HARRINGTON HART

America and the Intellectual Cold Wars in Europe Oxford University Press

The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history. Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards, the era was dominated by political violence and chronic instability. Its symbols were Verdun, Guernica, and Auschwitz. By the end of this dark period, tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized. If the nineteenth century gave Europeans cause to regard the future with a sense of optimism, the early twentieth century had them anticipating the destruction of civilization. The fact that so many revolutions, regime changes, dictatorships, mass killings, and civil wars took place within such a compressed time frame suggests that

Europe experienced a general crisis. The Oxford Handbook of European History, 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective. It demonstrates the degree to which national experiences were intertwined with those of other nations, and how each crisis was implicated in wider regional, continental, and global developments. Readers will find innovative and stimulating chapters on various political, social, and economic subjects by some of the leading scholars working on modern European history today.

How Political Neglect Is Choking American Seapower and What to Do About It OUP Oxford
Nationalism in Europe resonates through music--from folk song to marches, from operas to anthems--giving voice in this reference resource to the makers of modern history. * Includes a glossary defining terms such as Deutscher Tanz, Edda, Ausgleich, ballad, and illustrations such as Das Deutschlandlied and the World War I recording project * Includes an

audio CD with musical examples from fieldwork and some of Europe's foremost performers
Seablindness A&C Black
This collection explores the most important transformations & upheavals of post-1945 Europe in the light of recent scholarship. It examines the post-war economic boom & the political realignment of eastern European states in the 1990s, amongst other topics.

This Handbook re-examines the concept of early modern history in a European and global context. The term 'early modern' has been familiar, especially in Anglophone scholarship, for four decades and is securely established in teaching, research, and scholarly publishing. More recently, however, the unity implied in the notion has fragmented, while the usefulness and even the validity of the term, and the historical periodisation which it incorporates, have been questioned. The Oxford Handbook of Early Modern European History, 1350-1750 provides an account of the development of the subject during the past half-century, but primarily offers an integrated and comprehensive survey of present knowledge, together with some suggestions as to how the field is developing. It aims both to interrogate the notion of 'early modernity' itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that 'early modern' is not simply a chronological label but possesses a substantive integrity. Volume I examines 'Peoples and

Place', assessing structural factors such as climate, printing and the revolution in information, social and economic developments, and religion, including chapters on Orthodoxy, Judaism and Islam. [The Juggler of Notre Dame and the Medievalizing of Modernity](#). Open Book Publishers
The Illusion of Victory demonstrates that most of the rewards of victory in modern warfare are either exaggerated or false. When the ostensible benefits of victory are examined a generation after a war, it becomes inescapably evident that the defeated belligerent rarely conforms to the demands and expectations of the victor. Consequently, long-term political and military stability is denied to both the victorious power and to the defeated one. As a result, neither victory nor defeat deter further outbreaks of war. This sobering reality is increasingly the case in the twentieth and twenty-first centuries. Ian Bickerton persuasively argues that as the rhetoric of victory becomes more hollow all countries must adopt creative new approaches to resolving disputes.

REA's Crash Course for the AP® European History Exam - Gets You a Higher Advanced Placement® Score in Less Time About this new exam and test prep: The new AP® European History exam is structured around five course themes and 19 key concepts in four different chronological periods, from approximately 1450 to the present. REA's all-new AP® European History Crash Course is perfect for the time-crunched student, the last-minute studier, or anyone who wants a refresher on the subject. Are you crunched for time? Have you started studying for your Advanced Placement® European History exam yet? How will you memorize everything you need to know before the test? Do you wish there was a fast and easy way to study for the exam AND boost your score? If this sounds like you, don't panic. REA's Crash Course for AP® European History is just what you need. Our Crash Course gives you: Targeted, Focused Review - Study Only What You Need to Know The Crash Course is based on an in-depth analysis of the new AP® European History

course description outline and actual AP® test questions. It covers only the information tested on the exam, so you can make the most of your valuable study time. Written by an AP® European History expert the targeted review prepares students for the new test by focusing on the new framework concepts and learning objectives tested on the redesigned AP® European History exam. Our easy-to-read format gives students a crash course in the historical events, topics, and issues in European History The book also features must-know terms all AP® European History terms students should know before test day. Expert Test-taking Strategies With our Crash Course, you can study the subject faster, learn the crucial material, and boost your AP® score all in less time. Our author shares detailed question-level strategies and explains the best way to answer the multiple-choice and free-response questions you'll encounter on test day. By following our expert tips and advice, you can boost your overall point score! FREE Practice Exam After studying the material in the Crash

Course, go to the online REA Study Center and test what you've learned. Our free practice exam features timed testing, detailed explanations of answers, and automatic scoring analysis. The exam is balanced to include every topic and type of question found on the actual AP® exam, so you know you're studying the smart way. Whether you're cramming for the test at the last minute, looking for extra review, or want to study on your own in preparation for the exams - this is the test prep every AP® European History student must have. When it's crucial crunch time and your Advanced Placement® exam is just around the corner, you need REA's Crash Course for AP® European History! **Cultural Identity and Modern History** Anchor Canada This scholarly study of the formation of the Irish literary canon in the first half of the twentieth century provides fascinating and often surprising insights into the ways in which different educational institutions responded to the political and historical changes taking place as Ireland moved from colonial to postcolonial status. Dr

