The Third Edition of the highly acclaimed Encyclopedia of Special Education has been thoroughly updated to include the latest information about new legislation and guidelines. In addition, this comprehensive resource features school psychology, neuropsychology, reviews of new tests and curricula that have been developed since publication of the second edition in 1999, and new biographies of important figures in special education. Unique in focus, the Encyclopedia of Special Education, Third Edition addresses issues of importance ranging from theory to practice and is a critical reference for researchers as well as those working in the special education field.

Neurological Rehabilitation - E-Book Elsevier Health Sciences
In today's technology based society, children are learning information from digital devices and are currently being tested by paper assessments. New electronic assessments have been created to try to compensate for this discrepancy. However, very few of these electronic assessments have been tested to see if they are a reliable measure. The electronic version of the Motor-Free Visual Perception Test 3rd edition (MVPT-3) is a recently developed assessment that has not been assessed to see if it is a reliable measure. The purpose of this study sought to determine if the electronic version of the MVPT-3 is reliable assessment to use with children ages 4 years 0 months to 10 years

11 months. A test-retest correlational design was used to assess temporal stability. The main research questions reviewed if multiple administrations of the Electronic Version of the MVPT-3 yields consistent outcome scores and if the electronic version of the MVPT-3 is reliable for professionals to use clinically. Fifty-four participants were recruited from four daycare centers and afterschool programs in Eastern and Central North Carolina and ranged in ages 4 years 0 months to 10 years 11 months. Complete data was collected on forty-eight participants and was analyzed via a single tailed Pearson product-moment correlation. The results indicated that the electronic version of the MVPT-3 presents clinically acceptable test-retest reliability with a correlation coefficient of $r=.81$. Learning effects were revealed for certain items. Results indicate that this is an appropriate screening assessment for school aged children but should not be used for diagnostic purposes. The results also demonstrate that further and more extensive research needs to be conducted in order to determine if the electronic version of the MVPT-3 is a reliable measure of visual perception.

Essentials of School Neuropsychological Assessment Lulu.com
This book offers clear best-practice guidelines for the assessment of Autism Spectrum Disorder. It discusses both the rising rates of autism and the growing need for appropriate, effective treatments and services. The book examines measures and methods used in assessing for core symptoms of ASD as well as memory, attention, visual and spatial skills, and other areas relevant to autism assessment. In-depth material on differential diagnosis and a range of comorbid conditions depict the complexities of the assessment process and the necessity of accurate identification. The book's case vignettes and sample recommendations add practical and personal dimensions to issues and challenges surrounding diagnosis. Topics featured include: "ul> A practical guide to the comprehensive assessment process. Discussion of the assessment process from referral to recommendation. Diagnostic framework for ASD and other disorders School-based ASD eligibility evaluation. Assessment across the lifespan. /div Assessment of Autism Spectrum Disorder is an important tool for clinicians, practitioners, researchers and graduate students in the fields of child and school psychology, behavioral therapy, and social work as well as the related areas of psychiatry, pediatrics, forensic psychology, and educational and healthcare policy.

Encyclopedia of Special Education, Volume 3 Jones & Bartlett Learning
Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's Stroke Rehabilitation: A Function-Based Approach, 4th Edition. Using a holistic and multidisciplinary approach, this text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Evidence-based clinical trials and outcome studies clearly outline the basis for stroke interventions. UNIQUE! Survivor's Perspectives help readers understand the stroke rehabilitation process from the client's point-of-view. UNIQUE! Case studies challenge readers to apply rehabilitation concepts to realistic scenarios. UNIQUE! A multidisciplinary approach highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. Review questions in each chapter help readers assess their understanding of rehabilitation concepts. Key terms and chapter objectives at the beginning of each chapter help readers study more efficiently. Three new chapters broaden your understanding of stroke intervention in the areas of Using Technology to Improve Limb Function, Managing Speech and Language Deficits after Stroke, and Parenting after Stroke. Learning activities and interactive references on a companion Evolve Resources website help you review textbook content and locate additional information.

MVPT: Motor-free Visual Perception Test Elsevier Health Sciences
The sixth edition of Occupational Therapy for Children maintains its focus on children from infancy to adolescence and gives comprehensive coverage of both conditions and treatment techniques in all settings. Inside you'll discover new author contributions, new research and theories, new techniques, and current trends to keep you in step with the changes in pediatric OT practice. This edition provides an even stronger focus on evidence-based practice with the addition of key research notes and explanations of the evidentiary basis for specific interventions. Unique Evolve Resources website reinforces textbook content with video clips and learning activities for more comprehensive learning. Case studies help you apply concepts to actual situations you may encounter in practice. Evidence-based practice focus reflects the most recent trends and practices in occupational therapy. Unique! Chapter on working with adolescents helps you manage the special needs of this important age group. Unique! Research Notes boxes help you interpret evidence and strengthen your clinical decision-making skills. Video clips on a companion Evolve Resources website reinforce important concepts and rehabilitation techniques.

45 Days and Counting Lippincott Williams & Wilkins
Reflecting current practice with a renewed focus on function-based assessments and evidence-based interventions, Cognitive and Perceptual Rehabilitation: Optimizing Function includes all of the tools you need to make a positive impact on your patients' lives. This clinical resource summarizes, highlights, and constructively critiques the state of cognitive and perceptual rehabilitation. This text helps you enhance your patients' quality of life by promoting improved performance of necessary and meaningful activities, and decreasing participation restrictions. Evidence-based intervention tables focus on improving daily function through proven methods. Summary tables highlight each assessment's clinical utility and psychometric properties to provide you with the tools you need to choose the best assessment for each patient. An entire chapter on Application of Concepts features five case studies, each discussing background data and medical record review, evaluation findings, assessments, long-term goals, short-term goals, and interventions/functional activities to help you apply the theories and principles from the book to real-world situations. Handy learning aids including Key Terms, Learning Objectives, and Review Questions help you remember important information.

Scoring Sheet Elsevier Health Sciences
The only comprehensive reference devoted to special education The highly acclaimed Encyclopedia of Special Education addresses issues of importance ranging from theory to practice and is a critical reference for researchers as well as those working in the special education field. This completely updated and comprehensive A-Z reference includes about 200 new entries, with increased attention given to those topics that have grown in importance since the publication of the third edition, such as technology, service delivery policies, international issues, neuropsychology, and RTI. The latest editions of assessment instruments frequently administered in special education settings are discussed. Only encyclopedia or comprehensive reference devoted to special education Edited and written by leading researchers and scholars in the field New edition includes over 200 more entries than previous edition, with increased attention given to those topics that have grown in importance since the publication of the third edition—such as technology, service delivery policies, international issues, neuropsychology, and Response to Intervention, Positive Behavioral Interventions and Supports (PBIS), Autism and Applied Behavior Analysis Entries will be updated to cover the latest editions of the assessment instruments frequently administered in special education settings Includes an international list of authors and descriptions of special education in 35 countries

Includes technology and legal updates to reflect a rapidly changing environment Comprehensive

and thoroughly up to date, this is the essential, A-Z compilation of authoritative information on the education of those with special needs.
