Accidental Gods McDougal Littell/Houghton Mifflin
United States History & Geography explores the history of our nation and brings the past to life for today's high school students. The program's robust, interactive rigor includes a strong emphasis on biographies and primary sources, document-based questions, critical thinking and building historical understanding, as well as developing close reading skills. ISBN Copy Trusted,

renowned authorship presents the history of the United States in a streamlined print Student Edition built around Essential Questions developed using the Understanding by Design® instructional approach. Includes Print Student Edition *World History of the Customs and Tariffs* Random House INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors

have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Middle East in Modern World History focuses on the history of this region over the past 200 years. It examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West The development of the region's natural resources, especially oil The impact of a rapidly globalizing world economy on the Middle East

World History, Grades 6-8 Medieval and Early Modern Times Little, Brown

This major work by Laurence Lampert provides a new interpretation of modern philosophy by developing Nietzsche's view that genuine philosophers set out to determine the direction of culture through their ideas and that they conceal the radical nature of their thought by their esoteric style. From this Nietzschean perspective, Francis Bacon and René Descartes can be considered the founders of modernity. Lampert argues that Bacon's positive claims for science aimed to destroy the dominance of Christianity. Descartes continued Bacon's radical program while providing it with the mathematical physics required for its success. Far from being solely an epistemological and metaphysical thinker, says Lampert, Descartes was a master writer whose comic ridicule helped bring down the Church to which he paid lip service. Both Bacon and Descartes used the Platonic art of dissimulation to achieve their ends by making their revolutionary aims appear compatible with Christianity. Once we recognize Bacon and Descartes as legislators of modern times in a specifically Nietzschean sense, we can also see Nietzsche in a new way--as the first thinker to have understood modern times

and transcended it in a postmodern worldview. According to Lampert, Nietzsche provides a new foundation for culture, a joyous science that reveals the grandeur and purposeless play of the cosmic whole and yet avoids enervating despair or destructive, dogmatic belief.

The Middle East in Modern World History Glencoe/McGraw-Hill

A provocative history of men who were worshipped as gods that illuminates the connection between power and religion and the role of divinity in a secular age Ever since 1492, when Christopher Columbus made landfall in the New World and was hailed as a heavenly being, the accidental god has haunted the modern age. From Haile Selassie, acclaimed as the Living God in Jamaica, to Britain’s Prince Philip, who became the unlikely center of a new religion on a South Pacific island, men made divine—always men—have appeared on every continent. And because these deifications always emerge at moments of turbulence—civil wars, imperial conquest, revolutions—they have much to teach us. In a revelatory history spanning five centuries, a cast of surprising deities helps to shed light on the thorny questions of how our modern concept of “religion” was invented; why religion and politics are perpetually entangled in our supposedly secular age; and how the power to call someone divine has been used and abused by both oppressors and the oppressed. From nationalist uprisings in India to Nigerien spirit possession cults, Anna Della Subin explores how deification has been a means of defiance for colonized peoples. Conversely, we see how Columbus, Cortés, and other white explorers amplified stories of their godhood to justify their dominion over native

peoples, setting into motion the currents of racism and exclusion that have plagued the New World ever since they touched its shores. At once deeply learned and delightfully antic, *Accidental Gods* offers an unusual keyhole through which to observe the creation of our modern world. It is that rare thing: a lyrical, entertaining work of ideas, one that marks the debut of a remarkable literary career.

War: How Conflict Shaped Us CUP Archive

The Roman architect and engineer Vitruvius declared *firmitas*, *utilitas*, and *venustas*—firmness, commodity, and delight— to be the three essential attributes of architecture. These qualities are brilliantly explored in this book, which uniquely comprises both a detailed survey of Western architecture, including Pre-Columbian America, and an introduction to architecture from the Middle East, India, Russia, China, and Japan. The text encourages readers to examine closely the pragmatic, innovative, and aesthetic attributes of buildings, and to imagine how these would have been praised or criticized by contemporary observers. Artistic, economic, environmental, political, social, and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients, society at large, and future generations.

