An Historical Examination of the Concept in the Early Franciscan Sources MIT Press  
 This study is concerned with Early Modern English psalm translations. It focusses on the connection between inspiration and formal perfection as it appears in George Wither's "A Preparation to the Psalter", Philip Sidney's "The Defence of Poesy", "The Sidney Psalter" and "The Bay Psalm Book". Taking into account theological, philosophical, and literary contexts of the time, it reveals the struggle to find a

suitable language in praise of God as a main concern of Early Modern religious writers, and presents concepts which are highly relevant for the religious poetry of the time. Dissertation. (Series: Religion and Literature / Religion und Literatur, Vol. 5) [Subject: Religious Studies]

### **The Way of Complete Perfection**

Cambridge University Press  
 The Perfection of Freedom seeks to respond to the impoverished conventional notion of freedom through a recovery of an understanding rich with possibilities yet all but forgotten in contemporary thought. This understanding, developed in different but complementary ways by the German

thinkers Schiller, Schelling, and Hegel, connects freedom, not exclusively with power and possibility, but rather, most fundamentally, with completion, wholeness, and actuality. What is unique here is specifically the interpretation of freedom in terms of form, whether it be aesthetic form (Schiller), organic form (Schelling), or social form (Hegel). Although this book presents serious criticisms of the three philosophers, it shows that they open new avenues for reflection on the notion of freedom; avenues that promise to overcome many of the dichotomies that continue to haunt contemporary thought - for example,

between freedom and order, freedom and nature, and self and other. The Perfection of Freedom offers not only a significantly new interpretation of Schiller, Schelling, and Hegel, but also proposes a modernity more organically rooted in the ancient and classical Christian worlds.

*Tantric Techniques* Springer Nature

This is a study and first complete English translation of the Vajra Rosary Tantra (Skt. Vajramala, Tib. rdo rje phreng ba), one of the key Explanatory Tantras of the Secret Community (Skt. Guhyasamaja) and other Tantric systems. The text describes how, after the prerequisite preparations and realizations of the bodhisattva path, through further intense, lengthy, and subtle practices of meditation and other activities, one can become a completely enlightened buddha. The Tantra contains a detailed discussion of the types of yogic practice also discussed in Nagarjuna's Five Stages (Skt. Pañcakrama, Tib. rim pa Inga pa), principally covering the first of the perfection stage (nispannakrama) practices, that of vajra repetition (vajrajapa) or "speech isolation," but spanning all of the levels of practice up to the stage of integration (yuganaddha), or buddhahood. A distinctive feature of this Tantra is its description of the manipulation of the cakras system and the naming and techniques for mobilizing the subtle neural energy-winds (prana) in meditation, as well as a discussion of how those energy-winds manifest during the cycles of life and death. The text covers, among other things: the initiations of the perfection stage; great bliss (mahasukha) and the four ecstasies, and how they are produced through sexual yoga; the use of mantras; the Guhyasamaja body mandala of thirty-two deities; the uniting of the various channels (nadi); the six yogas of the perfection stage; the twenty rituals of the creation stage (utpattikrama); and the crucial role played by emptiness in the overall system. The only known commentary on the Vajra Rosary is that by Alamkarakala, and the translator has drawn heavily on that work in his detailed summary of and commentary on the Tantra. The Introduction gives an account of the history of the text and its Indian and Tibetan translators, particularly the royal monk Zhi ba 'od and the Indian Abbot Sujana Sri Jñana, who, the translator concludes, might have been Atisa. The ubiquity of friendship in human culture contributes to the fallacy that ideas about friendship have not changed and remained consistent throughout

history. It is only when we begin to inquire into the nature and significance of the concept in specific contexts that we discover how complex it truly is. Covering the vast expanse of Jewish tradition, from ancient Israel to the twenty-first century, this collection of essays traces the history of the beliefs, rituals, and social practices surrounding friendship in Jewish life. Employing diverse methodological approaches, this volume explores the particulars of the many varied forms that friendship has taken in the different regions where Jews have lived, including the ancient Near East, the Greco-Roman world, Europe, and the United States. The four sections—friendship between men, friendship between women, challenges to friendship, and friendships that cross boundaries, especially between Jews and Christians, or men and women—represent and exemplify universal themes and questions about human interrelationships. This pathbreaking and timely study will inspire further research and provide the groundwork for future explorations of the topic. In addition to the editor, the contributors are Martha Ackelsberg, Michela Andreatta, Joseph Davis, Glenn Dynner, Eitan P. Fishbane, Susannah Heschel, Daniel Jütte, Eyal Levinson, Saul M. Olyan, George Savran, and Hava Tirosh-Samuelson.