Wei H. Kao discusses not only what was included on school and university curriculum but also writers who were excluded, in particular women writers who appeared to interrogate a male nationalist agenda for the representation of Ireland.- Emeritus Professor C.L. Innes The writers discussed include Daniel Corkery, J.G. Farrell, Denis Johnston, Mary Lavin, Iris Murdoch, Kate O'Brien, Frank O'Connor, Liam O'Flaherty, and James Plunkett. [AP® European History Crash Course Book + Online ABC-CLIO](#) This ambitious and vivid study in six volumes explores the journey of a single, electrifying story, from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries. The Juggler of Notre Dame tells how an entertainer abandons the world to join a monastery, but is suspected of blasphemy after dancing his devotion before a statue of the Madonna in the crypt; he is saved when the statue, delighted by his skill, miraculously comes to life. Jan Ziolkowski tracks the poem from its medieval roots to its

rediscovery in late nineteenth-century Paris, before its translation into English in Britain and the United States. The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations, and Ziolkowski concludes with an examination of the explosion of interest in *The Juggler of Notre Dame* in the twentieth century and its place in mass culture today. Volume 4 examines the famous *Le jongleur de Notre Dame* by the French composer Jules Massenet, which took Europe by storm after premiering in 1902 and then crossed the Atlantic to the impresario Oscar Hammerstein and the diva Mary Garden, who gave the opera new legs as a female juggler. Presented with great clarity and simplicity, Ziolkowski's work is accessible to the general reader, while its many new discoveries will be valuable to academics in such fields and disciplines as medieval studies, medievalism, philology, literary history, art history, folklore, performance studies, and reception studies.

Inquiry-Based Lessons in World History

Harvard University Press
First published over thirty years ago, *War in European History* is a brilliantly written survey of the changing ways that war has been waged in Europe, from the Norse invasions to the present day. Far more than a simple military history, the book serves as a succinct and enlightening overview of the development of European society as a whole over the last millennium. From the Norsemen and the world of the medieval knights, through to the industrialized mass warfare of the twentieth century, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new final chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'.

The Illusion Of Victory
Routledge

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Women In Late Medieval and Reformation Europe 1200-1550 Routledge

This handbook provides

the first systematic integrated analysis of the role that states or state actors play in the construction of history and public memory after 1945. The book focuses on many different forms of state-sponsored history, including memory laws, monuments and memorials, state-archives, science policies, history in schools, truth commissions, historical expert commissions, the use of history in courts and tribunals etc. The handbook contributes to the study of history and public memory by combining elements of state-focused research in separate fields of study. By looking at the state's memorialising capacities the book introduces an analytical perspective that is not often found in classical studies of the state. The handbook has a broad geographical focus and analyses cases from different regions around the world. The volume mainly tackles democratic contexts, although dictatorial regimes are not excluded.

The Oxford Handbook of Early Modern European History, 1350-1750

Rowman & Littlefield

This resource book is designed to assist teachers in implementing

California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)
Aspects of European History 1789-1980 ASCD

Decolonizing German and European History at the Museum examines efforts by European museums to investigate colonialism as part of an unprocessed past, confront its presence, and urge repair. A flurry of exhibitions and the overhaul of numerous large museums in the last decade signal that an emergent colonial memory culture is now reaching broader publics. Exhibitions pose the question of what Europeans owe to those they colonized.

Decolonizing German and European History at the Museum shows how museums can help visitors mourn historic violence and identify the contemporary agents, beneficiaries, victims, survivors, and resisters of colonial presence. At the same time, the book treats the museum as part of the racialized power relations that activists, academics, and artists have long protested against. This book asks whether museums have made the dream of activists, academics, and artists to build equitable futures more acceptable and more durable—or whether in packaging that dream for general audiences they curtail it. Confronting

colonial violence, this book argues, pushes Europeans to face the histories of racism and urges them to envision antiracism at the global scale.

Global Expansion to the Post-9/11 World (Vol. 2, Grades 7-10) Melbourne University Publishing

The Holocaust is a pervasive presence in British culture and society. Schools have been legally required to deliver Holocaust education, the government helps to fund student visits to Auschwitz, the Imperial War Museum's permanent Holocaust Exhibition has attracted millions of visitors, and Britain has an annually commemorated Holocaust Memorial Day. What has prompted this development, how has it unfolded, and why has it happened now? How does it relate to Britain's post-war history, its contemporary concerns, and the wider "globalisation" of Holocaust memory? What

are the multiple shapes that British Holocaust consciousness assumes and the consequences of their rapid emergence? Why have the so-called "lessons" of the Holocaust enjoyed such popularity in Britain? Through analysis of changing engagements with the Holocaust in political, cultural and memorial landscapes over the past generation, this book addresses these questions, demonstrating the complexities of Holocaust consciousness and reflecting on the contrasting ways that history is used in Britain today.

Holocaust Consciousness in Contemporary Britain Research & Education Assoc.

The challenges to American security in the Western Pacific, the seas that surround Europe, and the Persian Gulf are growing. At the same time, U.S. military commanders seek more naval forces to protect America's interest in the safe transit of American

goods, deterrence in a proliferating world, and the defense of our key allies. At the same time U.S. defense budgets are shrinking. American seapower has not been as small as it is today since before World War I. Unless reversed, U.S. seapower will continue its decline into the indefinite future as politicians ignore the widening gulf between the cost of modernizing and expanding American seapower, and the resources devoted to this most strategic arm of the nation's defense.

Seablindness explains the dilemma. It looks at the consequences of neglect including the effect of increased deployments on families, global scenarios set in the immediate future, the views of America's most knowledgeable military officers, the anxious reactions of U.S. allies, and hard facts to show how a lack of political will is dismantling the nation's global reach and with it, our position as the world's great power.