This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups

and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

'Expansive and accessible, Peter Stearns' *Sexuality in World History* offers a much needed introduction to histories of sexuality from a global perspective.' - Mary Spongberg- Head of Department of Modern History, Macquarie University, USA This book examines sexuality in the past, and explores how it helps explain sexuality in the present. The subject of sexuality is often a controversial one, and exploring it through a world history perspective emphasises the extent to which societies, including

our own, are still reacting to historical change through contemporary sexual behaviours, values, and debates. The study uses a clear chronological structure to focus on major patterns and changes in sexuality - both sexual culture and sexual behaviours - in the main periods of world history, with comparison and discussion across cultures and societies. Topics covered include: issues involved in studying the history of sexuality the sexual implications of the transition from hunting and gathering economies to agricultural economies sexuality in Classical societies the post-Classical period and the spread of the world religions sex in an age of trade and colonies changes in sexual behaviours and sexual attitudes between 1750 and 1950 sex in contemporary world history. The book is a vital contribution to the study of world history, and is the perfect companion for all students of the history of sexuality.

A leading ecologist argues that if humankind is to survive on a fragile planet, we must understand and obey its iron laws. Our species has amassed unprecedented knowledge of nature, which we have tried to use to seize control of life and bend the planet to our will. In *A Natural History of the Future*, biologist Rob Dunn argues that such efforts are futile. We may see ourselves as life's overlords, but we are instead at its mercy. In the evolution of antibiotic resistance, the power of natural selection to create biodiversity, and even the surprising life of the London

Underground, Dunn finds laws of life that no human activity can annul. When we create artificial islands of crops, dump toxic waste, or build communities, we provide new materials for old laws to shape. Life's future flourishing is not in question. Ours is. As ambitious as Edward Wilson's *Sociobiology* and as timely as Elizabeth Kolbert's *The Sixth Extinction, A Natural History of the Future* sets a new standard for understanding the diversity and destiny of life itself.

The impersonality of social relationships in the society of strangers is making majorities increasingly nostalgic for a time of closer personal ties and strong community moorings. The constitutive pluralism and hybridity of modern living in the West is being rejected in an age of heightened anxiety over the future and drummed up aversion towards the stranger. Minorities, migrants and dissidents are expected to stay away, or to conform and integrate, as they come to be framed in an optic of the social as interpersonal or communitarian. Judging these developments as dangerous, this book offers a counter-argument by looking to relations that are not reducible to local or social ties in order to offer new suggestions for living in diversity and for forging a different politics of the stranger. The book explains the balance between positive and negative public feelings as the synthesis of habits of interaction in varied spaces of collective being, from the workplace and urban space, to intimate publics and tropes of imagined community. The book proposes a series of interventions that make for public being as both unconscious habit and cultivated craft of negotiating difference, radiating civilities of

situated attachment and indifference towards the strangeness of others. It is in the labour of cultivating the commons in a variety of ways that Amin finds the elements for a new politics of diversity appropriate for our times, one that takes the stranger as there, unavoidable, an equal claimant on ground that is not pre-allocated.

Tired of Cold War political analysis about post-Cold War events, zero-sum game theories, and world history as only one war after another? *Disobedient Histories in Ancient and Modern Times: Regionalism, Governance, War and Peace* breaks tradition by considering some alternative Western and non-Western international relations theories found in historical, anthropological, literary, archaeological, genetic and physical evidence from some ancient and modern societies in Europe, Africa and Asia. Chapters in this comparative history book explore the deep backstory of the South Asian Association for Regional Cooperation, the Association for Southeast Asian Nations, Scandinavian Progressivism in international development, Welsh cultural preservation, North African feminism and political traditions in Tunisia, and the Gulf Cooperation Council. Other chapters explore the backstory of ideas leading to the rise of the ultranationalist National Front political party and the Charlie Hebdo magazine attack in France and also the zombie economics behind Boko Haram in Nigeria. The international relations theories in these disobedient histories suggest that the global peace, prosperity and dignity present in the United Nations Millennium and Sustainable Development Goals are viable.

The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

Is peace an aberration? The bestselling author of *Paris 1919* offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR "Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book."—H.R. McMaster, author of *Dereliction of Duty* and *Battlefields: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity's history, its social and political institutions, its values

and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.