Translation has a long history in China. Down the centuries translators, interpreters, Buddhist monks, Jesuit priests, Protestant missionaries, writers, historians, linguists, and even ministers and emperors have all written about translation, and from an amazing array of perspectives. Such an exciting diversity of views, reflections and theoretical thinking about the art and business of translating is now brought together in a two-volume anthology. The first volume covers a time-frame from roughly the 5th century BCE to the twelfth century CE. It deals with translation in the civil and government context, and with the monumental project of Buddhist sutra translation. The second volume spans the 13th century CE to the Revolution of 1911, which brought an end to feudal China. It deals with the transmission of Western learning to China - a translation venture that changed the epistemological horizon and even the mindset of Chinese people. Comprising over 250 passages, most of which are translated into English for the first time here, the anthology is the first major source book to appear in English. It carries valuable primary material, allowing access into the minds of translators working in a time and space markedly different from

ours, and in ways foreign or even inconceivable to us. The topics these writers discussed are familiar. But rather than a comfortable trip on well-trodden ground, the anthology invites us on an exciting journey of the imagination. *Dynamic Responses to Dzong-ka-ba's The Essence of Eloquence: Volume 1* Createspace Independent Pub  
The great Buddhist scholars Santaraksita (725 - 88 CE.) and his disciple Kamalasila were among the most influential thinkers in classical India. They debated ideas not only within the Buddhist tradition but also with exegetes of other Indian religions, and they both traveled to Tibet during Buddhism's infancy there. Their views, however, have been notoriously hard to classify. The present volume examines Santaraksita's Tattvasamgraha and Kamalasila's extensive commentary on it, works that cover all conceivable problems in Buddhist thought and portray Buddhism as a supremely rational faith. One hotly debated topic of their time was omniscience - whether it is possible and whether a rational person may justifiably claim it as a quality of the Buddha. Santaraksita and Kamalasila affirm both claims, but in their argumentation they employ divergent rhetorical strategies in different passages, advancing what appear to be contradictory positions. McClintock's investigation of the complex strategies these authors use in defense of omniscience sheds light on the rhetorical nature of their enterprise, one that shadows their own personal views as they advance the arguments they deem most effective to convince the audiences at hand.

*Human Perfection in Byzantine Theology* Shambhala Publications

To what kind of existence does Christ call us? Christian theology has from its inception posited a powerful vision of humanity's ultimate and eternal fulfillment through the person and work of Jesus Christ. How precisely to understand and approach the human perfection to which the Christian is summoned is a question that has vexed the minds of many and diverse theologians. Orthodox Christian theology is notable for its consistent interest in this question, and over the last century has offered to the West a wealth of theological insight on the matter, drawn both from the resources of its Byzantine theological heritage as well as its living interaction with Western theological and philosophical currents. In this regard, the important themes of personhood, deification, epektasis, apophaticism, and divine energies have been elaborated with much success by Orthodox theologians;

but not without controversy. *Human Perfection in Byzantine Theology* addresses the question of human perfection in Orthodox theology via a retrieval of the sources, examining in turn the thought of leading representatives of the Byzantine theological tradition: St Maximus the Confessor, St Theodore the Studite, St Symeon the New Theologian, and St Gregory Palamas. The overarching argument of this study is that in order to present an Orthodox Christian understanding of human perfection which remains true to its Byzantine inheritance, supreme emphasis must be placed on the doctrine of Christ, especially on the significance and import of Christ's humanity. The intention of this work is thus to keep the creative approach to human destiny in Orthodox theology firmly moored to its theological past.

This meticulous account of how divine infinity was rationalized draws a controversial new picture of the scope and place of dualistic spirituality in Western intellectual history by documenting its historic role as a catalyst for innovative scientific reasoning.

*The Movement of Texts in England, France and Scandinavia* Oxford University Press  
This book examines some of the key elements of Buddhist education theory, in particular about educating for wisdom, the ultimate goal of Buddhist education. The teachings of Gautama Buddha have endured for thousands of years carried into the present era in schools, universities, temples, personal development courses, martial arts academies and an array of Buddhist philosophical societies across the globe. Philosophically, the ideas of the Buddha have held appeal across many cultures, but less is known about the underlying educational theories and practices that shape teaching and learning within Buddhist-inspired educational contexts. The chapters outline the development of the Buddha's teachings, his broad approach to education and their relevance in the 21st century. Subsequently, the book reviews the history of the evolution of the various schools of Buddhist thought, their teaching and learning styles and the dissemination among Asia and later also the Western countries. The book discusses education theories and devices embedded within the Buddhist teachings, examining the works found in the Tipitaka, the Buddhist canon.

