transformation of a country by improving the health thereby increasing life standard and economic productivity of the society.(PDF) Water Supply Distribution System Design.pdf ...LECTURE-1 Module-1 Raw Water Source The various sources of water can be classified into two categories: 1. Surface sources, such as a. Ponds and lakes; b. Streams and rivers; c. Storage reservoirs;

and d. Oceans, generally not used for water supplies, at present. 2. Sub-surface sources or underground sources, such as a. Springs; b. LECTURE NOTE COURSE CODE BCE1504 Source: Water Supply Engineering by M. A. Aziz. Surface Water Situation. • Ground water and surface water are dependent on each other • GW flows into the SW sources in the dry season • SW enters into ground during

the monsoon • Two are interrelated and the use of one usually affects the availability of water from the other. • Large-scale use of GW for irrigation purposes has caused a lowering of the GW level and drying up of SW sources. Proposes of studying water quality:  
 1.Determine the degree of pollution.  
 2.Determine of design steps for water treatment process,

(drinking water – industrial water – swimming ponds).  
 3.Assessment of treatment units. 4.Check the effluent of WTP with environmental . WATER QUALITY.

*Notes Water Supply and Sanitary Engineering WSSE ...*

ABSTRACT  
 The provision of clean Water Supply is one of the major factors that greatly contribute to the socioeconomic transformation of a country by improving

the health thereby increasing life standard and economic productivity of the society.