Critical writings and commentary by the Los Angeles based artist Mike Kelley. The work of artist Mike Kelley (b. 1954) embraces performance, installation, drawing, painting, video, and sculpture. Drawing distinctively on high art and vernacular traditions, including historical research, popular culture, and psychology, Kelley came to prominence in the 1980s with a series of sculptures composed of craft materials. His recent work offers dialogues with architecture and with repressed memory syndrome, and a sustained inquiry into his own aesthetic and social history. The subjects on which Kelley has written are as varied as his artistic media. They include the work of fellow artists, sound, caricature, the uncanny, UFOlogy, and gender-bending. This book offers a diverse collection of Kelley's writings from the last twenty-five years. It contains major critical texts on art, film, and the wider culture, including his piece on the aesthetic he calls "urban Gothic." It also contains essays, mostly commissioned for exhibition catalogs and journals, on the artists and groups David Askevold, Öyvind Fahlström, Douglas Huebler, John Miller, Survival Research Laboratories, and Paul Thek, among others. Kelley's voices are passionate, analytic, and ironic, and his critical intelligence is leavened with touches of whimsy.

This is the second volume in Jeffrey Hopkins' valuable series on the Mind-Only School of Buddhism and a focal description of it in Dzong-Ka-ba's *The Essence of Eloquence*. Dzong-Ka-ba (1357-1419) is generally regarded as one of the greatest Tibetan philosophers, and his Mind-Only discourse on emptiness is considered a landmark in Buddhist philosophy. In Volume I, *Emptiness in the Mind-Only School of Buddhism*, Hopkins provided a translation of the introduction and the section on the Mind-Only School in *The Essence of Eloquence*. The present volume places this enigmatic and influential exposition in its historical and

philosophical contexts. *Reflections on Reality* conveys the intellectual vibrancy of the different cultural interpretations of this text and expands the key philosophical issues it addresses. Hopkins, one of the leading scholarly voices in Tibetan studies, begins this volume with two introductory chapters contextualizing Tibetan scholarship in general. He then goes on to discuss in detail the religious significance of the central topic of the three natures in the Mind-Only School. He also considers various views on the status of reality, including the doctrine of other-emptiness promulgated by the fourteenth century Jonang savant Shay-rap-gyel-tsen. Presenting accurate and insightful translations of a large amount of material that has never been available in English before, he shows how these topics have been debated among scholars in Tibet over six centuries. Comparing these with presentations in Europe, Japan, and the United States today, he created a lively conversation between normally disparate voices.

"Throughout the middle ages, many Francophone texts - chansons de geste, medieval romance, works by Chrâetien de Troyes and Marie de France - were widely translated in north-western Europe, in the process reflecting the new cultures in which they appeared. Dr Rikhardsdottir argues that such translations, demonstrating cultural movement and encounters, provide a rich opportunity to study changes in linguistic and cultural identity. By close comparison of a number of these texts, examining the various modifications made, and drawing on critical discourses ranging from post-colonial criticism to translation theory, the author explores the complexities of cultural dialogue and dissent. This approach both recognises and foregrounds the complex matrix of influence, resistance and transformations within the languages and cultural traditions of medieval Europe, revealing the undercurrents of cultural conflict in medieval textuality"--P. [4] of cover.

"A lucid, thorough and fresh exploration of the material. This is an exceedingly helpful study and may be the best single textbook on the subject. Previously, there was little of note in between inadequate introductions to Hindu thought and the more specialized primary or secondary materials. Organ is a competent philosopher and presents the 'Hindu

quest' in a scholarly and readable form...it is a key book for undergraduate libraries and would be an invaluable asset in a course which dealt seriously and at any length with the Hindu tradition. Excellent bibliography." —Choice "This is not just another book on Hinduism, but a source of systematic information..." —Bibliography of Philosophy "This scholarly and perceptive account makes Hindu beliefs and practices intelligible by showing how the contradictions which have puzzled Westerners are rooted in Human Diversity." —The Review of Metaphysics *Essays and Criticism* Edinburgh University Press

Deity yoga is the meditative practice of imagining oneself as an ideal being, fully endowed with compassion, wisdom, and their resultant altruistic activities. The idea is that by imagining being a Buddha one gets closer to actually achieving Buddhahood. Tantric Techniques offers a complete system of Tantric meditation comparing the views of three seminal Tibetan authors on deity yoga and on issues such as how to safeguard against psychological inflation and how to use negative emotions on the path.

Excerpt from *The Republic of Plato: Translated Into English With Introduction, Analysis Marginal Analysis, and Index* The Republic of Plato is the longest of his works with the exception of the Laws, and is certainly the greatest of them. There are nearer approaches to modern metaphysics in the Philebus and in the Sophist. The Politicus or Statesman is more ideal; the form and institutions of the State are more clearly drawn out in the Laws; as works of art, the Symposium and the Protagoras are of higher excellence. But no other Dialogue of Plato has the same largeness of view and the same perfection of style; no other contains more graphic descriptions of character, or is richer in humour and imagery. Nor in any other Dialogue is the attempt made to unite the speculative and practical, or to interweave the State with philosophy. Neither must we forget that the Republic is but the third part of a still larger work which was to have included an ideal history of Athens, as well as a political and physical philosophy. Lastly, Plato may be regarded as the 'captain or leader' of a goodly band of followers; in him is to be found the original of Cicero's *De Republica*, of St. Augustin's *City of God*, of the Utopia of Sir Thomas More, and of the numerous modern writings which are framed upon

the same model. The Republic of Plato is also the first treatise upon education, of which Milton and Locke, Rousseau, Jean Paul, and Goethe are the legitimate descendants. Like Dante or Bunyan, he has a revelation of another world; in the early Church he exercised a real influence on theology, and at the Revival of Literature on politics. And many of the latest thoughts of modern philosophers and statesmen, such as the unity of knowledge, the reign of law, and the equality of the sexes, have been anticipated in a dream by Plato. Electronic texts and text analysis tools have opened up a wealth of opportunities to higher education and language service providers, but learning to use these resources continues to pose challenges to scholars and professionals alike. Translation-Driven Corpora aims to introduce readers to corpus tools and methods which may be used in translation research and practice. Each chapter focuses on specific aspects of corpus creation and use. An introduction to corpora and overview of applications of corpus linguistics methodologies to translation studies is followed by a discussion of corpus design and acquisition. Different stages and tools involved in corpus compilation and use are outlined, from corpus encoding and annotation to indexing and data retrieval, and the various methods and techniques that allow end users to make sense of corpus data are described. The volume also offers detailed guidelines for the construction and analysis of multilingual corpora. Corpus creation and use are illustrated through practical examples and case studies, with each chapter outlining a set of tasks aimed at guiding researchers,

students and translators to practice some of the methods and use some of the resources discussed. These tasks are meant as hands-on activities to be carried out using the materials and links available in an accompanying DVD. Suggested further readings at the end of each chapter are complemented by an extensive bibliography at the end of the volume. Translation-Driven Corpora is designed for use by teachers and students in the classroom or by researchers and professionals for self-learning. It is an invaluable resource for anyone interested in this fast growing area of scholarly and professional activity.

This third volume concludes our introduction to analysis, wherein we ?nish laying the groundwork needed for further study of the subject. As with the ?rst two, this volume contains more material than can be treated in a single course. It is therefore important in preparing lectures to choose a suitable subset of its content; the remainder can be treated in seminars or left to independent study. For a quick overview of this content, consult the table of contents and the chapter introductions. This book is also suitable as background for other courses or for self-study. We hope that its numerous glimpses into more advanced analysis will arouse curiosity and so invite students to further explore the beauty and scope of this branch of mathematics. In writing this volume, we counted on the invaluable help of friends, colleagues, students, and students. Special thanks go to Georg Prokert, Pavol Quittner, Olivier Steiger, and Christoph Walker, who worked through the entire text critically and so helped us remove errors and make substantial improvements. Our thanks also go out to Carlheinz Kneisel and Bea Wollenmann, who likewise read the majority of the manuscript and pointed out various inconsistencies. Without the inestimable effort of our "typesetting perfectionist", this volume could not have reached its present form: her tirelessness and patience with T X E and other software brought not only the end product, but also numerous previous versions, to a high degree of perfection. For this contribution, she has our greatest thanks.
